Alan Meyer

Army Aviation Digest ,1955

Weekend Pilots Alan Meyer,2015-12-30 The inside story of the hypermasculine world of American private aviation. In 1960, 97 percent of private pilots were men. More than half a century later, this figure has barely changed. In *Weekend Pilots*, Alan Meyer provides an engaging account of the postWorld War II aviation community. Drawing on public records, trade association journals, newspaper accounts, and private papers and interviews, Meyer takes readers inside a white, male circle of the initiated that required exceptionally high skill levels, that celebrated facing and overcoming risk, and that encouraged fierce personal independence. The Second World War proved an important turning point in popularizing private aviation. Military flight schools and postwar GI-Bill flight training swelled the ranks of private pilots with hundreds of thousands of young, mostly middle-class men. Formal flight instruction screened and acculturated aspiring fliers to meet a masculine norm that traced its roots to prewar barnstorming and wartime combat training. After the war, the aviation community's response to aircraft designs played a significant part in the technological development of personal planes. Meyer also considers the community of pilots outside the cockpit—from the time-honored tradition of hangar flying at local airports to air shows to national conventions of private fliers—to argue that almost every aspect of private aviation reinforced the message that flying was by, for, and about men. The first scholarly book to examine in detail the role of masculinity in aviation, *Weekend Pilots* adds new dimensions to our understanding of embedded gender and its long-term effects.

The American Aviation Experience Tim Brady,2000 This book is designed to be a primary text for courses in aviation history and development and aviation in America. The seventeen chapters in *The American Aviation Experience: A History* range chronologically from ancient times through the Wright brothers through both world wars, culminating with the development of the U.S. space program. Contributors also cover balloons and dirigibles, African American pioneers in aviation, and women in aviation. These essayists--leading scholars in the field--present the history of aviation mainly from an American perspective. *The American Aviation Experience* includes 335 black-and-white photographs, two maps, and an appendix, Leonardo da Vinci and the Science of Flight..

Wichita ,2019-09-03 This book commemorates Wichita's role as Air Capital of the World. It takes readers from the early birds and barnstormers to the pioneers and entrepreneurs who established dozens of aircraft and associated factories in the 1920s. The story continues with the founding of Cessna, Beechcraft and Stearman (which became Boeing Wichita, then Spirit AeroSystems) and the massive build-up during World War II. Robust post-war growth got another boost when Bill Lear came to town and launched the business jet revolution with his Learjet. Today Wichita remains at the center of global aviation design and manufacturing with Textron Aviation, Spirit AeroSystems, Bombardier Learjet, Airbus and many dozens of smaller aviation manufacturers, suppliers and support organizations. What made Wichita the Air Capital? Flat prairies resembled one enormous landing field. Southwesterly winds added extra thrust to get and stay aloft. Farming and small manufacturing provided a legion of imaginative, industrious problem-solvers. Local boosters latched onto and promoted anything that flew. The city's central location provided an ideal refueling stop for coast-to-coast airmail routes. And oil generated a class of savvy, starry-eyed entrepreneurs who both used aircraft and had money to invest. Wichita brought it all together. The people. The promise. The planes. On Sept. 2, 1911, Albin Longren became the first person to build and fly an airplane in Kansas. His pusher-type biplane lifted off from a hayfield with a four-gallon gas tank and flight instruments that consisted of a pocket watch and barometer. The first plane built in Wichita rolled out of

production in 1917, when Clyde Cessna assembled his Comet. Wichita's first commercial aircraft, the Swallow, came from the E.M. Laird Airplane Co. in 1920. By 1928, Wichita was general aviation's manufacturing grand central, producing 120 airplanes a week - a quarter of all U.S. output. A Chamber of Commerce Air Capital logo contest celebrated the city's 16 aircraft manufacturers, six aircraft engine factories, 11 airports and dozen flying schools. Wichita produces more airplanes - almost 300,000 to date - and offers more skilled aviation workers than any other city. Aviation forms Wichita's heritage and future.
