Being Aware of Being Aware Rupert Spira,2017-11-01 Everybody is aware, all seven billion of us. We are aware of thoughts, feelings, sensations, and perceptions. All people share the experience of being aware, but relatively few people are aware that they are aware. Most people's lives consist of a flow of thoughts, images, ideas, feelings, sensations, sights, sounds, and so on. Very few people ask, 'What is it that knows this flow of thoughts, feelings, and perceptions? With what am I aware of my experience?' The knowing of our being—or rather, awareness's knowing of its own being in us—is our primary, fundamental and most intimate experience. It is in this experience that the peace, happiness and love for which all people long reside. The happiness we have sought so long outside of ourselves, in situations, objects and relationships, turns out to be always present and available in the simple knowing of our own being as it truly is. The knowing of our own being shines in each of us as the experience 'I am' or 'I am aware', or simply the knowledge 'I'. This obvious, familiar and intimate experience has no objective qualities and is, therefore, overlooked or ignored by the majority of people. This overlooking of our own being is the ultimate cause of unhappiness. What is the nature of the experience of being aware or awareness itself? The exploration of this question is the subject matter of this book and the essence of the Direct Path to peace and happiness. * * * The Essence of Meditation Series presents meditations on the essential, non-dual understanding that lies at the heart of all the great religious and spiritual traditions, compiled from contemplations led by Rupert Spira at his meetings and retreats. This simple, contemplative approach, which encourages a clear seeing of one's experience rather than any kind of effort or discipline, leads the reader to an experiential understanding of their own essential being and the peace and fulfillment that are inherent within it. Being Aware of Being Aware is the first and introductory volume in The Essence of Meditation Series.

Becoming Aware Lisa Garr,2016-05-19 Lisa Garr wants you to stop going through the motions in life. She wants you to become aware. Her mission on her internationally syndicated radio program, The Aware Show--and now in her first book--is to inspire positive growth in all areas of life and bring conscious conversations into everyone's living room. Lisa's own story is remarkable. Several years ago, she suffered a traumatic brain injury during a freak biking accident that rendered her unable to speak or rely on her short-term memory. She not only used cutting-edge EEG techniques to heal but also set out to live a different life than the one she was leading in her pre-accident days. Lisa used this experience as a wake-up call and decided to transform in every way possible, including marrying her true love and giving birth to their daughter. Today, the woman who couldn't even say a few words is a radio and Internet sensation with a massive, swiftly growing audience and multimedia platform. Now she brings the lessons she has learned from countless interviews with inspirational, spiritual, and new-thought leaders to the pages of this book. She discusses how she's applied them to her own life, and explains how you can, too. Lisa will show you how to: - Use what she calls brain-nastics to help you repattern your brain for optimal function - Create what you want on multiple levels and become a Conscious Catalyst for change - Overcome stress; make your health a priority; and learn to be a better parent, partner, friend, and co-worker - Get back on track when you encounter a roadblock--or when life seems to hit you on the head (as it did her!) Join Lisa on an inspiring journey of positive growth. As you learn to become aware and use your own maximum wattage, you'll find that life is full of amazing possibilities!

Buyer Aware Marta L. Tellado,2022-09-20 In an era of corporate overreach when consumers have never been more vulnerable to digital surveillance, unsafe food, and dangerously faulty products, the president and CEO of Consumer Reports gives us a playbook to put the power back in our hands. You've been getting ripped off. The rules that have protected consumers for decades are failing. Companies are spying on us. Many of the products we once trusted are dangerous and failing at alarming rates. Whether we are buying a crib, a small appliance, an iPhone app, or shopping for car insurance, it's become harder than ever to know whether the choices we make in the marketplace are putting us at risk-either from physical harm or the abuse of our personal data by hackers or corporations. This is intolerable. It's wrong. And we don't have to put up with it anymore. Marta L. Tellado, the president and CEO of Consumer Reports, has been an advocate for consumers for decades. In Buyer Aware, Tellado shows you the steps you can take to protect yourself from predatory business practices, and how to exert your inherent power as a consumer to spur politicians and businesses to clean up their act. Only then can we ensure that we have an economy that is fair, safe, and transparent for all, and puts consumers first.

Relax and Be Aware Sayadaw U Tejaniya,Doug McGill,2019-12-10 A lucid, practical guide to develop relaxation, awareness, mental clarity, and spiritual insight in your daily life. Since mindfulness is known to be so physically, mentally, and spiritually beneficial, why not practice it right now? Why not in every moment? Burmese Buddhist master Sayadaw U Tejaniya writes that we can indeed practice in this way, and the key is not forceful effort but rather a continuous gentle remembering of our intention to renew our awareness. Thirty-one short chapters--A Month of Daily Life Meditations--show precisely how to build a daily life meditation practice that steadily develops relaxation, refreshment, and enlightenment. The right time to meditate is all day long, from the moment we wake up and open our eyes, until the moment we fall asleep at night, writes U Tejaniya. If you are practicing correctly with right effort, it will definitely bring peace and joy.

The Aware Saga Terence Chong,2011-01-01 In March 2009, the Association of Women for Action and Research (AWARE) was briefly taken over by a Christian faction. Their coup was overturned within a matter of weeks, but the episode highlighted a variety of issues, including the role of religion in civil society, sex education, homosexuality, state intervention and media engagement. Although the immediate issue was control of an activist group concerned with women's rights, it has implications for the agendas and concerns of NGOs, 'culture wars', the processes of citizenry mobilization, mass participation and noisy democracy, and liberal voices in contemporary Singapore. In this book, academics and public intellectuals examine the AWARE saga within the context of Singapore's civil society, considering the political and historical background and how the issues it raised relate to contemporary societal trends. In addition to documenting a milestone event for Singapore's civil society, the authors offer provocative interpretations that will interest a broad range of readers.

Power Aware Computing Robert Graybill,Rami Melhem,2013-04-17 With the advent of portable and autonomous computing systems, power consumption has emerged as a focal point in many research projects, commercial systems and DoD platforms. One current research initiative, which drew much attention to this area, is the Power Aware Computing and Communications (PAC/C) program sponsored by DARPA. Many of the chapters in this book include results from work that have been supported by the PACIC program. The performance of computer systems has been tremendously improving while the size and weight of such systems has been constantly shrinking. The capacities of batteries relative to their sizes and weights has been also improving but at a rate which is much slower than the rate of improvement in computer performance and the rate of shrinking in computer sizes. The relation between the power consumption of a computer system and its performance and size is a complex one which is very much dependent on the specific system and the technology used to build that system. We do not need a complex argument, however, to be convinced that energy and power, which is the rate of energy consumption, are becoming critical components in computer systems in general, and portable and autonomous systems, in particular. Most of the early research on power consumption in computer systems addressed the issue of minimizing power in a given platform, which usually translates into minimizing energy consumption, and thus, longer battery life.

Shows how sensor validation, calibration, and integration impact application design and power management Explains specific implementations for pervasive and context-aware computing, such as navigation and timing Demonstrates how mobile applications can satisfy usability concerns, such as know me, free me, link me, and express me Covers a broad range of application areas, including ad-hoc networking, gaming, and photography

Self-aware Computing Systems Peter R. Lewis,Marco Platzner,Bernhard Rinner,Jim Tørresen,Xin Yao,2016-07-28 Taking inspiration from self-awareness in humans, this book introduces the new notion of computational self-awareness as a fundamental concept for designing and operating computing systems. The basic ability of such self-aware computing systems is to collect information about their state and progress, learning and maintaining models containing knowledge that enables them to reason about their behaviour. Self-aware computing systems will have the ability to utilise this knowledge to effectively and autonomously adapt and explain their behaviour, in changing conditions. This book addresses these fundamental concepts from an engineering perspective, aiming at developing primitives for building systems and applications. It will be of value to researchers, professionals and graduate students in computer science and engineering.
