Leaders Count Lawrence H. Kaufman,2005 Mergers have affected railroads in ways few other industries have experienced, and in the last 50 years they have steered the business direction of American railroads. Leaders Count brings readers the dramatic story of how the Aurora Branch Railroad, which spanned from Aurora, Illinois, to Chicago, grew and developed into the modern-day BNSF Railway. The story begins with the many ways railroads shaped and settled the country and tells how the founders commitment to their dreams ensured the railroad's success. The profiles of tenacious leaders like James J. Hill, known as The Empire Builder, and Matthew Rose, current CEO of BNSF, will inspire readers. This is a case history of the business strategies that have taken this company from its humble beginnings to the industry giant that it is today. More than 75 photos from the company's extensive archives accompany the story of BNSF's evolution. As one of the largest and most successful of U.S. railroads, BNSF Railway is a vibrant example of today's freight railroad industry. While the book provides a brief history of railroads in general, including the five principal companies making up the present day BNSF, its focus is on the critical decisions and strategies implemented by its leaders, choices that ensured the railroad's survival. Leader Count will be released on the tenth anniversary of the merger that brought the Burlington Northern and the Santa Fe railroads to create the industry titan that it is today.

Collision Between Two BNSF Railway Company Freight Trains Near Gunter, Texas, May 19, 2004 United States. National Transportation Safety Board,2006 The safety issues discussed in this report are the issuance of track warrant authority that contains an after-arrival stipulation and the informal communication of proposed meeting locations for trains in non-signaled territory. As a result of its investigation, the National Transportation Safety Board makes safety recommendations to the Federal Railroad Administration, the BNSF Railway Company, the Association of American Railroads, and the American Short Line and Regional Railroad Association.

History of the Atchison, Topeka and Santa Fe Railway Keith L. Bryant|Frailey Jr. (Fred W.),Fred W. Frailey,2020-09 Cyrus K. Holliday envisioned a railroad that would run from Kansas to the Pacific, increasing the commerce and prosperity of the nation. With farsighted investors and shrewd management, the Atchison, Topeka and Santa Fe Railway grew from Holliday's idea into a model of the modern, rapid, and efficient railroad. There were many growing pains early on, including rustlers, thieves, and desperadoes as well as the nineteenth century's economic and climatic hardships. The railroad eventually extended from Chicago to San Francisco, with substantial holdings in oil fields, timber land, uranium mines, pipelines, and real estate. This is the first comprehensive history of the iconic Atchison, Topeka and Santa Fe Railway, from its birth in 1859 to its termination in 1996. This volume discusses the construction and operation of the railway, the strategies of its leaders, the evolution of its locomotive fleet, and its famed passenger service with partner Fred Harvey. The vast changes within the nation's railway system led to a merger with the Burlington Northern and the creation of the BNSF Railway. An iconic railroad, the Santa Fe at its peak operated thirteen thousand miles of routes and served the southwestern region of the nation with the corporate slogan Santa Fe All the Way. This new edition covers almost twenty-five more years of history, including the merger of the Santa Fe and Burlington Northern railroads and new material on labor, minorities, and women on the carrier along with new and updated maps and photographs.
