Advanced Database Systems Carlo Zaniolo,1997-05 The database field has experienced a rapid and incessant growth since the development of relational databases. The progress in database systems and applications has produced a diverse landscape of specialized technology areas that have often become the exclusive domain of research specialists. Examples include active databases, temporal databases, object-oriented databases, deductive databases, imprecise reasoning and queries, and multimedia information systems. This book provides a systematic introduction to and an in-depth treatment of these advanced database areas. It supplies practitioners and researchers with authoritative coverage of recent technological advances that are shaping the future of commercial database systems and intelligent information systems. Advanced Database Systems was written by a team of six leading specialists who have made significant contributions to the development of the technology areas covered in the book. Benefiting from the authors' long experience teaching graduate and professional courses, this book is designed to provide a gradual introduction to advanced research topics and includes many examples and exercises to support its use for individual study, desk reference, and graduate classroom teaching.

*The Practitioner's Guide to Graph Data* Denise Gosnell,Matthias Broecheler,2020-03-20 Graph data closes the gap between the way humans and computers view the world. While computers rely on static rows and columns of data, people navigate and reason about life through relationships. This practical guide demonstrates how graph data brings these two approaches together. By working with concepts from graph theory, database schema, distributed systems, and data analysis, you'll arrive at a unique intersection known as graph thinking. Authors Denise Koessler Gosnell and Matthias Broecheler show data engineers, data scientists, and data analysts how to solve complex problems with graph databases. You'll explore templates for building with graph technology, along with examples that demonstrate how teams think about graph data within an application. Build an example application architecture with relational and graph technologies Use graph technology to build a Customer 360 application, the most popular graph data pattern today Dive into hierarchical data and troubleshoot a new paradigm that comes from working with graph data Find paths in graph data and learn why your trust in different paths motivates and informs your preferences Use collaborative filtering to design a Netflix-inspired recommendation system

**Human-Centered Communication** Ethan Beute,Stephen Pacinelli,2021-10-12 Wall Street Journal Bestseller DIGITAL POLLUTION IS THE PROBLEM. HUMAN-CENTERED COMMUNICATION IS THE SOLUTION. We're spending more time than ever in virtual environments. That will only increase, as will the amount of noise we encounter there. The seemingly endless series of unwelcome digital distractions range from frustrating to dangerous. As individuals and businesses, we not only spend time and energy managing this digital pollution, we often create it. At risk are relationships and revenue. The only viable way forward is to be more

thoughtful, intentional, and personal. Human-Centered Communication provides a philosophy and practice to help you connect in more meaningful and effective ways with prospects, customers, team members, and every stakeholder in your success. Learn to: Break through the noise and earn attention Build trust and create engagement Enhance your reputation with both people and algorithms The concepts and models in this book apply to any form or channel of communication, but human centricity favors video. More visual and emotional than faceless digital communication, video enhances tone, intent, subtlety, nuance, and meaning. Learn to be clearer and more confident on camera in live video calls, meetings, and presentations, as well as in recorded video emails, social messages, and text messages. The authors of the bestselling *Rehumanize Your Business* join with eleven industry-leading experts from companies like Salesforce, HubSpot, and RE/MAX to lead the growing conversation on leveraging human strengths in an increasingly digital world. The brightest future is tech-enabled, but authors Ethan Beute and Stephen Pacinelli show that it's also human-centered. The experts studied, interviewed, and featured: Jacco van der Kooij, Founder of Winning by Design Dan Hill, PhD, President of Sensory Logic Mathew Sweezey, Director of Market Strategy at Salesforce Julie Hansen, Creator of the Selling on Video Master Class Adam Contos, CEO of RE/MAX Lauren Bailey, Founder and President of Factor 8 and #GirlsClub Mario Martinez Jr, Founder and CEO of Vengreso Viveka von Rosen, Cofounder and Chief Visibility Officer at Vengreso Shep Hyken, Customer Service and Customer Experience Expert Morgan J Ingram, Director of Sales Execution at JB Sales Training Dan Tyre, sales executive and founding team member at HubSpot Among the themes addressed: Trust and relationships Communication and connection Service and value Text and video Noise and pollution Among the types of videos in which you'll become more confident and effective: Live, synchronous video meetings Recorded, asynchronous video messages Video calls and video presentations Video in emails and text messages Video in social feeds and social messages Video for specific individuals and large groups Video for known audiences and anonymous masses Video for prospects, customers, employees, and other stakeholders For immediate benefits and for long-term reputation, now is the time to get ahead of and stay ahead of ever-increasing digital noise and pollution - with Human-Centered Communication.
