**Gen X TV** Rob Owen, 1997-03-01 No generation eludes definition as much as Generation X. Rob Owens opens with a history of network and cable television since the birth of Generation X, but goes on to explore the symbiotic relationship between television and this largely misunderstood age group. From the first megahit *The Brady Bunch* to today's *Friends*, Owen unflinchingly describes the boob tube as the ubiquitous babysitter for millions of young people. Television, Owen maintains, consumes innocence as viewers encounter countless episodes of society's woes, from political strife and environmental decimation to everyday violence and crime.

**The Cambridge Handbook of Irony and Thought** Raymond W. Gibbs, Jr, Herbert L. Colston, 2023-12-07 The Cambridge Handbook of Irony and Thought offers the first comprehensive collection of chapters in multidisciplinary irony scholarship. These chapters explore the significance of irony, both verbal and situational, in language, thought, human action, and artistic expression. They cover five main themes: the scope of irony in human experience; irony's impact (both personal and in social life); irony in linguistic communication; irony and affect, and irony in expressive contexts. Directing Desire Kari Barclay, 2023-10-25 Directing Desire explores the rise of consent-based and trauma-informed approaches to staging sexually and sensually charged scenes for theater in the contemporary U.S., known as intimacy choreography. From 2015 to 2020, intimacy choreography transformed from a grassroots movement in experimental and regional theaters into a best practice accepted in Hollywood and on Broadway. Today, intimacy choreographers have become a veritable intimacy industry in the cultural sphere, sparking attention from Rolling Stone to The New York Times to the sketch comedy series Saturday Night Live. This book analyzes the forces that have led to intimacy choreography's meteoric rise and asks what implications the field has for theater practice

more broadly. Building a theoretical framework for intimacy directing, Directing Desire also strives to reorient the conversation in the field so that artists understand not only best practices in consent but also intersectional frameworks that expand and rework consent.

The Structure of Values and Norms Sven Ove Hansson, 2001-07-02 Formal representations of values and norms are employed in several academic disciplines and specialties, such as economics, jurisprudence, decision theory and social choice theory. Sven Ove Hansson closely examines such foundational issues as the values of wholes and the values of their parts, the connections between values and norms, how values can be decision-guiding and the structure of normative codes with formal precision. Models of change in both preferences and norms are offered, as well as a method to base the logic of norms on that of preferences. Hansson has developed a unified formal representation of values and norms that reflects both their static and their dynamic properties. This formalized treatment, carried out in terms of both informal value theory and precise logical detail, will contribute to the clarification of certain issues in the basic philosophical theory of values and norms.

**Gone** Bruce Snoop, 2012-09 We all take on the character and nature of the society we live in. But as Christians, we are to have a different look. More and more in the modern American society, Christians look like everybody else, and when we do try to stand out, we are mocked and ridiculed, and so we draw back in to look like everyone else. God has given us a call to live as a community. To live outside the lines of the world. To be his hands and feet in a troubled world, but not to be just like the world. Too often in our world, Christians curb their ideologies and their faith to be more accepted, so we can create community. But true community is not sacrificing our obedience to God in order to appease the world around us. One of the major reasons for the growth of the first-century church was their need to rely on each other. Their need not for autonomous individualism but for community.

Foursome Jeremiah Healy, 2012-04-17 Cuddy travels to Maine to investigate a gruesome lakeside murder Steve always forgets to buy groceries on the way to the lake

house. Every time he and his wife make a pilgrimage to Maine, his first task is to drive into town and pick up essentials. **The Rhetoric of the American Political Party Conventions, 1948-2016** Theodore F. Sheckels, 2020-10-13 The Rhetoric of the American Political Party Conventions, 1948-2016 establishes the rhetorical goals of the thirty-six political party conventions that have taken place since 1948 against the backdrop of the fundamental changes that television brought to the conventions. Theodore F. Sheckels analyzes these conventions to determine whether the gatherings met or failed to meet those goals, including addressing civil rights, unifying divergent wings of the party, celebrating the triumph of a single wing, overcoming dissent inside and outside the meeting hall, overcoming—or capitalizing on—scandal, reconstituting the party after defeats, arguing for change, and advocating for inclusion. Sheckels observes that although speeches are the primary vehicle through which attendees strive to reach these goals, the crucial addresses are not always by the principal players; often, events other than speeches such as negotiations, demonstrations, and media spin can be just as consequential. Sheckels discusses both the similarities and

differences in the ways in which the conventions do business and constitute and reconstitute what the political parties are, aiming to persuade the public with rhetorical images and messages. Scholars of communication, rhetoric, political science, and American studies will find this book particularly useful.

Reconnecting Culture, Technology and Nature Mike Michael, 2012-10-12 In this exciting new book, Mike Michael uses case studies of mundane technologies such as the walking boot, the car and the TV remote control to question some of the fundamental dichotomies through which we make sense of the world. Drawing on the insights of Bruno Latour, Donna Haraway and Michel Serres, the author elaborates an innovative methodology through which new hybrid objects of study are creatively constructed, tracing the ways in which the cultural, the natural and the technological interweave in the production of order and disorder. This book critically engages with and draws connections between a wide range of literature including those concerned with the environment, consumption and the body.
