Bang! ((repackage)) Sharon Flake, 2018-10-16 Bang! Guns really sound like that, you know. Bang! And people bleed from everywhere, and blood is redder than you think. And little kids look funny in caskets. That's 'cause they ain't meant to be in one, I guess. Mann is only thirteen, yet he has already had to deal with more than most go through in a lifetime. His family is still reeling from the tragic shooting death of his little brother, Jason, each person coping with grief in his or her own way. Mann's mother has stopped eating and is obsessed with preserving Jason's memory, while his father is certain that presenting a hard edge is the only way to keep his remaining son from becoming a statistic. Mann used to paint and ride horseback, but now he's doing everything he can to escape his emotions: getting involved in fights at school, joyriding at midnight, and much worse. His father, at his wit's end, does the only thing he thinks will teach his son how to be a man: he abandons him and his friend Kee-Lee in the woods, leaving them to navigate their way home, alone. Now Mann, struggling to find his way back to civilization, must also reconcile himself to the realities of a world that has stolen his little brother, and that isn't even sure it still wants Mann in it. One wrong turn and it could all be over for him, too. Bang.

The Big Bang Book Asa Stahl, 2020 Introduces the concept of the big bang and the immensity of the universe in picture book format.

The Bang ... , 1909

Picture This ,2016-08-16 Molly Bang's brilliant, insightful, and accessible treatise is now revised and expanded for its 25th anniversary. Bang's powerful ideas—about how the visual composition of images works to engage the emotions, and how the elements of an artwork can give it the power to tell a story—remain unparalleled in their simplicity and genius. Why are diagonals dramatic? Why are curves calming? Why does red feel hot and blue feel cold? First published in 1991, *Picture This* has changed the way artists, illustrators, reviewers, critics, and readers look at and understand art.

Bang: A Novel Daniel Peña,2018-01-31 Uli's first flight, a late-night joy ride with his brother, changes their lives forever when the engine stops and the boys crash land, with "Texas to the right and Mexico to the left." Before the accident, Uli juggled his status as both an undocumented immigrant and a high school track star in Harlingen, Texas, desperately hoping to avoid being deported like his father. His mother Araceli spent her time waiting for her husband. His older brother Cuauhtémoc, a former high-school track star turned drop-out, learned to fly a crop duster, spraying pesticide over their home in the citrus grove. After the crash, Cuauhtémoc wakes up bound and gagged, wondering where he is. Uli comes to in a hospital, praying that it's on the American side of the border. And their mother finds herself waiting for her sons as well as her missing husband. Araceli knows that she has to go back to the country she left behind in order to find her family. In Mexico, each is forced to navigate the complexities of their past and an unknown world of deprivation and violence. Ruthless drug cartels force Cuauhtémoc to fly drugs. "If a brick goes missing, Cuauhtémoc dies. If a plane goes missing, Cuauhtémoc dies. If Cuauhtémoc goes missing, they find Cuauhtémoc (wherever he's at) and Cuauhtémoc

dies.” If they can’t find him, they will kill his mother. They have photos of her in Matamoros to prove they can enforce the threat. Meanwhile, Uli returns to his family’s home in San Miguel and finds a city virtually abandoned, devastated by battles between soldiers, cartels and militias that vie for control. Vividly portraying the impact of international drug smuggling on the innocent, Peña’s debut novel also probes the loss of talented individuals and the black market machines fed with the people removed and shut out of America. Ultimately, Bang is a riveting tale about ordinary people forced to do dangerous, unimaginable things.

The Stuff of Stars Marion Dane Bauer, 2020-10-06 In an astonishing unfurling of our universe, Newbery Honor winner Marion Dane Bauer and Caldecott Honor winner Ekua Holmes celebrate the birth of every child. Before the universe was formed, before time and space existed, there was . . . nothing. But then . . . BANG! Stars caught fire and burned so long that they exploded, flinging stardust everywhere. And the ash of those stars turned into planets. Into our Earth. And into us. In a poetic text, Marion Dane Bauer takes readers from the trillionth of a second when our universe was born to the singularities that became each one of us, while vivid illustrations by Ekua Holmes capture the void before the Big Bang and the ensuing life that burst across galaxies. A seamless blend of science and art, this picture book reveals the composition of our world and beyond — and how we are all the stuff of stars.

Bang Bang Theo Gangi, 2012-04-24 Stickup kid (n.): an urban gunslinger who preys on other criminals, often stealing already stolen property, using violence and intimidation. Izzy picks a bad time to have a conscience crisis. As a stick up kid in New York's underworld, he has a good thing going--robbing the worst drug lords in the city

and leaving no witnesses behind. It is a game of high risk and high reward. There is just one problem: Izzy is in his thirties now, and for good reason, there is no such thing as a stickup man. When a job gets botched, leaving Izzy's psychotic partner guilty of yet another homicide, Izzy knows what he is supposed to do--kill the remaining witness or be killed himself. But a bystander named Eva seems different from others he has done before. Is she the exception to Izzy's number one rule? Izzy has never jacked himself into a problem he could not jack himself out of. But that was before. Now, on the unforgiving streets of New York City--where the skyline stretches out like a graveyard--there is a war on and there is no room for mistakes. His ex-partner is hellbent on revenge and is no longer acting alone. And as bodies start to fall around Izzy, he is left to take on both his enemies and his inner demons face first in a battle that has no questions, no conversation. Just bang bang. In this explosive debut, Theo Gangi redefines the crime thriller, delivering a pulse-pounding, white-knuckle ride through gritty back rooms, where justice is sealed with gunfire, no one can be trusted, and being innocent can get you killed. Theo Gangi is a superb craftsman. His work displays diverse characters and wonderful dialogue that would make Elmore Leonard stand up and applaud. He is new talent that has finally arrived. --Eric Jerome Dickey, New York Times bestseller author Theo Gangi portrays the people of the criminal world not only in a way that brings them to vivid life, but life felt at the extreme, out where suffering, pity, even tenderness and love have their own stark reality. --David Plante, author of Age of Terror Theo Gangi's first novel Bang Bang is a classic extreme thriller, with some surprising literary subtleties, and a level of Escherian interlocking that would make Tarantino's head spin. --Madison Smartt Bell, of All Soul's

Rising, a National Book Award finalist Gritty and gripping, full of tense moments and sharp prose, Bang Bang is a debut worthy of attention. With the ear of a poet, the insight of a psychologist, and the attitude of a true New Yorker, Theo Gangi brings empathy and pathos to every gangsterfied page. --Adam Mansbach, author of *Angry Black White Boy* Theo Gangi attended Goucher College, and is a recent graduate of Columbia's MFA writing program. His writing has appeared in *The Greensboro Review* and *The Columbia Spectator*. A New York native, he now lives in Harlem.

A Little Book about the Big Bang Tony

Rothman, 2022-03-01 A concise introduction to the greatest questions of modern cosmology. What came before the big bang? How will the universe evolve into the future? Will there be a big crunch? Questions like these have no definitive answers, but there are many contending theories. In *A Little Book about the Big Bang*, physicist and writer Tony Rothman guides expert and uninitiated readers alike through the most compelling mysteries surrounding the nature and origin of the universe. Cosmologists are busy these days, actively researching dark energy, dark matter, and quantum gravity, all at the foundation of our understanding of space, time, and the laws governing the universe. Enlisting thoughtful analogies and a step-by-step approach, Rothman breaks down what is known and what isn't and details the pioneering experimental techniques scientists are bringing to bear on riddles of nature at once utterly basic and stunningly complex. In Rothman's telling, modern cosmology proves to be an intricate web of theoretical predictions confirmed by exquisitely precise observations, all of which make the theory of the big bang one of the most solid edifices ever constructed in the history of science. At the same time, Rothman is careful to distinguish established physics from speculation, and in doing so highlights current controversies and avenues of future exploration. The idea of the big bang is now almost a century old, yet with each new year comes a fresh enigma. That is scientific progress in a nutshell: every

groundbreaking discovery, every creative explanation, provokes new and more fundamental questions. Rothman takes stock of what we have learned and encourages readers to ponder the mysteries to come.

Bang!! Brian May,Chris Lintott,Patrick Moore,2021-09-30 In 2006, rock legend and experienced amateur astronomer Brian May joined the legendary expert Sir Patrick Moore and astrophysicist Professor Chris Lintott to tell the story of the universe from the moment time and space came into existence at the Big Bang, through to the infinite future and the ultimate fate that awaits us. Following the spectacular success of the original book, Brian and Chris have got together again to extend and update the information in this accessible introduction to the history of the universe. Many of the pictures of the universe obtained by instruments such as the Hubble Space Telescope or the Very Large Telescope in Chile are beautiful enough to be considered works of art in their own right and this book presents them in context, and uses extraordinary new artworks to explain the mind-blowing theories from the cutting edge of astronomy in a way that everyone can understand. Fully revised and updated throughout, this new edition also contains an entire new chapter as well as more than 100 new photographs and illustrations.

Bang! Michael Rubino,2011-10-11 Bang! And that was it, the beginning of everything. So begins this beautifully illustrated, panoramic story of evolution. Author and illustrator Michael Rubino conveys not only the facts but also the excitement of the scientific explanation of our world, from the origin of the universe in the big bang to the present reality of our planet, teeming with life but threatened by overpopulation and pollution. Parents looking for an easy-to-understand guide to the scientific

worldview for their children will find the perfect source here. The formation of stars and galaxies; the origin of our solar system and planet Earth; the epochal march of life from single-celled organisms through sponges, worms, insects, fish, dinosaurs, birds, and early mammals; and the evolution of the first humans from their simian cousins—it's all here. This book is an eloquent blend of art and science that tells the most important story so far known.

Feeling responsible for what he's going through and knowing that people's lives are at stake, Jules is determined to help him figure it all out. But Sawyer's vision is so awful he can barely describe it, much less make sense of it. All he can tell her is there's a gun, and eleven ear-splitting shots. *Bang*. Jules and Sawyer have to work out the details fast, because the visions are getting worse and that means only one thing: time is running out. But every clue they see takes them down the wrong path. If they can't prevent the vision from happening, lives will be lost. And they may be among the casualties...
