Heavenly Voice Tarek Abdul Basit, Widely considered to be one of the greatest Quran reciters of the modern era, Abdul Basit Abdus Samad received the global acclaim that no other Quran reciter has received to this day. Born in 1927 in a village in Upper Egypt, he finished memorising the entire Quran by heart at the tender age of ten. He also learnt the seven styles of Quran recitation by the age of twelve and the ten styles of Quran recitation by the age of fourteen. In 1951, at the age of nineteen, he went to the capital Cairo for the first time and recited the Quran at Zaynab Mosque. It was an event where many famous Quran reciters were present. His performance was so outstanding that the crowd requested him to recite beyond his allocated ten minutes — in fact, he continued to recite for over an hour and a half. There began his journey of ascension. In the same year, he started reciting the Quran on Egyptian National Radio. Abdul Basit later went on to win three international Quran competitions in the seventies and toured the world mesmerising audiences with his breathtaking recitation. He was the founding president of the Union of Quran Reciters in Egypt. He was dubbed the “Golden Throat and the Voice of Heaven” due to his melodious style, remarkable breath control, and unique emotional and engaging tone. His legacy remains unmatched as Quran reciters across the world attempt to imitate his unique and mesmerising style. This profile charts his journey from a village in Upper Egypt to international fame and recognition.

The Global Muslim Community at a Crossroads Abdul Basit Ph.D.,2012-01-16 Tackling a subject that is as timely as it is complex, this expert work examines the turmoil inside Muslim communities, helping outsiders to understand and insiders to examine ways in which Islam can be reinterpreted for a modern world. The Global Muslim Community at a Crossroads: Understanding Religious Beliefs, Practices, and Infighting to End the Conflict is an illuminating work. Written by an eminent psychologist who was raised as a Muslim in India and now resides in the United States, it examines the core reasons for the current state of affairs in Muslim communities, explaining the psychological underpinnings of Muslim religion and practices and the reasons they can fuel violence. Drawing on the editor's exposure to Eastern and Western cultures and his longstanding interest in the study of comparative world religions, this impartial analysis takes a multidimensional approach to explaining the current plight of Muslim countries. It candidly discusses issues such as the influence of Islamic schools, the negative and positive roles of Ulema (religious scholars), a lack of critical inquiry into religious thought, Sharia, and the status of women in Islam. Finally, there are positive suggestions about a road to recovery, explaining how Muslim communities can address the interlocking problems they face while retaining the positive aspects of their beliefs.

Abu Bakr As Siddiq - The First Caliph of Islam Abdul Basit Ahmad,2001 Most people have a best friend who they favor amongs all of the people. The best friend of Prophet Muhammad was Abu Bakr As-Siddiq. He was the only person, other than the Prophet's own wife, who accepted Islam immediately and believed in Muhammad from the first movement that he announced his Prophethood. Abu Bakr always remained at the Prophet's side and he had no reservations about spending his wealth for the sake of Islam and the Muslims. The Prophet's companions all recognized his superiority, yet he always remained humble and sincere towards all. This is the story of Abu Bakr and his rise to leadership of the Muslim Ummah.--Page 4 of cover.

Rainbow in My Heart Basit Olatunji,2015-02-12 The moon comes out like a dot and emboldens one to move into a universal light with periodic renewal. Basit Olatunji's evolution with this piece has a similar metamorphosis with the moon. Perhaps, the fact that both deal with the principles of space is one reason for both to follow the same process. The colours of rainbow are said to be seven, but are they? Do we have to differentiate between blue and purple, orange and yellow? Yes, a combination of two gives birth to one and more and more. Thus, in a rainbow, colours are buried in other colours, giving birth to more colours. So the genre employed by Olatunji is the very best medium for the depth of messages carried in his rainbow heart. The tip of the tongue alone does not convey taste. It takes the depth of the palate to really savour something. This rainbow in the poet's heart has many colours: life, love, hope, and despair. Indeed, the colours are not limited to red colour of love as expressed in A Woman in Her Prime or My Ladylove Was Not So Tough or My Eternal Valentina; it also delves into deep relationship topics both positive and negative. The poems in this work, Rainbow in My Heart, are words that have set the Lonely Mind of the poet free from the untamable storms within the walls of prison of thoughts. It is a pet with colours of rainbow as patches spotting its tiger like voracious messages all over. Rainbow in My Heart will relieve readers as it does the poet of some burden of thoughts. The Postmodern Significance of Max Weber's Legacy: Disenchanted Disenchantment B. Koshul,2005-03-01 One of Max Weber's contemporaries described him as 'a child of the Enlightenment born too late' whose work is a 'vitriolic attack on religion'. Subsequent Weber scholarship has largely affirmed this valuation of Weber and characterized his scholarship as a manifestation of the very disenchantment that Weber describes. In The Postmodern Significance of Max Weber's Legacy , Basit Koshul challenges this idea by showing Weber to be a postmodern thinker far ahead of his time.

Max Weber and Charles Peirce Basit Bilal Koshul,2014-02-07 This book marks the first time that the leading European social scientist Max Weber has been brought into conversation with the leading American philosopher Charles Peirce. This conversation helps us to better understand the challenges that are facing global modernity in the 21st century and also points to creative ways to redress them.

Umar bin Al Khattab - The Second Caliph of Islam Abdul Basit Ahmad,2001 'Umar bin Khattab is one of the great Companions of the Prophet and second Caliph of Islam. He was so firm in his practice of Islam that he usually could sense what was right or wrong before the Prophet had informed others of it. He used to say to his friends: if a mule stumbles near the Euphrates River, I fear being questioned by Allah as to why I had not paved the road for it. This book sheds light on the life and struggle of the greatest example of a just ruler. We should follow his footsteps to maintain justice in every walk of our life. -- Back of book.

American Kids and the Daring Desert Expedition Abdul Basit,2023-07-23 American Kids and the Daring Desert Expedition is a captivating adventure book crafted by Abdul Basit, a distinguished author and postgraduate scholar in modern metaphysics. With a passion for exploring profound questions about existence and the world, Abdul Basit has penned numerous books on philosophy. Uthman bin Affan - The Thrid Caliph of Islam Abdul Basit Ahmad,2004 Uthman bin Affan was one of the early men who accepted Islam in Makkah. From the first moment he became a Muslim, he put all his wealth under the service of Islam. He spent most of his resources to satisfy the needs of poor Muslims. Recognizing his generosity and devotion to Islam, the Prophet told him that his place would be in Paradise on the Hereafter. He married Ruqayah the Prophet's daughter. After she died, he married her sister Um Kulthum, for that, the people at that time called him Dhun Nurain, The Man with the Two Lights.--Page 4 of cover

3D Printing of Pharmaceuticals Abdul W. Basit,Simon Gaisford,2018-08-06 3D printing is forecast to revolutionise the pharmaceutical sector, changing the face of medicine development, manufacture and use. Potential applications range from pre-clinical drug development and dosage form design through to the fabrication of functionalised implants and regenerative medicine. Within clinical pharmacy practice, printing technologies may finally lead to the concept of personalised medicines becoming a reality. This volume aims to be the definitive resource for anyone thinking of developing or using 3D printing technologies in the pharmaceutical sector, with a strong focus on the translation of printing technologies to a clinical setting. This text brings together leading experts to provide extensive information on an array of 3D printing techniques, reviewing the current printing technologies in the pharmaceutical manufacturing supply chain, in particular, highlighting the state-of-the-art applications in medicine and discussing modern drug product manufacture from a regulatory perspective. This book is a highly valuable resource for a range of demographics, including academic researchers and the pharmaceutical industry, providing a comprehensive inventory detailing the current and future applications of 3D printing in pharmaceuticals. Abdul W. Basit is Professor of Pharmaceutics at the UCL School of Pharmacy, University College London. Abdul’s research sits at the interface between pharmaceutical science and gastroenterology, forging links between basic science and clinical outcomes. He leads a large and multidisciplinary research group, and the goal of his work is to further the understanding of gastrointestinal physiology by fundamental research. So far, this knowledge has been translated into the design of new technologies and improved disease treatments, many of which are currently in late-stage clinical trials. He has published over 350 papers, book chapters and abstracts and delivered more than 250 invited research presentations. Abdul is also a serial entrepreneur and has filed 25 patents and founded 3 pharmaceutical companies (Kuecept, Intract Pharma, FabRx). Abdul is a frequent speaker at international conferences, serves as a consultant to many pharmaceutical companies and is on the advisory boards of scientific journals, healthcare organisations and charitable bodies. He is the European Editor of the International Journal of Pharmaceutics. Abdul was the recipient of the Young Investigator Award in Pharmaceutics and Pharmaceutical Technology from the American Association of Pharmaceutical Scientists (AAPS) and is the only non-North American scientist to receive this award. He was also the recipient of the Academy of Pharmaceutical Sciences (APS) award. Simon Gaisford holds a Chair in Pharmaceutics and is Head of the Department of Pharmaceutics at the UCL School of Pharmacy, University College London. He has published 110 papers, 8 book chapters and 4 authored books. His research is focused on novel technologies for manufacturing medicines, particularly using ink-jet printing and 3D printing, and he is an expert in the physico-chemical characterisation of compounds and formulations with thermal methods and calorimetry.

The War Against America Laurie Mylroie,2010-11-16 The destruction of the twin towers of the World Trade Center and the attack on the Pentagon -- all within one hour on September 11, 2001 -- demonstrated America's shocking vulnerability to terrorism. Yet terror had already emerged on America's shores eight years earlier, when the mysterious terrorist mastermind, Ramzi Yousef (arrested after a botched attempt to down a dozen U.S. airlines) bombed the World Trade Center in an attempt to fell the buildings.His attacks were viewed as the harbinger of a new terrorism, carried out by an elusive enemy driven by religious fanaticism to unprecedented hatred of the United States. But is that perception accurate? A real-life detective story, The War Against America engages the reader in a gripping examination of the evidence regarding Yousef and his terrorism. It reveals the split between New York and Washington that emerged during the investigation and tells a terrifying tale of America left exposed and vulnerable following the mishandling of what was once the most ambitious terrorist attack ever attempted on U.S. soil.

3D Printing of Pharmaceuticals and Drug Delivery Devices Dimitrios A. Lamprou,2020-07-01 The 3D printing (3DP) process was patented in 1986; however, only in the last decade has it begun to be used for medical applications, as well as in the fields of prosthetics, bio-fabrication, and pharmaceutical printing. 3DP or additive manufacturing (AM) is a family of technologies that implement layer-by-layer processes in order to fabricate physical models based on a computer aided design (CAD) model. 3D printing permits the fabrication of high degrees of complexity with great reproducibility in a fast and cost-effective fashion. 3DP technology offers a new paradigm for the direct manufacture of individual dosage forms and has the potential to allow for variations in size and geometry as well as control dose and release behavior. Furthermore, the low cost and ease of use of 3DP systems means that the possibility of manufacturing medicines and medical devices at the point of dispensing or at the point of use could become a reality. 3DP thus offers the perfect innovative manufacturing route to address the critical capability gap that hinders the widespread exploitation of personalized medicines for molecules that are currently not easy to deliver. This Special Issue will address new developments in the area of 3D printing and bioprinting for drug delivery applications, covering the recent advantages and future directions of additive manufacturing for pharmaceutical products.
