Handmade Baskets From Nature's Colourful Materials Susie Vaughan, 2014-11-24 In almost every country in the world, there is a tradition of basketmaking, using plants that are indigenous to that particular area. But today, the plastic bag and cardboard box have replaced the basket's role of years gone by. However, there is something quite irresistible about the smell and the tactile appeal of a country hedgerow basket which is not only home-made but is sometimes even home-grown. This book aims to revive interest in the traditional and useful craft of basketmaking. Susie Vaughan offers a fascinating, step-by-step description of how to make a delightful selection of strong, natural-looking and colourful baskets, mostly using materials which have been gathered from hedgerows, woods and gardens. Firstly, she covers the few tools required, then goes on to give a detailed, illustrated description of materials which can either be gathered from the annual prunings of a wide selection of bushes, or those which are farmed and can be bought from specialist suppliers. Her detailed step-by-step description of making a basket is accompanied by numerous diagrams and full-colour photographs to help explain the finer points of detail. She then explores variations in design, both of the shape of the basket and the alternative weaving patterns that can be employed to make the finished work that much more special. Finally, a superb gallery of photographs of finished baskets is included to provide you with ideas and motivation to go on to more adventurous projects.

Baskets in Polynesia Wendy Arbeit, 1990-07 An overview of baskets made throughout central Polynesia from the time of early European contact to the present, observing and comparing regional similarities and differences over the course of two hundred years.

A Measure of the Earth Nicholas R. Bell, 2013-10-01 A Measure of the Earth provides an unparalleled window into an overlooked corner of recent American history: the traditional basketry revival of the past fifty years. Steve Cole and Martha Ware amassed a remarkable collection using the most stringent guidelines: baskets made from undyed domestic materials that have been harvested by the maker. An essay by Nicholas Bell details the long-standing use of traditional fibers such as black ash and white oak, willow and sweetgrass, and the perseverance of a select few to claim these elements--the land itself--for the enrichment of daily life. As they trek through woods, fields, farm, and shore in the quest for the right ingredients for a basket, these men and women cultivate an enviable knowledge of the land. Each basket crafted from this knowledge provides not only evidence of this connection to place, but also a measure of the earth. Drawing on conversations with the basketmakers from across the country and reproducing many of their documentary photographs, Bell offers an intimate glimpse of their lifeways, motivations, and hopes. Lavish illustrations of every basket convey the humble, tactile beauty of these functional vessels.

Basket Weavers for the California Curio Trade Marvin Cohodas,2019-12-03 The peoples of northwestern California's Lower Klamath River area have long been known for their fine basketry. Two early-twentieth-century weavers of that region, Elizabeth Hickox and her daughter Louise, created especially distinctive baskets that are celebrated today for their elaboration of technique, form, and surface designs. Marvin Cohodas now explores the various forces that influenced Elizabeth Hickox, analyzing her relationship with the curio trade, and specifically with dealer Grace Nicholson, to show how those associations affected the development and marketing of baskets. He explains the techniques and patterns that Hickox created to meet the challenge of weaving design into changing three-dimensional forms. In addition to explicating the Hickoxes' basketry, Cohodas interprets its uniqueness as a form of intersocietal art, showing how Elizabeth first designed her distinctive trinket basket to convey a particular view of the curio trade and its effect on status within her community. Through its close examination of these superb practitioners of basketry, *Basket Weavers for the California Curio Trade* addresses many of today's most pressing questions in Native American art studies concerning individuality, patronage, and issues of authenticity. Graced with historic photographs and full-color plates, it reveals the challenges faced by early-twentieth-century Native weavers. Published with the assistance of The Southwest Museum, Los Angeles.

How to Make Baskets Mary White,2015-08-06 Excerpt from *How to Make Baskets: With a Chapter on What the Basket Means to the Indian* The twisting and weaving of Nature's materials, grasses, twigs, rushes and vines into useful and beautiful forms seems almost instinctive in man. Perhaps it came to him as the nest-weaving instinct comes to birds - for at first he used it as they do, in the building of his house. Later shields and boats were formed of wicker work but how long ago the first basket was made no one is wise enough to tell us. Today Indian tribes in South America weave baskets from their native palms, South African negroes use reeds and roots, while the Chinese and Japanese are wonderful workmen in this as in other

arts and industries; but basketry has come down to us more directly through the American Indian. Generations of these weavers have produced masterpieces, many of which are preserved in our museums, and the young basket maker need not go on long pilgrimages to study the old masters of his craft. Here at last, as in England, the value of manual training is being realized, and basketry is taking an important place.
