Gay and Lesbian Politics Mark Blasius,1994 An active participant in and theorist of the gay and lesbian movement, Mark Blasius contends that being gay or lesbian is by definition political. By extension, the phenomenon of a movement founded on collective identity is a quintessential part of American politics. The continually rising public consciousness of the needs and interest of gays and lesbians provides Blasius with a vehicle for showing how a particular aspect of human life comes to assume political dimensions. Upon this premise, he analyzes the process of how power is exercised through sexuality and traces the historical conditions that have made possible a gay and lesbian politics Drawing on works of political philosophy, social science, including Foucault, and gay and lesbian studies, Blasius explores the invention of a gay and lesbian ethos, through which participation, even for apolitical gays and lesbians, goes beyond a shared culture and perspective. It is a way of life more encompassing than either sexual orientation or lifestyle alone. Though he acknowledges and reflects upon the divergent range of gay and lesbian experiences, Blasius provides a framework based on theories of power, sexuality, and ethics that elaborates the significance of the movement as a whole within contemporary society. Author note: Mark Blasius, Associate Professor of Political Science at City University of New York, LaGuardia, is the co-author of *We Are Everywhere: An Historical Sourcebook in Gay and Lesbian Politics*.

A List of the Birds of Europe Johann Heinrich Blasius,1862

The Mockingbird Came Piping . . . Bruce Blasius,2018-02-02 Have you ever been influenced strongly by a certain experience in your life? The inspiration for my poetry originated when I personally met Robert Frost in 1962 during a groundbreaking ceremony of Robert Frost Hall at Windham College in Putney, Vermont, where I was a student. At that point, he was in his eighties and was good friends with Dr. Walter Hendricks, who was the founder and president of Windham College. I was the shovel bearer for the groundbreaking ceremony and had helped clear the land for the new campus. Prior to that time, Dr. Frost used to come to the student cafeteria at Windham College and recite his poems during lunch, which were always memorable occasions for me. My poetry has been influenced not only by this great poet but also by Gods amazing creations, natures wonder, and personal reflections while doing simple things like walking in the woods on a snowy evening, remembering the people whose paths have crossed mine at some point or another, or having nonsensical musings on ordinary items, such as a pepper grinder: Turning the handle, Round and round, Hearing the crushing, Of the peppercorn sound. The handle comes toward me, Away then it leaves, Arm outstretched, To the center it cleaves. Grindings its business, All shredded to bits, Shakins on the viands, This title, it fits.

The Music Theory of Godfrey Winham Leslie David Blasius,2014-07-14 This book serves as an introduction to the work of Godfrey Winham, an influential figure in American music theory circles in the 1960s. Little published in his lifetime, Winham left behind, at his premature death in 1974, a massive collection of notes: correspondence, unfinished articles, sketches for books, etc. These notes were transcribed and deposited in the Special Collections of Firestone Library at Princeton University. They cover a fascinating range of subjects: exercises in analytical logic, thoughts on the construction of a formally consistent music theory, studies of particular pieces, and an epistemological reconception of Schenker's analysis. In *The Music Theory of Godfrey Winham*, Leslie David Blasius attempts to synthesize the various aspects of the theorist's thinking into a single coherent, if unfinished, endeavor. Blasius concentrates in particular on Winham's attempts to define formally the basic terms of music theory, his axiomatic phenomenology of pitch and harmonic relations, his tentative steps towards an axiomatic phenomenology of rhythm, and his fresh consideration of the reciprocal relationship between theory and analysis. In so doing, Blasius gives a clear picture of the materials in the archives, particularly when they exhibit Winham's multiple attempts to come to terms with a specific problem. The volume includes a set of complete excerpts of materials cited in Blasius's text and an index for the entire collection. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Assessing the Quality of Survey Data Jörg Blasius,Victor Thiessen,2012-02-21 This is a book for any researcher using any kind of survey data. It introduces the latest methods of assessing the quality and validity of such data by providing new ways of interpreting variation and measuring error. By practically and accessibly demonstrating these techniques, especially those derived from Multiple Correspondence Analysis, the authors develop screening procedures to search for variation in observed responses that do not correspond with actual differences between respondents. Using well-known international data sets, the authors exemplify how to detect all manner of non-substantive variation having sources such as a variety of response styles including acquiescence, respondents' failure to understand questions, inadequate field work standards, interview fatigue, and even the manufacture of (partly) faked interviews.

Exoticism in English Tag Questions Blasius Achiri-Taboh,2020-10-15 For the last 400 years, since the birth of the Stuart Dynasty in England with James VI in the early 17th century, when the contraction of negative forms of the English sentence began in earnest, (canonical) tag questions have been a great fascination to many users of English. Within the last sixty years, beginning with the birth of the generative paradigm, tag questions have equally been of particular interest to many scholars of linguistics from a variety of perspectives, especially those concerned with the syntax-semantics and socio-pragmatics of the English sentence. With the spread of

English to other countries and the emergence of new Englishes in the post-colonial context of the non-native varieties spoken in former British colonies, it is particularly interesting to see how and why tag questions have evolved over time in daily usage in both form and function in different English speech communities around the world. The essays gathered here focus on this evolutionary trend of English tag questions, with special attention on the exoticisms that characterize current usage.

Sexual Identities, Queer Politics Mark Blasius,2021-02-09 In this collection, political and public policy analysts explore the social concerns of lesbians, gays, bisexuals, and the transgendered--what has come to be known as lgbt or queer politics. Compared to the humanities and to other social sciences, political science has been slow to address this phenomenon. Issues ranging from housing to adoption to laws on sodomy, however, have increasingly raised important political questions about the rights and status of sexual minorities, particularly within liberal democracies such as the United States, and also on an international level. This anthology offers the first comprehensive overview of the study of lgbt politics in political science across the discipline's main subfields and methodologies, and it spotlights lgbt movements in several regions around the world. Focusing on the politics of sexuality with regard to the politics of knowledge, the book presents a discussion of power that will interest all political scientists and others concerned with minority rights and gender as well as with transformation in the relations between public and private. The articles cover such topics as lgbt power in urban politics, the impact of public opinion on lgbt life, means of effecting legal and political change in the United States, and international differences in lgbt political activism. The authors represent a new cadre of political scientists who are creating an interdisciplinary domain of research that is informed by and in turn generates political activism. They are Dennis Altman, M. V. Lee Badgett, Robert W. Bailey, Mark Blasius, Cathy J. Cohen, Timothy E. Cook, Paisley Currah, Juanita Díaz-Cotto, Jan-Willem Duyvendak, Leonard Harris, Bevin Hartnett, Rosalind Pollack Petchesky, David Rayside, Rebecca Mae Salokar, and Alan S. Yang.
