Bomb (Graphic Novel) Steve Sheinkin, 2023-01-24 A riveting graphic novel adaptation of the award-winning nonfiction book, *Bomb*—the fascinating and frightening true story of the creation behind the most destructive force that birthed the arms race and the Cold War. In December of 1938, a chemist in a German laboratory made a shocking discovery: When placed next to radioactive material, a Uranium atom split in two. That simple discovery launched a scientific race that spanned three continents. In Great Britain and the United States, Soviet spies worked their way into the scientific community; in Norway, a commando force slipped behind enemy lines to attack German heavy-water manufacturing; and deep in the desert, one brilliant group of scientists was hidden away at a remote site at Los Alamos. This is the story of the plotting, the risk-taking, the deceit, and genius that created the world's most formidable weapon. This is the story of the atomic bomb. New York Times bestselling author Steve Sheinkin's award-winning nonfiction book is now available reimaged in the graphic novel format. Full color illustrations from Nick Bertozzi are detailed and enriched with the nonfiction expertise Nick brings to the story as a beloved artist, comic book writer, and commercial illustrator who has written a couple of his own historical graphic novels, including *Shackleton* and *Lewis & Clark*. Accessible, gripping, and educational, this new edition of *Bomb* is perfect for young readers and adults alike. Praise for *Bomb* (2012): "This superb and exciting work of nonfiction would be a fine tonic for any jaded adolescent who thinks history is 'boring.' It's also an excellent primer for adult readers who may have forgotten, or never learned, the remarkable story of how nuclear weaponry was first imagined, invented and deployed—and of how an international arms race

began well before there was such a thing as an atomic bomb.” —The Wall Street Journal “This is edge-of-the seat material that will resonate with YAs who clamor for true spy stories, and it will undoubtedly engross a cross-market audience of adults who dozed through the World War II unit in high school.” —The Bulletin (starred review) Also by Steve Sheinkin: *Fallout: Spies, Superbombs, and the Ultimate Cold War Showdown* *The Port Chicago 50: Disaster, Mutiny, and the Fight for Civil Rights* *Undeclared: Jim Thorpe and the Carlisle Indian School Football Team* *Most Dangerous: Daniel Ellsberg and the Secret History of the Vietnam War* *Born to Fly: The First Women's Air Race Across America* *The Notorious Benedict Arnold: A True Story of Adventure, Heroism & Treachery* *Which Way to the Wild West?: Everything Your Schoolbooks Didn't Tell You About Westward Expansion* *King George: What Was His Problem?: Everything Your Schoolbooks Didn't Tell You About the American Revolution* *Two Miserable Presidents: Everything Your Schoolbooks Didn't Tell You About the Civil War*

Bomb, Book and Compass Simon Winchester, 2008-09-25 Before fate intervened, Joseph Needham was a distinguished biochemist at Cambridge University, married to a fellow scientist. In 1937 he was asked to supervise a young Chinese student named Lu Gwei-Djen, and in that moment began the two greatest love affairs of his life - Miss Lu, and China. Miss Lu inspired Needham to travel to China where he initially spent three dangerous years as a wartime diplomat. He established himself as the pre-eminent China scholar of all time, firm in his belief that China would one day achieve world prominence. By the end of his life, Needham had become a truly global figure, travelling endlessly and honoured by all - though banned from America because of his politics. And in 1989, after a fifty-two year affair, he finally married the woman

who had first inspired his passion. *The Magnificent Barbarian* is Simon Winchester at his best - at once a magnificent portrait of one man's remarkable life and a riveting exploration of the country that so engaged him.

Israel and the Bomb Avner Cohen, 1999 In the first detailed account of Israel's nuclear record, Cohen forges an interpretive political history, drawing on thousands of American and Israeli once-classified documents.

The Bomb Frank Harris, 1963 First published in 1908, and last reprinted in 1962, this is a fictionalised account of the story of Rudolph Schnaubelt, the bomber who was never apprehended for the crime of killing seven policeman during a labour protest in Chicago in 1886. Complete with classic linocuts of the bombing, this edition contains the full text of the novel by the notorious author whose 'My Life and Loves' caused a considerable scandal when first published.

The Bomb Howard Zinn, 2010-08-01 As a World War II combat soldier, Howard Zinn took part in the aerial bombing of Royan, France. Two decades later, he was invited to visit Hiroshima and meet survivors of the atomic attack. In this short and powerful book, Zinn offers his deep personal reflections and political analysis of these events, their consequences, and the profound influence they had in transforming him from an order-taking combat soldier to one of our greatest anti-authoritarian, antiwar historians. This book was finalized just prior to Zinn's passing in January 2010, and is published on the sixty-fifth anniversary of the bombing of Hiroshima. Simultaneous publication this August in the U.S. and Japan commemorates the 65th anniversary of the USA's two atomic bombings of Japan by calling for the abolition of all nuclear

weapons and an end to war as an acceptable solution to human conflict. Zinn writes with an enthusiasm rarely encountered in the leaden prose of academic history...—New York Times Book Review This collection of essays is a great book for anybody who wants to be better informed about history, regardless of their political point of view.—O, The Oprah Magazine Zinn collects here almost three dozen brief, passionate essays...Readers seeking to break out of their ideological comfort zones will find much to ponder here.—Publishers Weekly A bomb is highly impersonal. The dropper can kill hundreds, and never see any of them. The Bomb is the memoir of Howard Zinn, a bomber in World War II who dropped bombs along the French countryside while campaigning against Germany. After learning of Hiroshima and Nagasaki, Zinn now speaks out against the use of bombs and what it can do to warfare. Thoughtful and full of stories of an old soldier who regrets what he has done, The Bomb is a fine posthumous release that shares much of the lost wisdom of World War II.—James A. Cox, The Midwest Book Review Throughout his academic career, his popular writings and work as an activist Zinn consistently, and often successfully, threw a wrench in the works of the US war machine. He may be gone, but through his powerful and passionate body of work—of which The Bomb is an excellent introduction—thousands of others will be educated and inspired to work for a more humane and peaceful world.—Ian Sinclair, Morning Star The path that Howard Zinn walked—from bombardier to activist—gives hope that each of us can move from clinical detachment to ardent commitment, from violence to nonviolence.—Frida Berrigan, WIN Magazine Howard Zinn (1922–2010) was raised in a working-class family in Brooklyn, and flew bombing missions for the United States in World War II, an experience he now points to in shaping his opposition to war. Under the GI Bill he

went to college and received his Ph.D. from Columbia University. In 1956, he became a professor at Spelman College in Atlanta, a school for black women, where he soon became involved in the civil rights movement, which he participated in as an adviser to the Student Nonviolent Coordinating Committee (SNCC) and chronicled, in his book SNCC: The New Abolitionists. Zinn collaborated with historian Staughton Lynd and mentored a young student named Alice Walker. When he was fired in 1963 for insubordination related to his protest work, he moved to Boston University, where he became a leading critic of the Vietnam War. In his lifetime, Zinn received the Thomas Merton Award, the Eugene V. Debs Award, the Upton Sinclair Award, and the Lannan Literary Award. He is perhaps best known for *A People's History of the United States*. CityLights Booksellers and Publishers previously published his essay collection *A Power Governments Cannot Suppress*.

Brotherhood of the Bomb Gregg Herken, 2013-08-13 Gregg Herken's *Brotherhood of the Bomb* is the fascinating story of the men who founded the nuclear age, fully told for the first time. The story of the twentieth century is largely the story of the power of science and technology. Within that story is the incredible tale of the human conflict between Robert Oppenheimer, Ernest Lawrence, and Edward Teller—the scientists most responsible for the advent of weapons of mass destruction. How did science—and its practitioners—enlisted in the service of the state during the Second World War, become a slave to its patron during the Cold War? The story of these three men, builders of the bombs, is fundamentally about loyalty—to country, to science, and to each other—and about the wrenching choices that had to be made when these allegiances came into conflict. Gregg Herken gives us the behind-the-scenes account based upon a decade of

research, interviews, and newly released Freedom of Information Act and Russian documents.

Brotherhood of the Bomb is a vital slice of American history told authoritatively-and grippingly-for the first time.

Fu-go Ross Coen, 2014-11-01 Near the end of World War II, in an attempt to attack the United States mainland, Japan launched its fu-go campaign, deploying thousands of high-altitude hydrogen balloons armed with incendiary and high-explosive bombs designed to follow the westerly winds of the upper atmosphere and drift to the west coast of North America. After reaching the mainland, these fu-go, the Japanese hoped, would terrorize American citizens and ignite devastating forest fires across the western states, ultimately causing the United States to divert wartime resources to deal with the domestic crisis. While the fu-go offensive proved to be a complete tactical failure, six Americans lost their lives when a discovered balloon exploded. Ross Coen provides a fascinating look into the obscure history of the fu-go campaign, from the Japanese schoolgirls who manufactured the balloons by hand to the generals in the U.S. War Department who developed defense procedures. The book delves into panic, propaganda, and media censorship in wartime. Fu-go is a compelling story of a little-known episode in our national history that unfolded virtually unseen.

Super Bomb Ken Young, Warner R. Schilling, 2020-02-15 Super Bomb unveils the story of the events leading up to President Harry S. Truman's 1950 decision to develop a super, or hydrogen, bomb. That fateful decision and its immediate consequences are detailed in a diverse and complete account built on newly released archives and previously hidden contemporaneous interviews with more than sixty political, military, and scientific figures who were involved in the decision. Ken Young and Warner R.

Schilling present the expectations, hopes, and fears of the key individuals who lobbied for and against developing the H-bomb. They portray the conflicts that arose over the H-bomb as rooted in the distinct interests of the Atomic Energy Commission, the Los Alamos laboratory, the Pentagon and State Department, the Congress, and the White House. But as they clearly show, once Truman made his decision in 1950, resistance to the H-bomb opportunistically shifted to new debates about the development of tactical nuclear weapons, continental air defense, and other aspects of nuclear weapons policy. What Super Bomb reveals is that in many ways the H-bomb struggle was a proxy battle over the morality and effectiveness of strategic bombardment and the role and doctrine of the US Strategic Air Command.

Time Bomb Joelle Charbonneau,2018 Seven students trapped in their school after a bomb goes off must fight to survive while also discovering who among them is the bomber in this provocative new thriller from the author of the New York Times bestselling Testing Trilogy. Perfect for fans of This Is Where It Ends. A congressman's daughter who has to be perfect. A star quarterback with a secret. A guy who's tired of being ignored. When they hear that someone inside is the bomber, they'll also be looking to one another for answers. The Bomb Beatrice Heuser, 2014-09-25 This tightly argued and profoundly thought provoking book tackles a huge subject: the coming of the nuclear age with bombing of Hiroshima and Nagasaki in August 1945, and the ways in which it has changed our lives since. Dr Heuser sets these events in their historical context and tackles key issues about the effect of nuclear weapons on modern attitudes to conflict, and on the ethics of warfare. Ducking nothing, she demystifies the subject, seeing 'the bomb' not as something unique and paralysing, but as an integral part of the strategic and moral context of our time. For a wide multidisciplinary and general readership.

The Bomb Frank Harris, 1963 Over 100 years ago the infamous Haymarket affair in Chicago pierced the world with news of what would now be characterized as terrorist violence. In the Haymarket incident, a bomb killed police gathered to club and maul labor protesters. And although the police could not find the man who threw the bomb, labor and anarchist leaders were found guilty in a notoriously ugly trial, and several were actually hanged. Frank Harris' novel comes from the point-of-view of the uncaught bomb-thrower, a German immigrant in love with the extreme political tactics of the notorious anarchist Louis Lingg.

The Bomb Fred Kaplan, 2020-01-28 From the author of the classic *The Wizards of Armageddon* and Pulitzer Prize finalist comes the definitive history of American policy on nuclear war—and Presidents’ actions in nuclear crises—from Truman to Trump. Fred Kaplan, hailed by *The New York Times* as “a rare combination of defense intellectual and pugnacious reporter,” takes us into the White House Situation Room, the Joint Chiefs of Staff’s “Tank” in the Pentagon, and the vast chambers of Strategic Command to bring us the untold stories—based on exclusive interviews and previously classified documents—of how America’s presidents and generals have thought about, threatened, broached, and just barely avoided nuclear war from the dawn of the atomic age until today. Kaplan’s historical research and deep reporting will stand as the permanent record of politics. Discussing theories that have dominated nightmare scenarios from Hiroshima and Nagasaki, Kaplan presents the unthinkable in terms of mass destruction and demonstrates how the nuclear war reality will not go away, regardless of the dire consequences.

The Housing Bomb M. Nils Peterson, Tarla Peterson, Jianguo Liu, 2013-10-29 How our thirst for more and larger houses is undermining society and what we can do about it. Have we built our way to ruin? Is your desire for that beach house or cabin in the woods part of the environmental crisis? Do you really need a bigger home? Why don’t multiple generations still live under one roof? In *The Housing Bomb*, leading environmental researchers M. Nils Peterson, Tarla Rai Peterson, and Jianguo Liu sound the alarm, explaining how and why our growing addiction to houses has taken the humble American dream and twisted it into an environmental and societal nightmare. Without realizing how much a contemporary home already contributes to environmental destruction, most of us want bigger and bigger houses and

dream of the day when we own not just one dwelling but at least the two our neighbor does. We push our children to get out on their own long before they need to, creating a second household where previously one existed. We pave and build, demolishing habitat needed by threatened and endangered species, adding to the mounting burden of global climate change, and sucking away resources much better applied to pressing societal needs. “Reduce, reuse, recycle” is seldom evoked in the housing world, where economists predict financial disasters when new housing starts decline and the idea of renovating inner city residences is regarded as merely a good cause. Presenting irrefutable evidence, this book cries out for America and the world to intervene by making simple changes in our household energy and water usage and by supporting municipal, state, national, and international policies to counter this devastation and overuse of resources. It offers a way out of the mess we are creating and envisions a future where we all live comfortable, nondestructive lives. The “housing bomb” is ticking, and our choice is clear—change our approach or feel the blast.

The Bomb: The Classic Anarchist Novel Frank Harris, 2019-12-31 In this classic novel of revolutionary struggle, seven men are accused of throwing a bomb during a protest and killing policemen. Only one is guilty. Author Frank Harris, inspired by the true-life events of the Haymarket Riot in Chicago, offers a scathing criticism of capitalism and the inequalities of the American justice system in this novel that continues to inspire those involved in the movement to smash the hierarchical structure of the state, ending oppression for all time. The Bomb is a searing, radical portrait, a window into past events that provides insight into the current cultural strife.
