Bubble Stewart Foster,2017-05-02 Originally published in 2016 in Great Britain as The bubble boy.

The Unbelievable Bubble Book John Cassidy,David Stein,1989 Explains how soap bubbles are formed and what can be done with them.

The Filter Bubble Eli Pariser,2011-05-12 An eye-opening account of how the hidden rise of personalization on the Internet is controlling-and limiting-the information we consume. In December 2009, Google began customizing its search results for each user. Instead of giving you the most broadly popular result, Google now tries to predict what you are most likely to click on. According to MoveOn.org board president Eli Pariser, Google's change in policy is symptomatic of the most significant shift to take place on the Web in recent years-the rise of personalization. In this groundbreaking investigation of the new hidden Web, Pariser uncovers how this growing trend threatens to control how we consume and share information as a society-and reveals what we can do about it. Though the phenomenon has gone largely undetected until now, personalized filters are sweeping the Web, creating individual universes of information for each of us. Facebook-the primary news source for an increasing number of Americans-prioritizes the links it believes will appeal to you so that if you are a liberal, you can expect to see only progressive links. Even an old-media bastion like The Washington Post devotes the top of its home page to a news feed with the links your Facebook friends are sharing. Behind the scenes a burgeoning industry of data companies is tracking your personal information to sell to advertisers, from your political leanings to the color you painted your living room to the hiking boots you just browsed on Zappos. In a personalized world, we will increasingly be typed and fed only news that is pleasant, familiar, and confirms our beliefs-and because these filters are invisible, we won't know what is being hidden from us. Our past interests will determine what we are exposed to in the future, leaving less room for the unexpected encounters that spark creativity, innovation, and the democratic exchange of ideas. While we all worry that the Internet is eroding privacy or shrinking our attention spans, Pariser uncovers a more pernicious and far-reaching trend on the Internet and shows how we can-and must-change course. With vivid detail and remarkable scope, The Filter Bubble reveals how personalization undermines the Internet's original purpose as an open platform for the spread of ideas and could leave us all in an isolated, echoing world.

A Bubble Geneviève Castrée,2018-06-26 Cover title.

False Profits Dean Baker,2011-01-15 Dean Baker, codirector of the Center for Economic and Policy Research recounts the strategies used by the country's top economic policymakers to conceal their failure to recognize the housing bubble or take steps to rein it in before it grew to unprecedented levels, resulting in the loss of millions of jobs, homes, and the life savings of tens of millions of people. He quashes dire warnings of looming rampant inflation and spiraling debt with solid historic evidence to the contrary-evidence that supports more stimulus, not less. With a dose of optimism, Baker outlines a thoughtful progressive program for rebuilding the economy and reshaping the financial system, including new financial transaction taxes that will reduce or eliminate economic waste while providing stimulus and incentives where and when they are most needed.

Bubble Trouble Nat Gabriel,2004 Grace can make soap bubbles, milk bubbles, and even air bubbles (by burping) but cannot be a member of her big sister's bubble gum club until she acquires a certain skill. Includes a science activity page.

Pop! Meghan McCarthy,2011-04-05 Gum. It's been around for centuries-from the ancient Greeks to the American Indians, everyone's chewed it. But the best kind of gum-bubble gum!-wasn't invented until 1928, when an enterprising young accountant at Fler Gum and Candy used his spare time to experiment with different recipes. Bubble-blowing kids everywhere will be delighted with Megan McCarthy's entertaining pictures and engaging fun facts as they learn the history behind the pink perfection of Dubble Bubble.

From Bubble to Bridge Marion H. Larson,Sara L. H. Shady,2016-12-13 Understanding our religious neighbors is more important than ever-but also more challenging. In a world of deep religious strife and increasing pluralism it can seem safer to remain inside the bubble of our faith community. Christian college campuses in particular provide a strong social bubble that reinforces one's faith identity in distinction from the wider society. Many Christians worry that engaging in interfaith dialogue will require watering down their faith and accepting other religions as equally true. Bethel University professors Marion Larson and Sara Shady not only make the case that we can love our religious neighbors without diluting our commitment, but also offer practical wisdom and ideas for turning our faith bubbles into bridges of religious inclusion and interfaith engagement. Drawing on the parables of Jesus, research on interreligious dialogue, and their own classroom experience, Larson and Shady provide readers with the tools they need to move beyond the bubble. Interfaith dialogue is difficult, and From Bubble to Bridge is the timely guide we have been waiting for.

The Boom and the Bubble Robert Brenner,2003-11-17 Brenner demonstrates that the new economy was always a fragile phenomenon.

Structure of the World Compared to a Bubble Anne Waldman,2004 The Stupa of Borobudur in Java is one of the architectural wonders of the world, designed as both a mandala and as an aid for the Buddhist pilgrim that can be read as a holy book. It has inspired Anne Waldman to create a work which is at once a walking meditation, a ?cultural intervention,? a ?recovery? of a sacred site, and a take on contemporary reality and how the busy ?monkey brain? (as it is called in Buddhism) works and travels. Exploratory and meditative, even playful at times, it expands the sense of invocation and incantation that Waldman is celebrated for, while also reflecting an engaged political/cultural awareness.

From Boom to Bubble Rachel Weber,2015-11-20 How does a building boom happen? Who inflates a real-estate bubble and why? What causes companies to move from seemingly usable office space into new quarters only blocks away? Rachel Weber digs into these questions and more in her detailed analysis of Chicago's downtown development during the Millennial Boom (1998-2008). Weber shows what happens when the real estate industry, financial markets, and public planning all operate at warp speed to build new structures and destroy older ones. She draws on years of interviews with real estate actors across the country, participant observation in a secretive sector, analyses of financial and development data, as well as the history of the appraisal, brokerage, and real estate finance professions. As a result, Weber's book is an unprecedented historical, sociological, and geographic look at how markets and urban change actually happen.
