The Filter Bubble Eli Pariser, 2011-05-12 An eye-opening account of how the hidden rise of personalization on the Internet is controlling-and limiting-the information we consume. In December 2009, Google began customizing its search results for each user. Instead of giving you the most broadly popular result, Google now tries to predict what you are most likely to click on. According to MoveOn.org board president Eli Pariser, Google's change in policy is symptomatic of the most significant shift to take place on the Web in recent years-the rise of personalization. In this groundbreaking investigation of the new hidden Web, Pariser uncovers how this growing trend threatens to control how we consume and share information as a society-and reveals what we can do about it. Though the phenomenon has gone largely undetected until now, personalized filters are sweeping the Web, creating individual universes of information for each of us. Facebook-the primary news source for an increasing number of Americans-prioritizes the links it believes will appeal to you so that if you are a liberal, you can expect to see only progressive links. Even an old-media bastion like The Washington Post devotes the top of its home page to a news feed with the links your Facebook friends are sharing. Behind the scenes a burgeoning industry of data companies is tracking your personal information to sell to advertisers, from your political leanings to the color you painted your living room to the hiking boots you just browsed on Zappos. In a personalized world, we will increasingly be typed and fed only news that is pleasant, familiar, and confirms our beliefs-and because these filters are invisible, we won't know what is being hidden from us. Our past interests will determine what we are exposed to in the future, leaving less room for the unexpected encounters that spark creativity, innovation, and the democratic exchange of ideas. While we all worry that the Internet is eroding privacy or shrinking our attention spans, Pariser uncovers a more pernicious and far-reaching trend on the Internet and shows how we can- and must-change course. With vivid detail and remarkable scope, The Filter Bubble reveals how personalization undermines the Internet's original purpose as an open platform for the spread of ideas and could leave us all in an isolated, echoing world.

Bubble in the Sun Christopher Knowlton, 2021-01-12 Christopher Knowlton, author of *Cattle Kingdom* and former *Fortune* writer, takes an in-depth look at the spectacular Florida land boom of the 1920s and shows how it led directly to the Great Depression. The 1920s in Florida was a time of incredible excess, immense wealth, and precipitous collapse. The decade there produced the largest human migration in American history, far exceeding the settlement of the West, as millions flocked to the grand hotels and the new cities that rose rapidly from the teeming wetlands. The boom spawned a new subdivision civilization—and the most egregious large-scale assault on the environment in the name of “progress.” Nowhere was the glitz and froth of the Roaring Twenties more excessive than in Florida. Here was Vegas before there was a Vegas: gambling was condoned and so was drinking, since prohibition was not enforced. Tycoons, crooks, and celebrities arrived en masse to promote or exploit this new and dazzling American frontier in the sunshine. Yet, the import and deep impact of these historical events have never been explored thoroughly until now. In *Bubble in the Sun* Christopher Knowlton examines the grand artistic and entrepreneurial visions behind Coral Gables, Boca Raton, Miami Beach, and other storied sites, as well as the darker side of the frenzy. For while giant fortunes were being made and lost and the nightlife raged more raucously than anywhere else, the pure beauty of the Everglades suffered wanton ruination and the workers, mostly black, who built and maintained the boom, endured grievous abuses. Knowlton breathes dynamic life into the forces that made and wrecked Florida during the decade: the real estate moguls Carl Fisher, George Merrick, and Addison Mizner, and the once-in-a-century hurricane whose aftermath triggered the stock market crash. This essential account is a revelatory—and riveting—history of an era that still affects our country today.

**The Higher Education Bubble** Glenn H. Reynolds, 2012 America is facing a higher education bubble. Like the housing bubble, it is the product of cheap credit coupled with popular expectations of ever-increasing returns on investment, and as with housing prices, the cheap credit has caused college tuitions to vastly outpace inflation and family incomes. Now this bubble is bursting. In this *Broadside*, Glenn H. Reynolds explains the causes and effects of this bubble and the steps colleges and universities must take to ensure their survival. Many graduates are unable to secure employment sufficient to pay off their loans, which are usually not dischargeable in bankruptcy. As students become less willing to incur debt for education, colleges and universities will have to adapt to a new world of cost pressures and declining public support.

**Trickster's Bubble Trouble** Michael Dahl, 2011-07 The crazy TRICKSTER traps FLASH inside a giant bubble, and his oxygen is running out!

*Blankie (A Narwhal and Jelly Board Book)* Ben Clanton, 2021-02-02 An original board book featuring the bestselling Narwhal and Jelly! Everyone's favorite underwater duo explore bubbles in the world wide waters in this silly story perfect for the youngest readers and fans. Hilarious and charming. The most lovable duo since Frog and Toad. --NYT-bestselling creator of the Dog Man and Captain Underpants series, Dav Pilkey Dive into a brand new Narwhal and Jelly story for the youngest readers! When Narwhal accidentally

bursts Jelly's bubble with their tusk-tooth, Jelly is a little sad . . . until Narwhal shows him that there are lots of bubbles in the ocean! There are little-bitty bubbles and great big bubbles. There are bubbles up high and bubbles down low. There are bubbles that are pink and bubbles that stink. It's unbelieva-bubble! This charming board book celebrates the power of imagination and play, and is perfect for both fans of the Narwhal and Jelly graphic novel series and readers new to the world wide waters.

**Bubble** Jordan Morris, Sarah Morgan, 2021-07-13 Based on the smash-hit audio serial, *Bubble* is a hilarious high-energy graphic novel with a satirical take on the “gig economy.” Built and maintained by corporate benevolence, the city of Fairhaven is a literal bubble of safety and order (and amazing coffee) in the midst of the Brush, a harsh alien wilderness ruled by monstrous Imps and rogue bands of humans. Humans like Morgan, who’s Brush-born and Bubble-raised and fully capable of fending off an Imp attack during her morning jog. She’s got a great routine going—she has a chill day job, she recreationally kills the occasional Imp, then she takes that Imp home for her roommate and BFF, Annie, to transform into drugs as a side hustle. But cracks appear in her tidy life when one of those Imps nearly murders a delivery guy in her apartment, accidentally transforming him into a Brush-powered mutant in the process. And when Morgan’s company launches Huntr, a gig economy app for Imp extermination, she finds herself press-ganged into kicking her stabby side job up to the next level as she battles a parade of monsters and monstrously Brush-turned citizens, from a living hipster beard to a book club hive mind.

**False Profits** Dean Baker, 2011-01-15 Dean Baker, codirector of the Center for Economic and Policy Research recounts the strategies used by the country’s top economic policymakers to conceal their failure to recognize the housing bubble or take steps to rein it in before it grew to unprecedented levels, resulting in the loss of millions of jobs, homes, and the life savings of tens of millions of people. He quashes dire warnings of looming rampant inflation and spiraling debt with solid historic evidence to the contrary—evidence that supports more stimulus, not less. With a dose of optimism, Baker outlines a thoughtful progressive program for rebuilding the economy and reshaping the financial system, including new financial transaction taxes that will reduce or eliminate economic waste while providing stimulus and incentives where and when they are most needed.

*In the Bubble* John Thackara, 2006-02-17 How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, *In the Bubble: Designing for a Complex World*. These are tough questions for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if tech ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're unleashing upon the world. We need to ask what impact all this stuff will have on our daily lives. Who will look after it, and how? *In the Bubble* is about a world based less on stuff and more on people. Thackara describes a transformation that is taking place now—not in a remote science fiction future; it's not about, as he puts it, the schlock of the new but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. *In the Bubble* describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are

designed and used. At the heart of In the Bubble is a belief, informed by a wealth of real-world examples, that ethics and responsibility can inform design decisions without impeding social and technical innovation.

**Tom Noddy's Bubble Magic** Tom Noddy,1988 Explains how to create elegant bubble forms and perform other tricks and activities involving bubbles.

When Posey spots the quarter vending machines with plastic bubbles filled with tiny toys at Daisy's local store, he tries to talk to them. But when they don't answer, Daisy explains that the bubbles are just toys in the real world. So Posey invites Daisy to the World of Make-Believe, where, of course, there's an entire world inside of those machines! Bubble creatures happily live in their plastic capsules, but it turns out there's a tiny problem. A giant has been "borrowing" those bubble friends!
