*The House That She Built* Mollie Elkman,2021-09 The House That She Built is inspired by and dedicated to the REAL women behind the home built exclusively by a team of women in construction, skilled tradeswomen, and women-owned companies. The House That She Built educates young readers about the people and skills that go into building a home. One by one, children learn about the architect, framer, roofer and many more as they contribute their individual skills needed to complete the collective project -- a new home. With illustrations that connect and empower and words that build upon each other with each page, this book will leave all kids (she, he, and they) excited about their own skills and interested in learning new ones.

**Built** Roma Agrawal,2018-02-13 Winner of the AAAS/Subaru SB&F Prize for Excellence in Science Books The wonders of engineering revealed--by the inspirational female engineer behind the Shard, Western Europe's tallest building. While our cities are full of incredible engineering feats, most of us live with little idea of what goes into creating the built environment, let alone how a new building goes up, what it is constructed upon, or how it remains standing. In Built, star structural engineer Roma Agrawal explains how construction has evolved from the mud huts of our ancestors to skyscrapers of steel that reach into the sky. She unearths how humans have tunneled through solid mountains; how we've walked across the widest of rivers, and tamed nature's precious water resources. She tells vivid tales of the visionaries who created the groundbreaking materials used to build the Pantheon and the Eiffel Tower; and explains how careful engineering can minimize tragedies like the collapse of the Quebec Bridge. Interweaving science, history, illustrations, and personal stories, Built offers a fascinating window into a subject that makes up the foundation of our everyday lives.

How a House Is Built (New & Updated) Gail Gibbons,2020-03-27 Houses are built with many different materials, and in many shapes and sizes. Step by step, this picture book explains how homes are built—from the architect's plans through the arrival of a happy family. The many processes of construction are explained with simple language and bright, clear illustrations, perfect for kids starting to wonder about how the world around them works. Many different careers—including carpenters, plumbers, electricians, and landscapers—are introduced, each doing their part to bring the picture wood-frame house to life. A great read for kids who love construction sites, or who can't get enough of Building a House by Byron Barton. According to The Washington Post, Gail Gibbons has taught more preschoolers and early readers about the world than any other children's writer-illustrator. Ms. Gibbons is the author of more than 100 books for young readers, including the bestselling titles From Seed to Plant and Monarch Butterfly. Her many honors include the Washington Post/Childrens Book Fuild Nonfiction Award and the NSTA Outstanding Science Trade Book Award.

**Bunny Built** Michael Slack,2018-04-24 A construction bunny learns a creative lesson in sharing and friendship when he meets the biggest carrot of his life. LaRue was very handy. His toolbox had everything and industrious bunny could ever need. Everything, that is, except carrots. But then LaRue stumbles onto a special seed. With proper tending, this seed quickly grows into an ENORMOUS CARROT! What's a bunny to do with so much carrot? In a stroke of construction genius (and generosity), LaRue has the answer. This clever story celebrates just what it means to be a friend. Christy Ottaviano Books

**How Was That Built?** Roma Agrawal,2022-08-16 This striking book explains the feats of engineering behind the world's most impressive architectural marvels. From skyscrapers that reach astonishing heights to bridges that span deep and wide rivers, the world is filled with awe-inspiring structures. But how do they work? Meet the extraordinary people who challenged our beliefs about what's possible, pioneering remarkable inventions that helped build the Brooklyn Bridge in the US, the Pantheon in Italy, the Burj Khalifa in Dubai, the Shard in England and the Sapporo Dome in Japan. Discover the ingenious methods engineers have come up with to enable us to build underground, underwater, on ice, and even in space. With text written by award-winning structural engineer Roma Agrawal and detailed full-color illustrations by Katie Hickey, this book provides unique and illuminating perspectives of the world's most incredible constructions. How Was That Built? is a perfect gift for curious kids who want to learn more about construction, architecture, science, technology, and the way things work. This children's picture book also serves as a fascinating companion to the author's adult nonfiction book Built: The Hidden Stories Behind our Structures, winner of the AAAS/Subaru SB&F Prize for Excellence in Science Books.

**Built Unbuilt** Julien De Smedt,2017-09-04 Built Unbuilt revisits 16 years of Julien De Smedt's work from the inception of the architectural practice PLOT with Bjarke Ingels in 2001 to the work of JDSA and the founding of the design studio Makers With Agendas with William Ravn in 2013. The Built section of this book gives an overview of De Smedt's built work seen through the lens of photographer Julien Lanoo. The Unbuilt section is a selective narrative by De Smedt of projects that haven't made it to the built world.

**Built Together** Mina Starsiak,2021-02-02 Join lovable Mina Starsiak Hawk from HGTV's hit show Good Bones as she brings her signature humor and heart to this warm and welcoming story about families of all shapes and sizes. Gather around for this celebration of diversity and acceptance as you are reminded just how wonderful it is to be part of your own unique family. Strong families, like strong houses, have sturdy foundations built on trust, love, and a whole lot of TLC. And like houses, no two families look exactly alike. After reading Built Together, children will learn: There are countless ways to be a family—including adopted, divorced, single-parent, or blended families About diversity and acceptance of not only your own family, but families that look nothing like yours Built Together: Is great for readers ages 4-8 Features bright, playful illustrations that bring this inspiring story to life Is filled with the vibrant community spirit of Good Bones, with instant appeal to long-time fans and new friends alike Is a great resource for teachers and parents to help teach children the importance of acceptance and family Drawing on her own stories of starting Two Chicks and a Hammer with her mom, working with her stepfamily, fostering her niece, adopting her rescue dogs, and playing with her son, Mina invites readers young and old to join her in discovering how we are all stronger together. Because, in the end, families are built as well as made.

**Brazil Built** Zilah Quezado Deckker,2001 A welcome addition to the history of the Modern Movement. This new book is a fully illustrated description of modern architecture in Brazil from 1929-1959.

Greening Our Built World Greg Kats,2013-03-05 "Green" buildings—buildings that use fewer resources to build and to sustain—are commonly thought to be too expensive to attract builders and buyers. But are they? The answer to this question has enormous consequences, since residential and commercial buildings together account for nearly 50% of American energy consumption—including at least 75% of electricity usage—according to recent government statistics. This eye-opening book reports the results of a large-scale study based on extensive financial and technical analyses of more than 150 green buildings in the U.S. and ten other countries. It provides detailed findings on the costs and financial benefits of building green. According to the study, green buildings cost roughly 2% more to build than conventional buildings—far less than previously assumed—and provide a wide range of financial, health and social benefits. In addition, green buildings reduce energy use by an average of 33%, resulting in significant cost savings. Greening Our Built World also evaluates the cost effectiveness of "green community development" and presents the results of the first-ever survey of green buildings constructed by faith-based organizations. Throughout the book, leading practitioners in green design—including architects, developers, and property owners—share their own experiences in building green. A compelling combination of rock-solid facts and specific examples, this book proves that green

design is both cost-effective and earth-friendly.

*This is the House that Jack Built* Simms Taback,2004-11-18 What happened in the house that Jack built? It all started with the cheese that lay in the house that Jack built. And then came the rat that ate the cheese and the cat who killed the rat. Caldecott Medal winning author and illustrator Simms Taback brings his distinctive humor and creativity to the beloved story of Jack and the house that he built.

**Rural Built Environment of Sichuan Province, China** Yibin Ao,Igor Martek,2020-12-15 Major changes are taking place in the Chinese countryside as China rushes to modernizes and urbanizes its rural fabric. The transformation is improving the quality of life of rural inhabitants, but also brings about challenges as people strive to adjust. This book systematically examines the impact of change on the daily lives and activities of the residents of Sichuan Province, in China's South-west. It examines the themes of infrastructure, transport modes and preferences, sanitation, water conservation, earthquake and flood disaster preparedness, and the impact these have on villager behavior and quality of life. This book is an essential reference guide for graduate students and practitioners in the fields of rural planning, renewal, and construction.

**Built to Change** Edward E. Lawler, III,Christopher G. Worley,2006-02-17 In this groundbreaking book, organizational effectiveness experts Edward Lawler and Christopher Worley show how organizations can be “built to change” so they can last and succeed in today's global economy. Instead of striving to create a highly reliable Swiss watch that consistently produces the same behavior, they argue organizations need to be designed in ways that stimulate and facilitate change. Built to Change focuses on identifying practices and designs that organizations can adopt so that they are able to change. As Lawler and Worley point out, organizations that foster continuous change Are closely connected to their environments Reward experimentation Learn about new practices and technologies Commit to continuously improving performance Seek temporary competitive advantages

Sustainable Built Environment - Volume I Fariborz Haghighat,Jong-Jin Kim,2009-11-10 Sustainable Built Environment is a component of Encyclopedia of Technology, Information, and Systems Management Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. Environmental conservation and technological innovation are two principal forces that drive the building industry toward the future. Technological innovation offers many opportunities to make buildings more dynamic and comfortable, and occupants more comfortable and productive. The necessity of environmental conservation, on the other hand, compels all types of developments and human activities to be environmentally responsive. The content of the Theme on Sustainable Built Environment is organized with state-of-the-art presentations covering several topics: Urban Design ; Emerging Issues in Building Design; Environment, Energy and Health in Housing Design; Culture, Management Strategies, and Policy Issues in the Sustainable Built Environment; Using Technology to Improve the Quality of City Life; Urban and Regional Transportation, which are then expanded into multiple subtopics, each as a chapter. These two volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

Design and Management of Sustainable Built Environments Runming Yao,2013-03-12 Climate change is believed to be a great challenge to built environment professionals in design and management. An integrated approach in delivering a sustainable built environment is desired by the built environment professional institutions. The aim of this book is to provide an advanced understanding of the key subjects required for the design and management of modern built environments to meet carbon emission reduction targets. In Design and Management of Sustainable Built Environments, an international group of experts provide comprehensive and the most up-to-date knowledge, covering sustainable urban and building design, management and assessment. The best practice case studies of the implementation of sustainable technology and management from the BRE Innovation Park are included. Design and Management of Sustainable Built Environments will be of interest to urban and building designers, environmental engineers, and building performance assessors. It will be particularly useful as a reference book for undergraduate and postgraduate students in the built environment field.

*Integrating Information in Built Environments* Adriana X Sanchez,Keith Hampson,Geoffrey London,2017-07-20 In an increasingly globalised built environment industry, achieving higher levels of integration across organisational and software boundaries can lead to improved economic, social and environmental outcomes. This book is the direct result of a collaborative global network of industry and academic researchers spread across nine countries as part of CIB's (International Council for Research and Innovation in Building and Construction) Task Group 90 (TG90) Information Integration in Construction (IICON). The book provides a broad view of some of the opportunities and challenges brought by integrating information across organisational and system boundaries in the built environment industry. Chapters cover a large range of topics and are separated into three sections: resources, processes and added value. They provide a much-needed international perspective on a current global evolution in the industry and present leading original research and valuable lessons for researchers, industry practitioners, government clients and policy makers across the industry. Key features include: a broad range of topics that are not covered elsewhere in the literature; contributions from a diverse group of industry research leaders from across the globe; exemplar case studies providing real-world examples of where information integration has been a key factor for success or lack thereof has been at the root cause of failure; an analysis of future priority areas for research and development investment as well as their strategic implications for public and private decision-makers; the book will deliver innovation in best practice methodology for information sharing across disciplines and between the design, construction and asset management sectors.

**Four-Coupled Tank Locomotive Classes Built by the Great Western Railway** David Maidment,2023-06-01 This book is a comprehensive history of all twenty-six classes of four coupled tank engines commissioned by the Great Western Railway or built at their Wolverhampton and Swindon Works, from the Broad Gauge 2-4-0 and 4-4-0 tanks of the 1840s and 1850s to the well known Collett 0-4-2 branch line engines of classes 48XX (later renumbered 14XX) and 58XX of the 1930s. As well as the Broad Gauge engines, the strange looking 'Covertibles' of William Dean, a number of experimental 'one-off' designs, the numerous Wolverhampton 0-4-2Ts of the '517' class and the Swindon built '2-4-0 'Metro Tanks' are described with - where known - their allocation and operation. The book includes twenty weight diagrams and nearly 300 photographs, over 50 in color. The four-coupled tank engines absorbed by the Great Western from other companies at or before 1923 will be featured in a separate volume to follow.

*Skills for engineering and built environment students* John Davies,2017-09-16 There are a lot of important skills needed for a career in engineering. As well as academic skills, future engineers need to be able to present data, work in project teams, carry out experiments, problem solve and write reports. This book emphasises the importance of these core skills, and supports engineering students as they successfully navigate their courses and move forward into a career of ongoing development. Written in a friendly and encouraging style, Skills for engineering and built environment students: - Provides guidance on both the study and the professional practice of engineering. - Addresses common worries and pitfalls, debunking myths and demystifying jargon. - Helps with milestones such as group projects, presentations, work placements and job interviews. Supported by interviews with students, lecturers, young engineers and employers, Skills for Engineering and Built Environment Students guides students and early-career professionals through an important transition stage, thoroughly preparing them for the world of work.
