Wandel und Fortschritt in den Christdemokratien Europas Andreas Wagner,2014-06-20 Die christdemokratischen Parteien Westeuropas sahen sich zuletzt besonders stark mit gesellschaftlichem und politischem Wandel konfrontiert. Die Reaktionen dieser einst hyperstabilen christdemokratischen Parteien der bundesdeutschen CDU, der österreichischen ÖVP und des niederländischen CDA fielen dagegen umso mächtiger aus. Andreas Wagner stellt dar, dass es trotz der einst gefestigten gesellschaftlichen Verhältnisse und der ganz besonderen innerparteilichen Beharrungskräfte zu erstaunlichen Veränderungsprozessen kam, die sich immer wieder gegenüber den innerparteilichen Vetospielern behaupten mussten. Gerade in Oppositionszeiten zeigte sich jedoch über die Landesgrenzen hinweg, wie die Christdemokratien die Zeit nutzten, um als politische Großorganisationen zu lernen und sich zu verändern.

Aphasia and Language Stephen E. Nadeau,Leslie Janine Rothi,Bruce Crosson,2000-09-13 This groundbreaking work brings together leading scientist-practitioners to review what is known about aphasia and to relate current knowledge to treatment. Integrating traditional linguistic formulations with new insights derived from cognitive neuroscience, this volume explores the neuropsychological bases of both normal and pathologic language. It reflects an understanding of brain structure and function based on new developments in connectionist modeling and functional neuroimaging.

Retailising Space Mattias Kärrholm,2012 Over the past few years there has been a proliferation of new kinds of retail space, such as in libraries, workplaces, churches and museums. This book describes how the retailisation of public domains affects our everyday life and our use of the built environment. Taking an architectural and territorial perspective on this issue, it looks at how retail and consumption spaces have changed and territorialised urban life in different ways. It then develops a methodology and a set of concepts to describe and understand the role of architecture in these territorial transformations.

Predictive Policing and Artificial Intelligence John McDaniel,Ken Pease,2021-02-25 This edited text draws together the insights of numerous worldwide eminent academics to evaluate the condition of predictive policing and artificial intelligence (AI) as interlocked policy areas. Predictive and AI technologies are growing in prominence and at an unprecedented rate. Powerful digital crime mapping tools are being used to identify crime hotspots in real-time, as pattern-matching and search algorithms are sorting through huge police databases populated by growing volumes of data in an effort to identify people liable to experience (or commit) crime, places likely to host it, and variables associated with its solvability. Facial and vehicle recognition cameras are locating criminals as they move, while police services develop strategies informed by machine learning and other kinds of predictive analytics. Many of these innovations are features of modern policing in the UK, the US and Australia, among other jurisdictions. AI promises to reduce unnecessary labour, speed up various forms of police work, encourage police forces to more efficiently apportion their resources, and enable police officers to prevent crime and protect people from a variety of future harms. However, the promises of predictive and AI technologies and innovations do not always match reality. They often have significant weaknesses, come at a considerable cost and require challenging trade-offs to be made. Focusing on the UK, the US and Australia, this book explores themes of choice architecture, decision-making, human rights, accountability and the rule of law, as well as future uses of AI and predictive technologies in various policing contexts. The text contributes to ongoing debates on the benefits and biases of predictive algorithms, big data sets, machine learning systems, and broader policing strategies and challenges. Written in a clear and direct style, this book will appeal to students and scholars of policing, criminology, crime science, sociology, computer science, cognitive psychology and all those interested in the emergence of AI as a feature of contemporary policing.

People's Palaces Christoph Grafe,2014 Author Christoph Grafe investigates an architectonic typology, the cultural edifice, which must often take on the role of national identity and culture in the realisation of a democratic society. This book takes two specific projects as its subject: London's South Bank and the Kulturhus in Stockholm. The buildings were chosen as a result of their architectural meaning, and by the fact that they appeared in two countries that fulfilled a leading role in the development of the post-war 'welfare state'; in Europe. Besides an in-depth analysis of the two cities within the context of their wider national and cultural development, the book includes a photo essay by German photographer Heidi Specker --

A Day with Mr. Jules Diane Broeckhoven,2010-08-30 When Alice, an elderly woman, smells the coffee her husband, Jules, has just made, she gets up. This ritual repeats itself every day until one morning she finds him lifeless on the sofa before the coffee is ready. While Jules slowly turns into a statue, Alice reminisces about earlier days, telling him things she hasn't dared express before.

Protecting the Environment Anna-Katharina Wöbse,Patrick Kupper,2021-07-30 Today, the European environmental regime seems omnipresent. A rare beetle can stop a building project, the local water authorities have to make sure that the European Eel can reach his home waters after having travelled the Atlantic, European standards for air quality cause trouble for the German diesel-driven car industry, and lighting products are subject to EU energy labelling and eco-design requirements. Implementing laws and sticking to environmental norms and standards has become an integral part of the European integration process. To the EU this is self-evident: We share resources like water, air, natural habitats and the species they support, and we also share environmental standards to protect them. The idea of any such 'shared environment', however, has come a long way and is still being contested. Thinking and writing about the history of protecting the environment requires us to study the long 20th century. In order to understand the peculiar rise of Europe environmental regimes and green values we have to consider the modern concept of Europe as a shared geographical space, linked by habitats, migrating species, rivers, pollutants, climate and risks. Moreover, we have to analyse the 'invention' of conservation as a moral enterprise. That is why environmental history needs a long durée's perspective to understand the evolution of the European Common.
