SHIPHANDLING WITH AZIMUTHING PODDED PROPULSORS Alpertunga Aniker,2020-07-05
Capt. Alper Tunga Aniker is a maritime pilot serving in the Gulf of Izmit in Turkey. His newly published book, Shiphandling with Azimuthing Podded Propulsors bridges a gap in the maritime publications on shiphandling. azimuth thrusters is a configuration of marine propellers placed in pods that can be rotated to any horizontal angle (azimuth), making a rudder unnecessary. These give ships better maneuverability than a fixed propeller and rudder system. Azimuthing podded propulsors has been popular on modern passenger ships and purpose built ships as well as modern tugboats and working boats. However, a book on the shiphandling of such vessels was missing so far.

Surface Analysis Methods in Materials Science D.J. O'Connor,Brett A. Sexton,Roger S.C. Smart,2013-06-29 This guide to the use of surface analysis techniques, now in its second edition, has expanded to include more techniques, current applications and updated references. It outlines the application of surface analysis techniques to a broad range of studies in materials science and engineering. The book consists of three parts: an extensive introduction to the concepts of surface structure and composition, a techniques section describing 19 techniques and a section on applications. This book is aimed at industrial scientists and engineers in research and development. The level and content of this book make it ideal as a course text for senior undergraduate and postgraduate students in materials science, materials engineering, physics, chemistry and metallurgy.

Utilitarianism J. J. C. Smart,Bernard Williams,1973-01-01 Two essays on utilitarianism, written from opposite points of view, by J. J. C. Smart and Bernard Williams. In the first part of the book Professor Smart advocates a modern and sophisticated version of classical utilitarianism; he tries to formulate a consistent and persuasive elaboration of the doctrine that the

rightness and wrongness of actions is determined solely by their consequences, and in particular their consequences for the sum total of human happiness. In Part II Bernard Williams offers a sustained and vigorous critique of utilitarian assumptions, arguments and ideals. He finds inadequate the theory of action implied by utilitarianism, and he argues that utilitarianism fails to engage at a serious level with the real problems of moral and political philosophy, and fails to make sense of notions such as integrity, or even human happiness itself. This book should be of interest to welfare economists, political scientists and decision-theorists.
