The Emperor of All Maladies Siddhartha Mukherjee,2011-08-09 Winner of the Pulitzer Prize and a documentary from Ken Burns on PBS, this New York Times bestseller is “an extraordinary achievement” (The New Yorker)—a magnificent, profoundly humane “biography” of cancer—from its first documented appearances thousands of years ago through the epic battles in the twentieth century to cure, control, and conquer it to a radical new understanding of its essence. Physician, researcher, and award-winning science writer, Siddhartha Mukherjee examines cancer with a cellular biologist’s precision, a historian’s perspective, and a biographer’s passion. The result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with—and perished from—for more than five thousand years. The story of cancer is a story of human ingenuity, resilience, and perseverance, but also of hubris, paternalism, and misperception. Mukherjee recounts centuries of discoveries, setbacks, victories, and deaths, told through the eyes of his predecessors and peers, training their wits against an infinitely resourceful adversary that, just three decades ago, was thought to be easily vanquished in an all-out “war against cancer.” The book reads like a literary thriller with cancer as the protagonist. Riveting, urgent, and surprising, *The Emperor of All Maladies* provides a fascinating glimpse into the future of cancer treatments. It is an illuminating book that provides hope and clarity to those seeking to demystify cancer.

The War on Cancer Guy Faguet,2005-12-01 After reviewing the history of cancer and its impact on the population, Dr. Faguet exposes the antiquated notions that have driven cancer drug development, documents the stagnation in treatment outcomes despite major advances in cancer genomics and growing NCI budgets, and identifies the multiple factors that sustain the status quo. He shows that, contrary to frequent announcements of breakthroughs, our current cancer control model cannot eradicate most cancers and the reasons why. Significantly, this book also delineates a way forward via a shift from the discredited cell-kill approach of the past to an integrated, evidence-driven cancer control paradigm based on prevention, early diagnosis, and pharmacogenomics. The author's views are based on data published in mainstream scientific journals and other reliable references, 432 of which are cited.

The Cancer Crisis in Appalachia Nathan L. Vanderford,Lauren Hudson,Chris Prichard,2020-04-06 Kentucky has more cancer diagnoses and cancer-related deaths than any other state in the nation, and most of these cases are concentrated in the fifty-four counties that constitute the Appalachian region of the commonwealth. These high rankings can be attributed to factors such as elevated smoking rates, unhealthy eating habits, lower levels of education, and limited access to health care. However, what the facts cannot convey on their own is just how life-changing cancer can be -- something that editors Nathan L. Vanderford, Lauren Hudson, and Chris Prichard have endeavored to address. *The Cancer Crisis in Appalachia* features essays written by a group of twenty high school and five undergraduate students, all of whom are residents of Kentucky's Appalachian region and are participants in the University of Kentucky Markey Cancer Center's Appalachian Career Training in Oncology (ACTION) program. These authentic and candid student essays detail the effects of cancer diagnoses and deaths on individuals, families, friends, and communities, and proclaim these cases as more than nameless statistics. *The Cancer Crisis in Appalachia* seeks to shed light on personal cancer stories, to inspire those engaging in cancer-risk behaviors to change their ways, to motivate people to get involved with cancer-prevention initiatives, and to encourage others to give generously and uplift cancer patients and their loved ones.

Pathology and Epidemiology of Cancer Massimo Loda,Lorelei A. Mucci,Megan L. Mittelstadt,Mieke Van Hemelrijck,Maura Bríd Cotter,2016-09-01 This book integrates the disciplines of cancer pathology and epidemiology to provide a synergistic and complementary approach to understanding the molecular mechanisms of cancer. This book provides relevant information on the diagnostic, prognostic and predictive molecular pathology of cancer. Epidemiological studies, including descriptive epidemiology, risk factors and molecular mechanisms of disease inform on the etiology and progression of cancer. The text concentrates on major cancers that are currently prevalent and those for which substantial molecular, pathological and epidemiological data is available. Each section is designed to provide an overview of that cancer type in terms of basic biology, review the current epidemiological data surrounding that cancer type and provide information on common practices and challenges related to the molecular pathology of that cancer type. Several relevant techniques in molecular pathology, which facilitate diagnosis and treatment are also explored. *Pathology and Epidemiology of Cancer* provides a succinct and comprehensive overview of multiple cancer types to guide clinicians during patient care and to guide scientists for innovations in research. It represents an integral resource for pathologists, epidemiologists, medical students as well as translational, basic and clinical science researchers who are all working to progress the field of cancer in terms of diagnosis, treatment and prevention.

The Cancer Book Geoffrey M. Cooper,1993 Written in non-technical language, this book helps the reader understand the basic nature and causes of cancer, as well as the principles underlying current strategies for cancer prevention and treatment. By presenting an overview and perspective of both the basic and practical aspects of cancer, including the background needed to understand continuing advances in the field. The book is fascinating reading and an ideal book for everyone interested in the subject.

- Precise supplement protocols to tame treatment side effects, relieve disease-related symptoms, and modify processes like inflammation and glycemia that can fuel cancer if left untreated
- A new paradigm for exercise and stress reduction that restores your strength, reduces anxiety and depression, and supports the body’s own ability to heal
- A complete program for remission maintenance–a proactive plan to make sure the cancer never returns
