The Los Angeles Tapes Alan Solomon, 2019-03-19 In 1969 curator, critic and former Jewish Museum director Alan Solomon interviewed Craig Kauffman, Larry Bell, James Turrell and Robert Irwin in conjunction with an exhibition he was organizing. They are the earliest in-depth interviews with each artist. Because of his untimely death they have remained in his archives and are published here for the first time. The interviews provide a rare glimpse into the early careers of these seminal artists, documenting their critical, aesthetic and intellectual concerns at a pivotal moment, allowing readers new insight into an important era of American postwar art. Solomon rose to prominence in the 1960s as a curator at the Jewish Museum in New York, where he organized a series of first solo exhibitions for the likes of Jasper Johns and Robert Rauschenberg. He also curated several major international surveys, including the 1964 Venice Biennale, where Rauschenberg won the Golden Lion. In 1968 Solomon left New York to take up a position at the fledgling University of California campus in Irvine, which was home to a dynamic group of young faculty and students. There he became acquainted with Kauffman, Bell, Turrell and Irwin, who have since been recognized as canonical participants in California Light and Space art of the 1960s. With this volume his engagement with these artists, and their roles in this important art historical episode, has finally been brought to light.

The Circle Dave Eggers, 2013-10-08 INTERNATIONAL BESTSELLER • A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for

the Circle, the world's most powerful internet company, she feels she's been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users' personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company's modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can't believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

Little Book of Circle Processes Kay Pranis, 2015-01-27 Our ancestors gathered around a fire in a circle, families gather around their kitchen tables in circles, and now we are gathering in circles as communities to solve problems. The practice draws on the ancient Native American tradition of a talking piece. Peacemaking Circles are used in neighborhoods to provide support for those harmed by crime and to decide sentences for those who commit crime, in schools to create positive classroom climates and resolve behavior problems, in the workplace to deal with conflict, and in social services to develop more organic support

systems for people struggling to get their lives together. A title in The Little Books of Justice and Peacebuilding Series.

Circle Mac Barnett, 2019-03-05 Multi-award-winning, New York Times best-selling duo Mac Barnett and Jon Klassen deliver the final wry and resonant tale about Triangle, Square, and Circle. This book is about Circle. This book is also about Circle's friends, Triangle and Square. Also it is about a rule that Circle makes, and how she has to rescue Triangle when he breaks that rule. With their usual pitch-perfect pacing and subtle, sharp wit, Mac Barnett and Jon Klassen come full circle in the third and final chapter of their clever shapes trilogy.

The Circle Sara B. Elfgren, Mats Strandberg, 2013-05-02 "What a stunning novel. Raw, real, smart, very thrilling, and very, very wicked. The Circle is Twilight by way of The Girl with the Dragon Tattoo." —Lev Grossman, New York Times—bestselling author Minoo wakes up outside her house, still in her pajamas, and is drawn by an invisible force to an abandoned theme park on the outskirts of town. Soon five of her classmates—Vanessa, Linnéa, Anna-Karin, Rebecka, and Ida—arrive, compelled by the same force. A mystical being takes over Ida's body and tells them they are fated to fight an ancient evil that is hunting them. As the weeks pass, each girl discovers she has a unique magical ability. They begin exploring their powers. The six are wildly different and definitely not friends . . . but they are the Chosen Ones. In this gripping first installment of The Engelsfors Trilogy, a parallel world emerges in which teenage dreams, insanely annoying parents, bullying, revenge, and love collide with dangerous forces and ancient magic. An international sensation with rights sold in twenty-six countries, The Circle is razor-sharp and

remarkable from start to finish. “The Circle ensnares you from the start, with all the epic mayhem and darkness of Buffy the Vampire Slayer and with teen characters as rich and nuanced as any reader could hope for. It’s an utterly convincing world, and a resonant one, and we find ourselves wanting to follow its heroes anywhere.” —Megan Abbott, New York Times–bestselling author “The Circle puts its mismatched heroines—and readers—at the center of an ancient conspiracy of magic as terrifying as it is realistic. Enthralling from start to finish.” —Elizabeth Hand, award–winning author

Arcane Circle Linda Robertson, 2010-12-28 Even magic can’t solve everything. . . . After facing down the forces of Fairy in mortal combat, Persephone Alcmēdi still must deal with the aftermath. Not only does Seph now possess deadly secrets she must hide from the arcane and mundane world alike, but the dozens of magical creatures who’ve taken up residence behind her cornfield need food and shelter, and there’s still her foster daughter Beverly’s tenth birthday party to plan. And that’s not all. . . . Seph’s boyfriend Johnny has revealed himself as the wærewolf Domn Lup, and the ruler of the wære world is en route from Romania to make sure Johnny really is the “king” he claims to be. But Johnny’s hiding a dangerous secret: his magic is locked in his mysterious tattoos. He and Seph must find a way for him to reclaim it—fast—despite those who have no intention of letting Johnny gain his full powers. Seph knows that, in the arcane world, strength is always a necessity and power must be constantly proven, but how far is she willing to go to succeed . . . and at what cost?

Geometry: The Line and the Circle Maureen T. Carroll, Elyn Rykken, 2018-12-20 *Geometry: The Line and the Circle* is an undergraduate text with a strong narrative that is written at the appropriate level of

rigor for an upper-level survey or axiomatic course in geometry. Starting with Euclid's *Elements*, the book connects topics in Euclidean and non-Euclidean geometry in an intentional and meaningful way, with historical context. The line and the circle are the principal characters driving the narrative. In every geometry considered—which include spherical, hyperbolic, and taxicab, as well as finite affine and projective geometries—these two objects are analyzed and highlighted. Along the way, the reader contemplates fundamental questions such as: What is a straight line? What does parallel mean? What is distance? What is area? There is a strong focus on axiomatic structures throughout the text. While Euclid is a constant inspiration and the *Elements* is repeatedly revisited with substantial coverage of Books I, II, III, IV, and VI, non-Euclidean geometries are introduced very early to give the reader perspective on questions of axiomatics. Rounding out the thorough coverage of axiomatics are concluding chapters on transformations and constructibility. The book is compulsively readable with great attention paid to the historical narrative and hundreds of attractive problems.

The Circles All Around Us Brad Montague, 2021-05-18 The debut picture book from the creator of the viral sensation *Kid President* is a moving take on how we can create bigger and bigger circles of community and connections as we grow—now a *New York Times* bestseller! In the circles all around us, everywhere that we all go, there's a difference we can make and a love we can all show. This is the story of a circle. When we're first born, our circle is very small, but as we grow and build relationships, our circle keeps getting bigger and bigger to include family, friends, neighbors, community, and beyond. Brad Montague originally created *Circles* as an Instagram video adorably narrated by his kids, and now this

picture book adaptation is the perfect way to start a conversation about how to expand our worlds with kindness and inclusivity—even if it seems scary or uncomfortable. This book makes an ideal new-baby, first-day-of-school, or graduation gift, or any milestone that celebrates someone's world getting bigger.

This Is a Circle Chrissie Krebs, 2018-08-07 This is a circle. That is a square. This is a very silly book about a wild-looking one-eyed bear, a song-singing cat, a tap-dancing goat, and a pants-wearing fox. Armed with a variety of objects and shapes, these four silly creatures create a surprising amount of havoc, which starts by the goat climbing the box and only gets zanier from there! This is *A Circle* is charming, silly tale of shapes and objects. Kreb's dynamic illustrations bring her zany words to life in a fun read-along book that will have the whole family smiling!

Inside the Critics' Circle Phillipa K. Chong, 2021-09-14 An inside look at the politics of book reviewing, from the assignment and writing of reviews to why critics think we should listen to what they have to say Taking readers behind the scenes in the world of fiction reviewing, *Inside the Critics' Circle* explores the ways critics evaluate books despite the inherent subjectivity involved and the uncertainties of reviewing when seemingly anyone can be a reviewer. Drawing on interviews with critics from such venues as the New York Times, Los Angeles Times, and Washington Post, Phillipa Chong delves into the complexities of the review-writing process, including the considerations, values, and cultural and personal anxieties that shape what critics do. Chong explores how critics are paired with review assignments, why they accept these time-consuming projects, how they view their own qualifications for reviewing certain books, and the criteria they employ when making literary judgments. She discovers that while their

readers are of concern to reviewers, they are especially worried about authors on the receiving end of reviews. As these are most likely peers who will be returning similar favors in the future, critics' fears and frustrations factor into their willingness or reluctance to write negative reviews. At a time when traditional review opportunities are dwindling while other forms of reviewing thrive, book reviewing as a professional practice is being brought into question. Inside the Critics' Circle offers readers a revealing look into critics' responses to these massive transitions and how, through their efforts, literary values get made.

All We Can Save Ayana Elizabeth Johnson, Katharine K. Wilkinson, 2021-07-20 NATIONAL BESTSELLER • Provocative and illuminating essays from women at the forefront of the climate movement who are harnessing truth, courage, and solutions to lead humanity forward. “A powerful read that fills one with, dare I say . . . hope?”—The New York Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY SMITHSONIAN MAGAZINE There is a renaissance blooming in the climate movement: leadership that is more characteristically feminine and more faithfully feminist, rooted in compassion, connection, creativity, and collaboration. While it's clear that women and girls are vital voices and agents of change for this planet, they are too often missing from the proverbial table. More than a problem of bias, it's a dynamic that sets us up for failure. To change everything, we need everyone. *All We Can Save* illuminates the expertise and insights of dozens of diverse women leading on climate in the United States—scientists, journalists, farmers, lawyers, teachers, activists, innovators, wonks, and designers, across generations, geographies, and race—and aims to advance a more representative, nuanced, and solution-oriented public conversation on the climate crisis. These women offer a spectrum of ideas and insights for

how we can rapidly, radically reshape society. Intermixing essays with poetry and art, this book is both a balm and a guide for knowing and holding what has been done to the world, while bolstering our resolve never to give up on one another or our collective future. We must summon truth, courage, and solutions to turn away from the brink and toward life-giving possibility. Curated by two climate leaders, the book is a collection and celebration of visionaries who are leading us on a path toward all we can save. Circle in a Box Sam Vandervelde, 2009 Math circles provide a setting in which mathematicians work with secondary school students who are interested in mathematics. This form of outreach, which has existed for decades in Russia, Bulgaria, and other countries, is now rapidly spreading across the United

States as well. The first part of this book offers helpful advice on all aspects of math circle operations, culled from conversations with over a dozen directors of successful math circles. Topics include creative means for getting the word out to students, sound principles for selecting effective speakers, guidelines for securing financial support, and tips for designing an exciting math circle session. The purpose of this discussion is to enable math circle coordinators to establish a thriving group in which students can experience the delight of mathematical investigation. The second part of the book outlines ten independent math circle sessions, covering a variety of topics and difficulty levels. Each chapter contains detailed presentation notes along with a useful collection of problems and solutions. This book will be an indispensable resource for any individual involved with a math circle or anyone who would like to see one begin in his or her community. Sam Vandervelde teaches at St. Lawrence University. He launched the Stanford Math Circle and also writes and coordinates the Mandelbrot Competition, a math contest for high schools. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession. Titles in this series are co-published with the Mathematical Sciences Research Institute (MSRI).

Circle Jeannie Baker, 2020-03-24 “It’s hard to imagine a more powerful treatment of migration: Baker

conveys the strength of the birds and the fragility of their habitat with equal care.” — Publishers Weekly (starred review) Each year, bar-tailed godwits undertake the longest unbroken migration of any bird, flying from their breeding grounds in the Arctic to Australia and New Zealand and back again. They follow invisible pathways — pathways that have been followed for thousands of years — while braving hunger and treacherous conditions to reach their destination. In *Circle*, Jeannie Baker follows the godwits' incredible flight, taking readers over awe-inspiring scenes as the birds spread their wings above such beautiful landmarks as the Great Barrier Reef and China's breathtaking cityscapes for an unforgettable journey.

Sandry's Book Tamora Pierce, 1999-09 Four young misfits find themselves living in a strictly disciplined temple community where they become friends while also learning to do crafts and to use their powers, especially magic.
