**Christian Rohde**

**Covering** Kenji Yoshino, 2011-11-02 A lyrical memoir that identifies the pressure to conform as a hidden threat to our civil rights, drawing on the author's life as a gay Asian American man and his career as an acclaimed legal scholar. "[Kenji] Yoshino offers his personal search for authenticity as an encouragement for everyone to think deeply about the ways in which all of us have covered our true selves. . . . We really do feel newly inspired."—The New York Times Book Review Everyone covers. To cover is to downplay a disfavored trait so as to blend into the mainstream. Because all of us possess stigmatized attributes, we all encounter pressure to cover in our daily lives. Racial minorities are pressed to "act white" by changing their names, languages, or cultural practices. Women are told to "play like men" at work. Gays are asked not to engage in public displays of same-sex affection. The devout are instructed to minimize expressions of faith, and individuals with disabilities are urged to conceal the paraphernalia that permit them to function. Given its pervasiveness, we may experience this pressure to be a simple fact of social life. Against conventional understanding, Kenji Yoshino argues that the work of American civil rights law will not be complete until it attends to the harms of coerced conformity. Though we have come to some consensus against penalizing people for differences based on race, sex, sexual orientation, religion, and disability, we still routinely deny equal treatment to people who refuse to downplay differences along these lines. At the same time, Yoshino is responsive to the American exasperation with identity politics, which often seems like an endless parade of groups asking for state and social solicitude. He observes that the ubiquity of covering provides an opportunity to lift civil rights into a higher, more universal register. Since we all experience the covering demand, we can all make common cause around a new civil rights paradigm based on our desire for authenticity—a desire that brings us together rather than driving us apart. Praise for Covering "Yoshino argues convincingly in this book, part luminous, moving memoir, part cogent, level-headed treatise, that covering is going to become more and more a civil rights issue as the nation (and the nation's courts) struggle with an increasingly multiethnic America."—San Francisco Chronicle "[A] remarkable debut . . . [Yoshino's] sense of justice is pragmatic and infectious."—Time Out New York

The Encyclopedia of Window and Bed Coverings Charles Randall, 2012-06-01 Completely updated and revised: the latest in window & bed covering ideas, and now with an extensive Bed Covering section, The Encyclopedia Window & Bed Coverings is Charles Randall's newest creation based upon his original masterwork: The Encyclopedia of Window Fashions. This new book continues the tradition of blending historical, classic and contemporary offerings. The Encyclopedia of Window & Bed Coverings is a must have for interior designers, homeowners, and decorating enthusiasts alike. With more full-color and black & white illustrations than ever before, this book presents countless combinations of window and bedding treatments for any room in the home: from a simple rod pocket curtain to a period style masterpiece. 304 pages of cost-saving ideas, yardage calculations and fullness charts, you will quickly see why this book has not only become the industry standard for window decor inspiration, but also the world's best-selling window decorating book.

**Creating Body Coverings** Jean Ray Laury, Joyce Aiken, 1974

Galois Theory, Coverings, and Riemann Surfaces Askold Khovanskii, 2013-09-11 The first part of this book provides an elementary and self-contained exposition of classical Galois theory and its applications to questions of solvability of algebraic equations in explicit form. The second part describes a surprising analogy between the fundamental theorem of Galois theory and the classification of coverings over a topological space. The third part contains a geometric description of finite algebraic extensions of the field of meromorphic functions on a Riemann surface and provides an introduction to the

topological Galois theory developed by the author. All results are presented in the same elementary and self-contained manner as classical Galois theory, making this book both useful and interesting to readers with a variety of backgrounds in mathematics, from advanced undergraduate students to researchers.

**Abelian Coverings of the Complex Projective Plane Branched along Configurations of Real Lines** Eriko Hironaka,1993 This work studies abelian branched coverings of smooth complex projective surfaces from the topological viewpoint. Geometric information about the coverings (such as the first Betti numbers of a smooth model or intersections of embedded curves) is related to topological and combinatorial information about the base space and branch locus. Special attention is given to examples in which the base space is the complex projective plane and the branch locus is a configuration of lines.

**Indentation and Recovery of Low-cost Floor Coverings** Percy A. Sigler,Myrtle B. Woodward,1939

**Coverings of Discrete Quasiperiodic Sets** Peter Kramer,Zorka Papadopolos,2003-07-01 In this up-to-date review and guide to most recent literature, the expert authors develop concepts related to quasiperiodic coverings and describe results. The text describes specific systems in 2 and 3 dimensions with many illustrations, and analyzes the atomic positions in quasicrystals.

**Decorating with Paint & Wall Coverings** Oxmoor House,1999 Explains how to maximize color use in interior design with paint and paper

**Veech Groups and Translation Coverings** Finster, Myriam,2014-09-03

**Comparing Body Coverings** ,2009 'Comparing Body Coverings' introduces readers to different body coverings and their functions. Striking images of a variety of animals encourage readers to compare and contrast different body coverings and how they contribute to an animal's survival. This Acorn Read-Aloud is an excellent tool for introducing the concept of body coverings to young learners.

**A Review of Federal and Military Specifications for Floor Coverings** Winthrop C. Wolfe,1974

**Singular Coverings of Toposes** Marta Bunge,Jonathon Funk,2007-01-19 This volume presents a self-contained theory of certain singular coverings of toposes, including branched coverings. This book is distinguished from classical treatments of the subject by its unexpected connection with a topic from functional analysis, namely, distributions. Although primarily aimed at topos theorists, this book may also be used as a textbook for advanced graduate courses introducing topos theory with an emphasis on geometric applications.

**Floor Coverings for Historic Buildings** Helene Von Rosenstiel,Gail Caskey Winkler,1988 Wood Planks and Oriental Rugs weren't the only floor coverings found in America's old houses. In fact, a rich array of floor treatments have been used--from brick, tile and linoleum to mats and floorcloths, from rag rugs to ingrain, embroidered and pile carpets. And, of course, Oriental rugs on wood floors. Finding just the right floor covering to furnish an old house or to create a period look in any building has always been a challenge. Now, Floor Coverings for Historic Buildings explains how to choose and buy the correct floor coverings used between 1750 and the 1930s, including where to order 475 reproductions described here in detail. This invaluable catalog, illustrated with 175 photographs, also provides a history of American floors,a glossary of floor covering terms, addresses for 82 suppliers (many of whom fill custom and special orders), a reading list and sources of help.

**Do Frogs Have Fur?** Michael Dahl,2004 Introduces a number of different animals and the type of body coverings they have.

**Covering Codes** G. Cohen,I. Honkala,S. Litsyn,A. Lobstein,1997-04-14 The problems of constructing covering codes and of estimating their parameters are the main concern of

this book. It provides a unified account of the most recent theory of covering codes and shows how a number of mathematical and engineering issues are related to covering problems. Scientists involved in discrete mathematics, combinatorics, computer science, information theory, geometry, algebra or number theory will find the book of particular significance. It is designed both as an introductory textbook for the beginner and as a reference book for the expert mathematician and engineer. A number of unsolved problems suitable for research projects are also discussed.

**Cyclic Coverings, Calabi-Yau Manifolds and Complex Multiplication** Christian Rohde, 2009-04-28 The main goal of this book is the construction of families of Calabi-Yau 3-manifolds with dense sets of complex multiplication fibers. The new families are determined by combining and generalizing two methods. Firstly, the method of E. Viehweg and K. Zuo, who have constructed a deformation of the Fermat quintic with a dense set of CM fibers by a tower of cyclic coverings. Using this method, new families of K3 surfaces with dense sets of CM fibers and involutions are obtained. Secondly, the construction method of the Borcea-Voisin mirror family, which in the case of the author's examples yields families of Calabi-Yau 3-manifolds with dense sets of CM fibers, is also utilized. Moreover fibers with complex multiplication of these new families are also determined. This book was written for young mathematicians, physicists and also for experts who are interested in complex multiplication and varieties with complex multiplication. The reader is introduced to generic Mumford-Tate groups and Shimura data, which are among the main tools used here. The generic Mumford-Tate groups of families of cyclic covers of the projective line are computed for a broad range of examples.

**Finite Packing and Covering** K. Böröczky, 2004-08-02 This book provides an in-depth discussion of the theory of finite packings and coverings by convex bodies.

**Resilient, Textile and Laminate Floor Coverings - Floor Covering Standard Symbols** British Standards Institute Staff, 2009-02-28 Floor coverings, Textile floor coverings, Laminates, Plastics, Linoleum, Cork, Rubber, Panel flooring, Marking, Graphic symbols, Symbols

**Performance Test of Floor Coverings for Use in Low-cost Housing** Percy A. Sigler, Elmer A. Koerner, 1940

**Covering Catastrophe** Allison Gilbert, 2002 Tells what it was like for TV and radio journalists to report the terrifying story of their lives.
