Cure Jo Marchant, 2016-01-19 A rigorous, skeptical, deeply reported look at the new science behind the mind's surprising ability to heal the body. Have you ever felt a surge of adrenaline after narrowly avoiding an accident? Salivated at the sight (or thought) of a sour lemon? Felt turned on just from hearing your partner's voice? If so, then you've experienced how dramatically the workings of your mind can affect your body. Yet while we accept that stress or anxiety can damage our health, the idea of healing thoughts was long ago hijacked by New Age gurus and spiritual healers. Recently, however, serious scientists from a range of fields have been uncovering evidence that our thoughts, emotions and beliefs can ease pain, heal wounds, fend off infection and heart disease and even slow the progression of AIDS and some cancers. In *Cure*, award-winning science writer Jo Marchant travels the world to meet the physicians, patients and researchers on the cutting edge of this new world of medicine. We learn how meditation protects against depression and dementia, how social connections increase life expectancy and how patients who feel cared for recover from surgery faster. We meet Iraq war veterans who are using a virtual arctic world to treat their burns and children whose ADHD is kept under control with half the normal dose of medication. We watch as a transplant patient uses the smell of lavender to calm his hostile immune system and an Olympic runner shaves vital seconds off his time through mind-power alone. Drawing on the very latest research, Marchant explores the vast potential of the mind's ability to heal, lays out its limitations and explains how we can make use of the findings in our own lives. With clarity and compassion, *Cure* points the way towards a system of medicine that treats us not simply as bodies but as human beings. A New York Times Bestseller Finalist for the Royal Society Insight Investment Science Book Prize Longlisted for the Wellcome Book Prize

Working Cures Sharla M. Fett, 2002 *Working Cures* explores black health under slavery showing how herbalism, conjuring, midwifery and other African American healing practices became arts of resistance in the antebellum South and invoked conflicts.

A New Theory of Cure Tracy D Kolenchuk, 2021-09-08 Our current theory of cure isn't working. When did it stop? Today, we can't cure most diseases. When cured – few can be proven cured. Even the common cold, the flu, and measles. I've had them all, cured. Over 99 percent of cases are cured, while medical theory "there is no cure for..." The same is true for many other diseases. We need a theory of cure that encompasses every curable medical condition or disease. This book is the first step on that path. Cure is defined by cause. Every curable medical condition has a present cause that, when addressed, results in a cure. Of course, many diseases are compound and complex, having multiple causes often causing other diseases themselves. There is plenty of complexity. To study cure, we simplify first and then build our understanding from a solid foundation. There are exactly two basic types of illness causes, resulting in exactly two types of cures. An element of illness has a single cause. The cause of an illness might be found in diet, body, mind, spirit, community or environment of the afflicted. The illness element is cured when the cause has been successfully addressed. Once an illness is cured, that cure is permanent. No cure is permanent. If the cause occurs again, a new illness might occur. This logic applies to every cure. Cures are forward movements in life. We can only go forward in life,

not backwards. No cure is perfect. Perfect cures are a myth. Real cures are real. Both healing and curing function by addressing the basic causes of illness. Healing cures are unconscious intentional actions that successfully address the cause of an illness. No healing cure is perfect - even when the results are better than before. Curing consists of intentional personal, community, and medical actions that address the cause of an illness. Caring is attention by self and community to address the signs and symptoms of disease, to aid and facilitate healthy tolerance of the signs and symptoms of disease and to aid and facilitate cures.

Nature Cures James C. Whorton, 2004 From reflexology and rolfing to shiatsu and dream work, we are confronted today by a welter of alternative medical therapies. But as James Whorton shows in *Nature Cures*, the recent explosion in alternative medicine actually reflects two centuries of competition and conflict between mainstream medicine and numerous unorthodox systems. This is the first comprehensive history of alternative medicine in America, examining the major systems that have emerged from 1800 to the present. Writing with wit and with fairness to all sides, Whorton offers a fascinating look at alternative health systems such as homeopathy, water cures, Mesmerism, Christian Science, osteopathy, chiropractic, naturopathy, and acupuncture. He highlights the birth and growth of each system (including European roots where appropriate) and vividly describes both the theories and the therapies developed within each system, including such dubious practices as hour-long walks barefoot in snow or Samuel Thompson's puking and steaming regimen. In particular, Whorton illuminates the philosophy of natural healing that has been espoused by alternative practitioners throughout history and the distinctive interpretations of nature cure developed by the different systems. Though he doesn't hesitate to point out the failings of these systems, he also shows that some cult medicines have eventually won recognition from practitioners of mainstream medicine. Throughout, Whorton writes with a light touch and quotes from contemporary humorists such as Mark Twain. His book is an engaging and authoritative history that highlights the course of alternative medicine in the U.S., providing valuable background to the wide range of therapies available today.

Cures Martin Duberman, 2009-07-21 This is the tenth anniversary edition of *Cures: A Gay Man's Odyssey*, Martin Duberman's classic memoir of growing up gay in pre-Stonewall America. The tale of his desperate struggle to cure" himself of his homosexuality through psychotherapy is utterly frank and deeply moving. But *Cures* is more than one man's story; it's the vivid, witty account of a generation, of changing times, shifting social attitudes, and the rising tide of protest against received wisdom. For this tenth anniversary edition, Duberman has written a substantial new afterword that updates both his personal history and the ongoing struggle for a more just society.

Secret Cures of Slaves Londa Schiebinger, 2017-07-18 “Engaging unique sources . . . Londa Schiebinger untangles the complex relationships between European and local physicians, healers, plants, and slavery.” –François Regourd, Université Paris Nanterre In the natural course of events, humans fall sick and die. The history of medicine bristles with attempts to find new and miraculous remedies, to work with and against nature to restore humans to health and well-being. In this book, Londa Schiebinger examines medicine and human experimentation in the Atlantic World, exploring the circulation of people, disease, plants, and knowledge between Europe, Africa, and the Americas. She traces the development of a colonial medical complex from the 1760s, when a robust experimental culture emerged in the British and French West Indies, to the early 1800s, when debates raged about banning the slave trade and, eventually, slavery itself. Massive mortality among enslaved Africans and European planters, soldiers, and sailors fueled the search for new healing techniques. Amerindian, African, and European knowledges competed to cure diseases emerging from the collision of peoples on newly established, often poorly supplied, plantations. But not all knowledge was equal. Highlighting the violence and fear endemic to colonial struggles, Schiebinger explores aspects of African medicine that were not put to the test, such as Obeah and vodou. This book analyzes how and why specific knowledges were blocked, discredited, or held secret. “In this urgent, probing and visually striking volume, Londa Schiebinger, one of the pioneers of feminist and colonial science studies, shifts our understanding of Enlightenment racial attitudes to the domain of the medical, making a vital contribution to the dynamic new wave of research on science and slavery in the Atlantic world.” –James Delbourgo, Rutgers University

Cured Jeffrey Rediger, M.D., 2020-02-04 When it comes to disease, who beats the odds – and why? When it comes to spontaneous healing, skepticism abounds. Doctors are taught that “miraculous” recoveries are flukes, and as a result they don’t study those cases or take them into account when treating patients. Enter Dr. Jeff Rediger, who has spent over 15 years studying spontaneous healing, pioneering the use of scientific tools to investigate recoveries from incurable illnesses. Dr. Rediger’s research has taken him from America’s top hospitals to healing centers around the world—and along the way he’s uncovered insights into why some people beat the odds. In *Cured*, Dr. Rediger digs down to the root causes of illness, showing how to create an environment that sets the stage for healing. He reveals the patterns behind healing and lays out the physical and mental principles associated with recovery: first, we need to physically heal our diet and our immune systems. Next, we need to mentally heal our stress response and our identities. Through rigorous research, Dr. Rediger shows that much of our physical reality is created in our minds. Our perception changes our experience, even to the point of changing our physical bodies—and thus the healing of our identity may be our greatest tool to recovery. Ultimately, miracles only contradict what we know of nature at this point in time. *Cured* leads the way in explaining the science behind these miracles, and provides a first-of-its-kind guidebook to both healing and preventing disease.

Hearing Happiness Jaipreet Virdi, 2020-08-31 Weaving together lyrical history and personal memoir, Virdi powerfully examines society's—and her own—perception of life as a deaf person in America. At the age of four, Jaipreet Virdi's world went silent. A severe case of meningitis left her alive but deaf, suddenly treated differently by everyone. Her deafness downplayed by society and doctors, she struggled to “pass” as hearing for most of her life. Countless cures, treatments, and technologies led to dead ends. Never quite deaf enough for the Deaf community or quite hearing enough for the “normal” majority, Virdi was stuck in aural limbo for years. It wasn't until her thirties, exasperated by problems with new digital hearing aids, that she began to actively assert her deafness and reexamine society's—and her own—perception of life as a deaf person in America. Through lyrical history and personal memoir, *Hearing Happiness* raises pivotal questions about deafness in American society and the endless quest for a cure. Taking us from the 1860s up to the present, Virdi combs archives and museums to understand the long history of curious cures: ear trumpets, violet ray apparatuses, vibrating massagers, electrotherapy machines, airplane diving, bloodletting, skull hammering, and many more. Hundreds of procedures and products have promised grand miracles but always failed to deliver a universal cure—a harmful legacy that is still present in contemporary biomedicine. Blending Virdi's own experiences together with her exploration into the fascinating history of deafness cures, *Hearing Happiness* is a powerful story that America needs to hear. Praise for *Hearing Happiness* “In part a critical memoir of her own life, this archival tour de force centers on d/Deafness, and, specifically, the obsessive search for a “cure”. . . . This survey of cure and its politics, framed by disability studies, allows readers—either for the first time or as a stunning example in the field—to think about how notions of remediation are leveraged against the most vulnerable.” —Public Books “Engaging. . . . A sweeping chronology of human deafness fortified with the author's personal struggles and triumphs.” —Kirkus Reviews “Part memoir, part historical monograph, Virdi's *Hearing Happiness* breaks the mold for academic press publications.” —Publishers Weekly “In her insightful book, Virdi probes how society perceives deafness and challenges the idea that a disability is a deficit. . . . [She] powerfully demonstrates how cures for deafness pressure individuals to change, to “be better.” —Washington Post

Heal Arlene Weintraub, 2015-10-01 How man's best friend could help cure man's greatest scourge: “An Emperor of All Maladies for dog lovers” (Dr. Sarah Boston, author of *Lucky Dog: How Being a Veterinarian Saved My Life*). Drawn from extensive research, on-the-ground reporting, and personal experience, this book explores the fascinating role dogs (and cats) are playing in the search of cures for cancer. Learn how veterinarians and

oncologists are working together to discover new treatments—cutting-edge therapies designed to help both animals and people suffering from cancer. Heal introduces readers to the field of comparative oncology by describing several research projects aimed at finding new therapies for cancers that are similar in dogs and people, including lymphoma, osteosarcoma, breast cancer, melanoma, and gastric cancer. The author, who lost her sister to gastric cancer, also writes about the emerging science behind the remarkable ability of dogs to sniff out early stage cancer and the efforts underway to translate that talent into diagnostic devices for early detection of the disease. In the course of bringing these dogs and their human companions to life, Arlene Weintraub takes her own personal journey from grief to healing, as she shows how man's best friend might be the key to unlocking the mysteries of cancer. "Readers will share Weintraub's growing appreciation for the canine and feline subjects (and their owners) who are helping to advance cancer research." —Publishers Weekly
