**The Decision Maker** Dennis Bakke,2013-03-05 Argues that leaving decision making entirely to company leaders is a mistake and that giving decision-making power to people at all levels will energize a company and tap into its full potential.

Decisions, Decisions David A. Welch,2009-12-02 You're tempted to accept a promising job offer in another city, but moving would entail considerable sacrifice on the part of your family. What should you do? Your elderly mother can no longer take care of herself but she doesn't get along with your husband and dreads the prospect of moving into a nursing home. What is the solution? Whether you are faced with decisions momentous or trivial, how you go about resolving everyday dilemmas will definitely affect your level of satisfaction in life. In this engrossing and entertaining guide, David Welch, who has studied the decision-making process at the highest levels, shows how both the science and the art of decision-making are essential to us all. Welch lays out nine steps to effective decision-making and then demonstrates how to apply these steps to real-world situations. He gives readers the intellectual tools to assess their strengths and weaknesses and stresses that self-knowledge is critical for making the right decisions. This enjoyable, clearly written guide will enable decision-makers at every level to find the best possible solution for dilemmas both big and small.

Structured Decision Making Robin Gregory, Lee Failing, Michael Harstone, Graham Long, Tim McDaniels, Dan Ohlson, 2012-03-19 This book outlines the creative process of making environmental management decisions using the approach called Structured Decision Making. It is a short introductory guide to this popular form of decision making and is aimed at environmental managers and scientists. This is a distinctly pragmatic label given to ways for helping individuals and groups think through tough multidimensional choices characterized by uncertain science, diverse stakeholders, and difficult tradeoffs. This is the everyday reality of environmental management, yet many important decisions currently are made on an ad hoc basis that lacks a solid value-based foundation, ignores key information, and results in selection of an inferior alternative. Making progress – in a way that is rigorous, inclusive, defensible and transparent – requires combining analytical methods drawn from the decision sciences and applied ecology with deliberative insights from cognitive psychology, facilitation and negotiation. The authors review key methods and discuss case-study examples based in their experiences in communities, boardrooms, and stakeholder meetings. The goal of this book is to lay out a compelling guide that will change how you think about making environmental decisions. A Primer on Decision Making James G. March, 1994-05-23 Building on lecture notes from his acclaimed course at Stanford University, James March provides a brilliant introduction to decision making, a central human activity fundamental to individual, group, organizational, and societal life. March draws on research from all the disciplines of social and behavioral science to show decision making in its broadest context. By emphasizing how decisions are actually made -- as opposed to how they should be made -- he enables those involved in the process to understand it both as observers and as participants. March sheds new light on the decision-making process by delineating four deep issues that persistently divide students of decision making: Are decisions based on rational choices involving preferences and expected consequences, or on rules that are appropriate to the identity of the decision maker and the situation? Is decision making a consistent, clear process or one characterized by ambiguity and inconsistency? Is decision making significant primarily for its outcomes, or for the individual and social meanings it creates and sustains? And finally, are the outcomes of decision processes attributable solely to the actions of individuals, or to the combined influence of interacting individuals, organizations, and societies? March's observations on how intelligence is -- or is not -- achieved through decision making, and possibilities for enhancing decision intelligence, are also provided. March explains key concepts of vital importance to students of decision making and decision makers, such as limited rationality, history-dependent rules, and ambiguity, and weaves these ideas into a full depiction of decision making. He includes a discussion of the modern aspects of several classic issues underlying these concepts, such as the relation between reason and ignorance, intentionality and fate, and meaning and interpretation. This valuable textbook by one of the seminal figures in the history of organizational decision making will be required reading for a new generation of scholars, managers, and other decision makers.

*Decision Making for Leaders* Thomas L. Saaty, 1990 This book is about how to make decisions using the Analytic Hierarchy Process. The basics of the theory are described in a clear, non-technical manner with many examples. It is suitable for business leaders and also is probably the best book for introducing the AHP to students at the college and graduate level. In this fifth printing of the book the reader will find a new appendix containing real-life applications that validate the use of the fundamental scale of the AHP.

*Decision Making For Dummies* Dawna Jones, 2014-10-06 Discover the best approaches for making business decisions Today's business leaders have to face the facts—you can't separate leadership from decision making. The importance of making decisions, no matter how big or small, cannot be overstated. Decision Making For Dummies is a candid resource that helps leaders understand the impact of their choices, not only on business, but also on their credibility and reputation. Designed for managers, business owners, and anyone else who makes tough decisions on a daily basis, this guide helps you figure out if the decisions you're making are the right ones. In addition to helping you explore how to evaluate your choices, Decision Making For Dummies covers ways to receive support for decision making, delves into various decision-making styles, reviews the importance of sifting through data and information, and includes information on ways to engage others and make decisions collectively. Being in charge can be challenging, but with this guide, you don't have to go it alone. Discusses the effects of decision making and outlines the considerations that must be made to gain trust and confidence Demonstrates ways to communicate particularly sensitive decisions, and offers approaches for making bold decisions that challenge the status quo Delves into the risks and benefits of certain decisions, and shows readers the best ways to evaluate choices Outlines smart strategies for engaging others and drawing them into the decision-making process Crucial decisions need to be made every day in the business world, so there's no time to waste. Make Decision Making For Dummies your primary resource for learning to choose your actions wisely and confidently.

**Group Decision Making** Thomas L. Saaty, Kirti Peniwati, 2013-11-15 When a group makes a decision, that decision carries a lot more weight than when just one person does it. Think of the founding fathers of the American constitution and how much power and influence their ideas have had in the entire world for more than two hundred years. Also think of gravity, a universal force brought about by an enormous number of minute particles that band together to make a universal law. Together, they create a massive force, a law of nature; alone they can barely be noticed. That is how our minds work by deciding together to create a power that transcends our individuality. Group decision making is a gift and an opportunity to create greater influence through the working together of many minds. This book shows how to use the Analytic Hierarchy Process for hierarchical decision making and the Analytic Network Process for decision making in networks with dependence and feedback in group decision making. Part I discusses the group and the decision and shows the importance of using a structured process, particularly for those high value decisions involving many powerful parties with different interests. It discusses how to facilitate a group decision, combine individual judgments and smooth differences to arrive at a decision that everyone can live with and get behind. Part II discusses the group in planning and how to draw out differences. Part III is about conflict resolution and Part IV is about how to address significant issues that come up in group decision making and shows that it is possible to construct an overall group preference.

*Managerial Decision Making* Alan J. Rowe, 1984

**Smart Decisions** Thomas N. Martin, 2016-04-29 Today's world is complex and getting more so each day. Huge multinational corporations, international crisis and fast breaking events require most people to make decisions on a daily basis without the tools to understand the long term impact that today's decision might create. Because most people have never really been trained in how to make important complex decisions most people rely on experience, and 'gut reaction' which is okay for many decisions, but not okay for decision that will have meaningful impact on organizations and individual. Decision makers need to develop the art and science of strategic decision making. Here, Professor Thomas Martin explains the need for decision makers to modify their thinking about how they deal with acquiring and analyzing information in each of the decision-making process steps. This approach requiring thinking modification will lengthen the process, make it more complex, and to some more arduous, but the comprehensiveness of the new thinking approach should lead to improved and more effective decision making. In this book, Dr. Martin presents a thinking modification framework that asserts that in the decision-making process, there are three situational states — a current state, future state, and a transitional state that one must deliberate in finding a solution. For each of these situational states, Martin develops an identical five-step process to determine the best decision to make. The steps of this process include: • Change-Needing Situational Analysis • Challenge Framing & Causal Analysis • Generating Solution Ideas • Choosing a Solution Set • Implementation and Aftermath Planning This book will appeal to decision makers, leaders, and students of management who want a specific framework that details the process behind making strategic, well-informed decisions.

**Decision Making by the Book** Haddon Robinson, 2010-10-01 It's said that decisions are made in the details. And yet, we make hundreds, even thousands of decisions daily. So how do Christians process all those details and come up with answers that please God? In Decision-Making by the Book, author, lecturer, and radio personality, Haddon W. Robinson, takes his usual clear-eyed, not-a-word-wasted approach, to help you make decisions according to biblical principles—every time.

**Framing Decisions** J. Davidson Frame, 2012-10-15 The economic crisis of 2008-2009 was a transformational event: it demonstrated that smart people aren't as smart as they and the public think. The crisis arose because a lot of highly educated people in high-impact positions— political power brokers, business leaders, and large segments of the general public—made a lot of bad decisions despite unprecedented access to data, highly sophisticated decision support systems, methodological advances in the decision sciences, and guidance from highly experienced experts. How could we get things so wrong? The answer, says J. Davidson Frame in Framing Decisions: Decision Making That Accounts for Irrationality, People, and Constraints, is that traditional processes do not account for the three critical immeasurable elements highlighted in the book's subtitle— irrationality, people, and constraints. Frame argues that decision-makers need to move beyond their single-minded focus on rational and optimal solutions as preached by the traditional paradigm. They must accommodate a decision's social space and address the realities of dissimulation, incompetence, legacy, greed, peer pressure, and conflict. In the final analysis, when making decisions of consequence, they should focus on people – both as individuals and in groups. Framing Decisions offers a new approach to

decision making that gets decision-makers to put people and social context at the heart of the decision process. It offers guidance on how to make decisions in a real world filled with real people seeking real solutions to their problems.

**Effective Decision Making** Helga Drummond,1996 All management activities involve decision-making of one kind or another which is by no means a straightforward process. Many decisions rely on assimilating a considerable mass of data which may take some time to collect; the decision has to be communicated, and has probably itself been the result of collaboration; and it has to be followed through. Moreover, the manager generally is not in the privileged position of having the time, sound advice or peace of mind conducive to decision-making, let alone within an unchanging context in the workplace.
