Carol S. Dweck

**Mindset** Carol S. Dweck, 2007-12-26 From the renowned psychologist who introduced the world to “growth mindset” comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. “Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life.”—Bill Gates, GatesNotes “It’s not always the people who start out the smartest who end up the smartest.” After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

**Developing Teachers’ Assessment Capacity** Christopher DeLuca, Sandra Johnson, 2019-12-13 Given the academic benefits of assessment-driven teaching, and the growing accountability context of educational systems around the world, there is a rapidly developing need to educate teachers in effectively using assessments to promote, monitor, and report on student learning. However, assessment has historically been a neglected area in teacher education programmes, and empirical research has consistently shown assessment as an area of challenge for many teachers. While there is an increased focus across teacher education and professional literature on enhancing the assessment capacity of educators, there remains little empirical research on innovative and data-based strategies to effectively achieve this goal. The purpose of this text is to consolidate existing research on assessment education and to provoke innovative and effective approaches to educating teachers and teachers-in-training about assessment. Given the dearth of relevant research, this text also considers the matter of retention and extension of initial assessment learning into teaching careers. Combined, the articles in this text provide a foundation for novel thinking about developing teachers’ assessment capacity from pre-service to in-service contexts. This book was originally published as a special issue of *Assessment in Education*.

*Developing as a Reflective Early Years Professional* Carol Hayes, Jayne Daly, Mandy Duncan, Ruth Gill, Ann Whitehouse, 2014-06-10 An up to date and accessible text that takes a critical approach to key themes within the early years, with a focus on reflective practice. The early years sector is subject to constant government scrutiny and policy review. Sound reflective skills can empower practitioners at all levels and the sector as a whole to respond confidently to change. In addition, the introduction of the new Early Years Foundation Stage has enshrined within it the concept of reflective practice and the new Ofsted inspection schedule highlights the importance of self-evaluation and of being part of a reflective team. The text examines theories and research into the nature of reflective practice, how it can be used and how it can improve practice and produce a more responsive and thoughtful, research-based workforce for young children and their families. A range of themes, including global childhood poverty, observation and assessment, leadership, and multi-professional working, are then explored, highlighting the importance and application of reflection throughout these areas of research and practice.

675 Ways to Develop Yourself and Your People Laurel Alexander, 2001-01-01 For most adults, development is a process we associate with external specialists - our parents, teachers, lecturers and trainers; people who have provided us with the stimuli to develop. Few of us feel we are competent to undertake personal development on our own. *675 Ways to Develop Yourself and Your People* offers individuals an alphabet of opportunities for learning in the workplace. The manual recognizes that development at work involves our mind, our body and our spirit and provides strategies and techniques that anyone can adopt. By providing a set of 50 individual learning opportunities and processes, from *Achieving Ambitions* with Goal Setting to *Working with Gender Differences*, Laurel Alexander offers you the Swiss cheese approach (bore a hole at a time and there are soon more holes than cheese) to what can otherwise seem too big a task to even begin. Identify the ideas with which you have greatest empathy, or where you see the greatest need, or simply tackle an opportunity a week. However you choose to approach the process, you'll soon be taking control of your own development, with all of the benefits in terms of increased self-awareness, self-esteem, skill and confidence that this will bring. To help you make the most of each learning opportunity, the manual provides you with over 600 ideas, techniques and activities, for example:- individual tasks and reflections - to help make the learning real;- activities, questions and ideas for working with others - so that you can learn with and from your colleagues;- questions and exercises for use with a mentor;- collections of group activities, role plays and projects - for you to help facilitate the development process in others; and- Internet links - as a springboard to learning opportunities beyond your workplace. This is truly a holistic collection of resources for developing yourself and those around you. Laurel Alexander helps you to engage your (multiple) intelligences, spirituality, physicality, personal and work values and to open your eyes to all of the opportunities you face during your daily work, for developing your skills. Whatever your starting point, here is a blueprint for developing the competence and confidence to turn each of us into our own self-development specialist.

Factfulness Hans Rosling, Anna Rosling Rönnlund, Ola Rosling, 2018-04-03 INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I’ve ever read—an indispensable guide to thinking clearly about the world.” – Bill Gates “Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.” —Melinda Gates Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases. - Former U.S. President Barack Obama Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn’t enough. But I hope this book will be.” Hans Rosling, February 2017.

The authors guide teachers in choosing the best materials and in fostering home-school connections, and share six key principles for building vocabulary. Included are guiding questions; text boxes connecting vocabulary to the Common Core State Standards; examples from real teachers; reproducible checklists, rubrics, and other tools; and an appendix of additional vocabulary resources. Purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1/2 x 11 size.

**Eye Care in Developing Nations, Fourth Edition** Larry Schwab, 2007-07-31 The number of the millions of blind in the world continues to grow, causing needless social and economic deprivation. Most of these blind can be cured, and much of the remainder prevented if all people had access to the simple and effective interventions that already exist. In this newly revised fourth edition of ‘Eye Care in Developing Nations’, the author describes in practical detail, what these interventions consist of and how they can be readily implemented. This is the handyman’s guide to delivering

eye services to low-resource populations, whether they are pockets of poverty in otherwise affluent countries or broadly deprived populations living in the developing world. Demand for the first three editions from around the world has proved this book’s value. In this expanded and updated edition all chapters have been revised to reflect developments in public health and in medical and surgical treatments and techniques. The book’s value is further enhanced in the fourth edition by the greater emphasis given to clinical ophthalmology and the provision for the first time of colour photos and diagrams throughout.

Developing Students’ Statistical Reasoning Joan Garfield,Dani Ben-Zvi,2008-09-08 Increased attention is being paid to the need for statistically educated citizens: statistics is now included in the K-12 mathematics curriculum, increasing numbers of students are taking courses in high school, and introductory statistics courses are required in college. However, increasing the amount of instruction is not sufficient to prepare statistically literate citizens. A major change is needed in how statistics is taught. To bring about this change, three dimensions of teacher knowledge need to be addressed: their knowledge of statistical content, their pedagogical knowledge, and their statistical-pedagogical knowledge, i.e., their specific knowledge about how to teach statistics. This book is written for mathematics and statistics educators and researchers. It summarizes the research and highlights the important concepts for teachers to emphasize, and shows the interrelationships among concepts. It makes specific suggestions regarding how to build classroom activities, integrate technological tools, and assess students’ learning. This is a unique book. While providing a wealth of examples through lessons and data sets, it is also the best attempt by members of our profession to integrate suggestions from research findings with statistics concepts and pedagogy. The book’s message about the importance of listening to research is loud and clear, as is its message about alternative ways of teaching statistics. This book will impact instructors, giving them pause to consider: Is what I’m doing now really the best thing for my students? What could I do better? J. Michael Shaughnessy, Professor, Dept of Mathematical Sciences, Portland State University, USA This is a much-needed text for linking research and practice in teaching statistics. The authors have provided a comprehensive overview of the current state-of-the-art in statistics education research. The insights they have gleaned from the literature should be tremendously helpful for those involved in teaching and researching introductory courses. Randall E. Groth, Assistant Professor of Mathematics Education, Salisbury University, USA
