Human Dimension and Interior Space Julius Panero, Martin Zelnik, 2014-01-21 The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

Dimensions Jacques Vallee, 2013-08 In DIMENSIONS, the first volume of a trilogy, Dr. Jacques Vallee reexamines the historical record that led to the modern UFO phenomenon and to the belief in alien contact. He then tackles the enigma of abduction reports, which come from various times and various countries, as well as the psychic and spiritual components of the contact experience. In the last portion of the book, he notes the factors that inhibit research into the phenomenon--the triple coverup and political motivations--and concludes that the extraterrestrial theory is simply not strange enough to explain the facts.

The Hidden Dimension Edward Twitchell Hall, 1969 An examination of various cultural concepts of space and how differences among them affect modern society. Introducing the science of proxemics, Hall demonstrates how man's use of space can affect personal business relations, cross-cultural exchanges, architecture, city planning, and urban renewal.

The Thought Readers (Mind Dimensions Book 1) Dima Zales, Anna Zaires, 2014-10-02 A new series about mind readers from a New York Times and USA Today bestselling author... Everyone thinks I'm a genius. Everyone is wrong. Sure, I finished Harvard at eighteen and now make crazy money at a hedge fund. But that's not because I'm unusually smart or hard-working. It's because I cheat. You see, I have a unique ability. I can go outside time into my own personal version of reality--the place I call "the Quiet"--where I can explore my surroundings while the rest of the world stands still. I thought I was the only one who could do this--until I met her. My name is Darren, and this is how I became entangled with all the Russians and learned that I'm a Reader.

Evolution in Four Dimensions, revised edition Eva Jablonka, Marion J. Lamb, 2014-03-21 A pioneering proposal for a pluralistic extension of evolutionary theory, now updated to reflect the most recent research. This new edition of the widely read Evolution in Four Dimensions has been revised to reflect the spate of new discoveries in biology since the book was first published in 2005, offering corrections, an updated bibliography, and a substantial new chapter. Eva Jablonka and Marion Lamb's pioneering argument proposes that there is more to heredity than genes. They describe four "dimensions" in heredity--four inheritance systems that play a role in evolution: genetic, epigenetic (or non-DNA cellular transmission of traits), behavioral, and symbolic (transmission through language and other forms of symbolic communication). These systems, they argue, can all provide variations on which natural selection can act. Jablonka and Lamb present a richer, more complex view of evolution than that offered by the gene-based Modern Synthesis, arguing that induced and acquired changes also play a role. Their lucid and accessible text is accompanied by artist-physician Anna Zeligowski's lively drawings, which humorously and effectively illustrate the authors' points. Each chapter ends with a dialogue in which the authors refine their arguments against the vigorous skepticism of the fictional "I.M." (for Ipcha Mistabra--Aramaic for "the opposite conjecture"). The extensive new chapter, presented engagingly as a dialogue with I.M., updates the information on each of the four dimensions--with special attention to the epigenetic, where there has been an explosion of new research. Praise for the first edition "With courage and verve, and in a style accessible to general readers, Jablonka and Lamb lay out some of the exciting new pathways of Darwinian evolution that have been uncovered by contemporary research." --Evelyn Fox Keller, MIT, author of Making Sense of Life: Explaining Biological Development with Models, Metaphors, and Machines "In their beautifully written and impressively argued new book, Jablonka and Lamb show that the evidence from more than fifty years of molecular, behavioral and linguistic studies forces us to reevaluate our inherited understanding of evolution." --Oren Harman, The New Republic "It is not only an enjoyable read, replete with ideas and facts of interest but it does the most valuable thing a book can do--it makes you think and reexamine your premises and long-held conclusions." --Adam Wilkins, BioEssays

Perimeter, Area, and Volume David A. Adler, 2014-01-24 Grab your jumbo popcorn--you're invited to the premiere of a 3-D movie, all about those three dimensions! Trusted math picture book duo David A. Adler and Ed Miller tackle the differences between two- and three-dimensional objects in their signature bright and kid-friendly way. Explaining length, width, and height-- and all the different ways we represent those figures-- Adler shows how changing the dimensions of an object affects its size. . . . with some help from a cast of funny, friendly movie monsters. Explaining key vocabulary in simple text and offering numerous concrete examples and sample math problems with included solutions, Perimeter, Area, and Volume is a perfect introduction to two- and three-dimensional geometry. The star-studded cast of monsters will help you calculate the perimeter of the set, the area of the movie screen, and the volume of your box of popcorn. Learning about dimensions has never been so entertaining!

The Creator's Dimensions Peter. J. Sell, 2008-11-20 This book is pure Sci Fi and NO WIZARDS, MAGIC, DUNGEON'S or

DRAGON's are in it. It is the story of a band of Dimensionaut's who as small pioneering teams venture to the far corners of the Universe. It is their story starting with the problems of the early days of the programme and the trials and tribulations of their many trips to strange worlds. their encounters with both very advanced entities and primitive life forms. It is accounts of their contacts with beings from other dimensions and finally what happened when one of them ends up going outside of the known Universe. The subsequent meeting with the Creator has profound consequences for the human race on her return. Other books by the same author From Blood to Compassion version 1 & 2

Real Encounters, Different Dimensions and Otherworldly Beings Brad Steiger, Sherry Hansen Steiger, 2013-10-01 An expert on the unexplained and paranormal research, Brad and Sherry Steiger turn their unique and remarkable talents to the bold storytelling of encounters with the unknown from throughout the ages. From mysterious strangers and unpredictable beings to weird behavior and paranormal phenomena, they investigate claims of visits from ghastly ghosts, otherworldly creatures, aliens living among us, phantoms, spirits and other accounts of encounters with the unexplained. Over 130 astounding accounts of Real Encounters with the supernatural, such as ... *Visitors from other worlds who have had Earth under surveillance for centuries, conducting their activities in secret-- even abducting humans for their own research and undeclared ends. *Members of secret societies who developed an advanced technology centuries ago which has been kept hidden in underground or undersea cities. *Time Travelers from the Future. Beings who claim to be our descendants from the future who are returning to study the true destiny of humankind. *Ghosts that haunt people, places, and things--and poltergeists that create havoc. *Beasties and monsters found in everyone's worst nightmares--and sometimes in their campsites, fields, and yards. *Other Dimensional Visitors, Beings, Creatures, or Entities that come not from a faraway world in our solar system or any other, but from an adjacent space-time continuum existing on another vibrational/dimensional frequency or level. *Previously unknown, unidentified terrestrial life-forms, such beings as sky-critters, sky fish," "rods," and "orbs." *As yet unknown physical energies that may be activated by the psyche, the unconscious level of the human mind. *Archetypal creatures and entities of the collective unconscious that are the result of energies that are accessible through dreams, meditations, and other states of altered consciousness. *Interactions with beings that have been dubbed elves, fairies, devas throughout the centuries. *The marvelous, creative facet of dreams. *Out-of-body mind-traveling through Time and Space. *Majestic beings who are described in the scriptures of many world religions as angels or demons.

Three Dimensions A. Treffers, 2012-12-06 In Dutch WISKOBAS stands for a particular kind of mathematics in the elementary school (ages 6-12). In tum Wiskobas was one of the depart ments in the IOWO, the Institute for the Development of Mathematics Education. This institute was concerned with the development of material for mathematics education as well as the related research on the possibility of change from the then existing arithmetic instruction to the future mathematics education. The present publication Three Dimensions has three aims: to give a picture of the goals Wiskobas set for future mathematics education, at the same time to show how such goals can be described, and to show the theoretical framework of the Wiskobas curriculum. The problem at hand is not at all simple. What is more, Wiskobas' ideas about mathematics education cannot literally be translated into strings of words. So how can we face the accusation that our objectives are unattain able and the goal itself irrational? In order to avoid this vagueness as much as possible and for the sake of clarity, this book makes continuous use of illustrations of mathematics education. In these examples both the subject-matter and the methods of description of the goals are illustrated as explicitly as possible, while at the same time creating the opportunity to read between the lines. The reader is urged to follow carefully the mathe matical material at the start of each chapter. This advice applies both to the more general education oriented, and to the more mathematical! didactical reader.

Dimensions of the Sacred Ninian Smart, 1996 Dimensions of the Sacred is arguably one of the most comprehensive and readable accounts of religion that we have had in the past thirty years. Not only does it provide a rich analysis of religious experience, but he also includes much that has been overlooked by other interpreters of the world's religions.--Richard D. Hecht, coauthor of The Sacred Texts of the World

Exploring the Dimensions of Human Sexuality Jerrold S. Greenberg, Clint E. Bruess, Sara B. Oswalt, 2016-02-16 Fully revised and updated with the latest data in the field, the Sixth Edition of Exploring the Dimensions of Human Sexuality represents all aspects of human sexuality and explores how it affects personality, development, and decision making. Using a student-friendly interpersonal approach, the text discusses contemporary concepts as well as controversial topics in a sensitive manner, and covers the physiological, biological, psychological, spiritual, and cultural dimensions of human sexuality. Exploring the Dimensions of Human Sexuality is an essential text for

teaching sexuality and presents an integrated view of human sexuality that encourages students to pursue positive decisions, sexual health, and a lifetime of wellness.

The Cosmology of Extra Dimensions and Varying Fundamental Constants Carlos Martins, 2013-04-17 The workshop on The Cosmology of Extra Dimensions and Varying Fundamental Constants, which was part of JENAM 2002, was held at the Physics Department of the University of Porto (FCUP) from the 3rd to the 5th of September 2002. It was regularly attended by about 110 participants, of which 65 were officially registered in the VFC workshop, while the others came from the rest of the JENAM workshops. There were also a few science correspondents from the national and international press. During the 3 days of the scientific programme, 8 Invited Reviews and 30 Oral Communications were presented. The speakers came from 11 different European countries, and also from Argentina, Australia, Canada, Japan and the U.S.A. There were also speakers from six Portuguese research institutions, and nine of the speakers were Ph.D. students. The contributions are presented in these proceedings in chronological order. The workshop brought together string theorists, particle physicists, theoretical and observational cosmologists, relativists and observational astrophysicists. It was generally agreed that this inter-disciplinarity was the greatest strength of the workshop, since it provided people coming into this very recent topic from the various different backgrounds with an opportunity to understand each other's language and thereby gain a more solid understanding of the overall picture.

The 4 Dimensions of Extraordinary Leadership Jenni Catron, 2015-12-01 You have the capacity to become an extraordinary leader—if you are willing to embrace a deeper definition of leadership and take action to apply it. In *The 4 Dimensions of Extraordinary Leadership*, Jenni Catron, executive church leader and author of *Clout*, reveals the secrets to standout leadership found in the Great Commandment: “Love the Lord your God with all your heart and with all your soul and with all your mind and with all your strength.” Weaving a winsome narrative filled with inspiring real-life stories, hard-won wisdom, and practical applications, Catron unpacks four essential aspects of growing more influential: your heart for relational leadership, your soul for spiritual leadership, your mind for managerial leadership, and your strength for visionary leadership. Leadership isn’t easy, but it is possible to move from ordinary to extraordinary. Jenni Catron shows the way.
