Byron's Journal of his Circumnavigation, 1764-1766 Robert E. Gallagher,2017-05-15 In 1764 the Hon. John Byron was commissioned by the Admiralty to sail to the South Atlantic to search for Pepys's Island and the Southern Continent. He was then to continue into the Pacific itself and look for a possible North-west passage. Although he rediscovered the Falkland Islands, it was after the French had done so under Bougainville, and he made no attempt to search for a North-west passage at all, but sailed straight on round the world, making no discoveries of any importance. The journal which Byron kept during his voyage has been edited and annotated by Dr Gallagher. In his Introduction he describes earlier voyages of a similar nature and sketches the background to this voyage. He assesses Byron's achievement and considers why he disobeyed his orders. Apart from the Journal, the Admiralty's 'secret instructions' to Byron are also printed here, as well as Byron's letter to the Admiralty explaining why he was sailing straight on. There is an appendix by Dr Helen Wallis on the Patagonian giants. This is a new print-on-demand hardback edition of the volume first published in 1964.

The Sonar of Dolphins Whitlow W.L. Au,2012-12-06 The extraordinary ability of dolphins to echolocate has fascinated scientists and the public since its discovery in the late 1950's. This is the first book to summarize modern research in this area, and presents a broad synthesis of this very interdisciplinary subject. The author is an internationally-recognized expert on dolphin sonar and is thus in a unique position to bring together research on the physiological, mathematical and engineering aspects of the subject. Of interest to auditory researchers, electrical engineers, acoustical physicists, and mammalian physiologists.

Dolphin Mysteries Kathleen M. Dudzinski,Toni Frohoff,2008-10-14 Dolphins have fascinated humans for millennia, giving rise to an abundance of stories and myths about them, yet the actual details of their lives in the sea have remained elusive. In this enthralling book, Kathleen M. Dudzinski and Toni Frohoff take us into the dolphins' aquatic world to witness firsthand how they live their lives, communicate, and interact with one another and with other species, including people. Kathleen M. Dudzinski and Toni Frohoff are scientists who have collectively dedicated more than 40 years to studying dolphins beneath the ocean's surface, frequently through a close-up underwater lens. Drawing on their own experiences and on up-to-the-minute research, the authors show that dolphins are decidedly not just members of a group but distinct individuals, able to communicate with one another and with humans. Dudzinski and Frohoff introduce a new way of looking at, and listening to, the vocabulary of dolphins in the sea, and they even provide an introductory dolphin dictionary, listing complex social signals that dolphins use to share information among themselves and with people. Unveiling an intimate and scientifically accurate portrait of dolphins, this book will appeal to everyone who has wanted a closer glimpse into the hearts and minds of these amazing creatures.
