The Doser Story William Doser,Mabel Doser,2013-09 The North Meets the South... A young lad from Cleveland, Ohio, graduates from college, then goes south to Seminary, and receives his first appointment of three rural churches in Lincoln County, North Carolina. He meets the pianist at one of the churches. They find they have some of the same Christian and sociological values. They marry and begin serving various churches for a number of years. Later, they take a sabbatical and then retire. The husband begins to design cross stitch and needlepoint pieces for churches. They form their own company, Doser Designs. Two books are written featuring some of the designs. Clergy Stoles for Cross Stitch or Needlepoint and Church Paraments In Needlework (Both books are now out of print.) The husband had the privilege of stitching one of the squares in the United Nations Peace Rug and giving the Invocation when the Rug was presented. After thirty years of designing he retired again.. While on the sabbatical and then in retirement they traveled, making a trip to England, Scotland, and Wales with the American Needlepoint Guild. They had the privilege of meeting Princes Grace of Monaco and having a private tour of the palace. They traveled to Nova Scotia. The Dosers are both Life Members of The Order of Saint Luke and have traveled in the United States for the Council meetings and Retreats of the order. Through the years they have had their health problems but feel they have been able to overcome them. They celebrated their 53rd wedding anniversary this year.

The Semantic Web. Latest Advances and New Domains Harald Sack,Eva Blomqvist,Mathieu d'Aquin,Chiara Ghidini,Simone Paolo Ponzetto,Christoph Lange,2016-05-22 The 47 revised full papers presented together with three invited talks were carefully reviewed and selected from 204 submissions. This program was completed by a demonstration and poster session, in which researchers had the chance to present their latest results and advances in the form of live demos. In addition, the PhD Symposium program included 10 contributions, selected out of 21 submissions. The core tracks of the research conference were complemented with new tracks focusing on linked data; machine learning; mobile web, sensors and semantic streams; natural language processing and information retrieval; reasoning; semantic data management, big data, and scalability; services, APIs, processes and cloud computing; smart cities, urban and geospatial data; trust and privacy; and vocabularies, schemas, and ontologies.

Fuel Systems for IC Engines Institution of Mechanical Engineers,2012-03-06 This book presents the papers from the latest conference in this successful series on fuel injection systems for internal combustion engines. It is vital for the automotive industry to continue to meet the demands of the modern environmental agenda. In order to excel, manufacturers must research and develop fuel systems that guarantee the best engine performance, ensuring minimal emissions and maximum profit. The papers from this unique conference focus on the latest technology for state-of-the-art system design, characterisation, measurement, and modelling, addressing all technological aspects of diesel and gasoline fuel injection systems. Topics range from fundamental fuel spray theory, component design, to effects on engine performance, fuel economy and emissions. Presents the papers from the IMechE conference on fuel injection systems for internal combustion engines Papers focus on the latest technology for state-of-the-art system design, characterisation, measurement and modelling; addressing all technological aspects of diesel and gasoline fuel injection systems Topics range from fundamental fuel spray theory and component design to effects on engine performance, fuel economy and emissions

Liming Acidic Surface Waters Harvey Olem,1990-11-26 An encyclopedic work! This comprehensive volume is an impressive integration of European and North American research, providing the most complete information to date regarding the problems and solutions associated with aquatic liming. The book gives readers a thorough understanding of the complexities of liming by providing detailed information on design, use, and effects of liming systems for acidic surface waters. It also includes a complete and objective review of liming successes and failures, providing additional information to help readers determine how well a particular method will restore and protect the affected biota. This book is essential for anyone interested in the restoration of acidic lakes and streams.

Experimental Innovations in Surface Science John T. Yates Jr.,2015-08-17 This book is a new edition of a classic text on experimental methods and instruments in surface science. It offers practical insight useful to chemists, physicists, and materials scientists working in experimental surface science. This enlarged second edition contains almost 300 descriptions of experimental methods. The more than 50 active areas with individual scientific and measurement concepts and activities relevant to each area are presented in this book. The key areas covered are: Vacuum System Technology, Mechanical Fabrication Techniques, Measurement Methods, Thermal Control, Delivery of Adsorbates to Surfaces, UHV Windows, Surface Preparation Methods, High Area Solids, Safety. The book is written for researchers and graduate students.

Specimen Handling, Preparation, and Treatments in Surface Characterization Alvin W. Czanderna,Cedric J. Powell,Theodore E. Madey,2006-04-11 With the development in the 1960s of ultrahigh vacuum equipment and techniques and electron, X-ray, and ion beam techniques to determine the structure and composition of interfaces, activities in the field of surface science grew nearly exponentially. Today surface science impacts all major fields of study from physical to biological sciences, from physics to chemistry, and all engineering disciplines. The materials and phenomena characterized by surface science range from semiconductor materials, where the impact of surface science has been critical to progress, to metals and ceramics, where selected contributions have been important, to biological materials, where contributions are just beginning to impact the field, to textiles, where the impact has been marginal. With such a range of fields and applications, questions about sample selection, preparation, treatment, and handling are difficult to cover completely in one review article or one chapter. Therefore, the editors of this book have assembled a range of experts with experience in the major fields impacted by surface characterization. It is the only book which treats the subject of sample handling, preparation, and treatment for surface characterization. It is full of tricks, cautions, and handy tips to make the laboratory scientist's life easier. With respect to organization of the book, the topics range from discussion of vacuum to discussion of biological, organic, elemental or compound samples, to samples prepared ex situ or in situ to the vacuum, to deposition of thin films. Generic considerations of sample preparation are also given.
