Essential Empowerment Paulette Meijer,2012-10-02 For the twenty-five-plus years I have been a speaker, trainer, coach, consultant and mentor, I have had the pleasure of working with people who have achieved tremendous success in their business and their personal lives. In fact, they're often the same people. This book evolved out of Essential Empowerment Paint Your New Life Canvas Workshops where participants closely examine their immediate life state, then define, refine and articulate their vision for their future. Workshop exercises begin and end with life canvases personal artful expressions of current being and future being. You'll see a few of those personal artful expression scattered throughout the book. Those personal canvases and the aggregate exercises, here and in the classroom, are integral parts of the process of personal development. Your first thought will be to put that piece of the book aside until after you've read through and evaluated every chapter. Don't dismiss their value. Some words used to describe canvases have been: insightful, enlightening, cathartic, and even illuminating. Indulge me no, don't indulge me. Do it for you. Become a participant in the progress of your life. Embrace your journey to Essential Empowerment. I hope to see you at an Essential Empowerment Paint Your New Life Canvas Workshop one day. In the meantime read on and paint your new life canvas!

Women Empowerment: Challenges and Strategies ,2019-11-30 The proposed edited book on Women Empowerment: Challenges and Strategies, deals with the problems associated with the women community suffering from marginalization and the ways to address their identity and human rights concerns. The status of women in every nation was deprived and never considered. They were considered as mere machines to fulfill mere different duties. During ancient ages, we can see the evolution of changing and taking new perspectives. The concept of female in Manusmriti and in Puranas of considering them as dependents and deities is contradictory. There are still places where women are still considered as deprived and are still under chains it is the duty of the privileged to empower the underprivileged. Women empowerment programs failed as they overlooked the structural factors that perpetuated oppression and exploitation. The fulfillment of practical needs such as food, health care, and education cannot empower women unless the long-term strategic needs are met. The process of empowerment requires a transformation of structures of sub ordinance, control over material and intellectual resources, gaining decisions, making authority and reduction of gender inequality. The present book is the collection of Twenty-two research papers enlightens and thought-provoking articles contributed by research scholars throwing light on the women empowerment and role of religion and policies, women and nutrition, gender sensitization, role of education, status of working women in unorganized sector, role of media and NGO in promoting women empowerment, empowerment of Indian women – a challenge of 21st century, life skills and older women with reference to old age homes, depiction of women in literature and Marginalization of Women Characters in literature, social organization and woman empowerment and entrepreneurship. The book will be an important reference source for scholars in the fields of rights of the marginalized sections, rights of the women, the role of education & practice and gender studies. The purpose of this edited book is to provide a common platform for academicians and policymakers for a comprehensive deliberation on issues relating to social sector development in our society. The research papers and various articles covering so many themes of social awareness for education and social sector development are compiled in one place so that anyone can get easy access to their research. This book is edited basically for the students, teachers, researchers, and academics. The students pursuing their masters/ Ph.D. degree and doing dissertations/thesis on women empowerment may also be highly benefited by this book.

The 3 Keys to Empowerment Ken Blanchard, John P. Carlos, Alan Randolph,2000-01-13 An action guide and macro-level understanding of the process required to foster the workplace culture envisioned in Empowerment Takes More Than a Minute. As Ken Blanchard, John Carlos, and Alan Randolph clearly demonstrated in their previous bestseller, Empowerment Takes More Than a Minute, empowerment is not a goal that can be achieved in a minute. Empowerment is a process that requires ongoing effort, awareness, and commitment to transforming the hierarchy. This essential guide offers managers detailed, hands-on answers to their real-life questions about how, exactly, they can navigate the journey to empowerment. Written in an easily accessible Q&A format, the book closely examines and expands on the three keys to empowerment originally presented in Empowerment Takes More Than a Minute—sharing information, creating autonomy through boundaries, and replacing the hierarchy with teams. It clearly outlines the promises and challenges of each stage of the journey, providing managers with thought-provoking questions, clear advice, effective activities, and action tools that will help them create a culture of empowerment. Wherever they are in the journey, managers will find a clear roadmap in this user-friendly action guide. Praise for Empowerment Takes More Than a Minute “The most truthful, straight-talk book on managing people to come along in eons. This is an exceptional tool for business.” —Harvey MacKay, #1 New York Times bestselling author “One of the very best organized, thought out, planned, and written books on any business subject I have read.” —Stanley Bass, Human Resources Consultant, Stan Bass Consulting

Empowerment of Women for Promoting Health and Quality of Life Snehendu B. Kar,2018-05-18 Empowerment of Women for Promoting Health and Quality of Life critically reviews the key theoretical and empirical foundations and policy options for Global Public Health (GPH). The author presents the lessons learned from a meta-analysis of 80 self-organized, successful women's empowerment case studies across the world that have enhanced the health and well-being of their families and communities. The information gleaned offers rare opportunities for understanding what works, how women empower themselves, and how others--professionals included--can help. Additionally, Dr. Kar designs an EMPOWER model for empowerment of women for GPH and human development. Using an ecological perspective, the model defines the domains, dimensions, and processes of empowerment, and is applied to a community-based women's empowerment-for-health-promotion initiative. The implications for empowerment and GPH policy, practice, and research are also discussed.

Empowerment and Women's Health Jane Stein,1997-04 A comprehensive analysis of the links between women's empowerment and health, this work looks at what determines success in the fight for better conditions, the redistribution of power, and control of resources. Linking international development policies with women's situations, the theories of women's health with the lives of individuals, the author reveals the complex connections, associations, and interactions in the web of factors relevant to health. This study should be of value to anyone interested in health care issues, and states the case for an international feminist agenda attentive to local cultural idioms.

Measuring Empowerment in Practice Ruth Alsop, Nina Heinsohn,2012 Alsop and Heinsohn present an analytic framework that can be used to measure and monitor empowerment processes and outcomes. The measuring empowerment framework, rooted in both conceptual discourse and measurement practice, illustrates how to gather data on empowerment and structure its analysis. The framework can be used to measure empowerment at both the intervention level and the country level, as a part of poverty or governance monitoring. The authors first provide a definition of empowerment and then explain how the concept can be reduced to measurable components. Empowerment is defined as a person's capacity to make effective choices--that is, the capacity to transform choices into desired actions and outcomes. The extent or degree to which a person is empowered is influenced by personal agency (the capacity to make purposive choice) and opportunity structure (the institutional context in which choice is made). Asset endowments are used as indicators of agency.

These assets may be psychological, informational, organizational, material, social, financial, or human. Opportunity structure is measured by the presence and operation of formal and informal institutions, including the laws, regulatory frameworks, and norms governing behavior. Degrees of empowerment are measured by the existence of choice, the use of choice, and the achievement of choice. Following the conceptual discussion and the presentation of the analytic framework, the authors show how the measuring empowerment framework can be applied using examples from four development interventions. Each example discusses how the framework guided analysis and development of empowerment indicators. They also present a draft module for measuring empowerment at the country level. The module can be used alone or be integrated into country-level poverty or governance monitoring systems that seek to add an empowerment dimension to their analysis. This paper--a product of the Poverty Reduction Group, Poverty Reduction and Economic Management Network--is part of a larger effort in the network to conceptualize, operationalize, and measure empowerment--Abstract.

The Power of Empowerment Bill Ginnodo,1997 Ginnodo demonstrates that employee empowerment is more than theory and buzzword. The book shows how leading companies improve the performance of employees and managers--as well as customer satisfaction, costs, competitiveness and the bottom line--by giving individuals and teams the power to take action.

Women's Empowerment and Global Health Shari Dworkin, Monica Gandhi, Paige Passano, 2016-11-01 What is women's empowerment, and how and why does it matter for women's health? These are questions that the University of California Global Health Institute's (UCGHI) Center of Expertise (COE) on Women's Health, Gender, and Empowerment aimed to answer with this book. Since 2009 the COE has brought together a multidisciplinary network of experts from across the University of California (UC) campuses and departments, along with their global partners, to advance research and education on what has become a capstone theme in the global health and development agenda: women's and girls' empowerment and health. Women's Empowerment and Global Health demonstrates the outcomes of COE's commitment to advance pedagogy and present the work of thought leaders in this domain. Despite the rise of a human rights-based approach to health and increasing awareness of the synergies between women's health and empowerment, a lack of consensus remains as to how to operationalize empowerment in ways that improve health. Women's Empowerment and Global Health presents thirteen multidisciplinary case studies that demonstrate how science and advocacy can be creatively merged to enhance the agency and status of girls and women. The book is organized into two sections, the first focused on sociocultural, educational, and health systems interventions, and the second on economic, policy, and structural interventions. Seven of the chapters are enriched by complementary videos that provide readers with context about programs in India, Kenya, the United States, Mexico, Nicaragua, Zimbabwe, and South Africa. Women's Empowerment and Global Health provides the next generation of researchers and practitioners, as well as students in global and public health, sociology, anthropology, women's studies, law, business, and medicine, with cutting-edge and inspirational examples of programs that point the way toward achieving women's equality and the positive outcome of empowerment on health.

Community Power and Empowerment Brian D. Christens, 2019-01-16 Many people want to help bring about changes in their neighborhoods, workplaces, and communities. Leaders and scholars of change efforts are likewise eager for insights into what makes some organizations and coalitions capable of building and exercising power. Why are some groups successful in making changes in policies and systems and in sustaining their momentum over time, while others struggle or never really get off the ground? With Community Power and Empowerment, Brian D. Christens brings the most comprehensive analysis of empowerment theory yet conducted to bear on these questions, taking aim at many of the longstanding weaknesses and ambiguities of empowerment theory, research, and practice. For example, one major hindrance is that most notions of empowerment have not been coherently connected with community power. In addition, research has emphasized psychological aspects of empowerment over organizational processes, and has neglected community empowerment processes to an even greater extent. By linking empowerment and community power, Christens constructs a holistic framework for assessing and comparing community-driven change efforts. This book offers new guidance for inquiries into outcomes and impacts of empowerment processes on health and well-being, providing a resource for researchers, organizational leaders, practitioners, and anyone interested in collective action for change.

The Psychology of Employee Empowerment Rozana Ahmad Huq, 2016-03-03 The complexities of employee empowerment have been largely underestimated and it is clear that organisations struggle with putting the concept into practice. Rozana Ahmad Huq recognises that effective utilisation of human resources is a strategic issue for organisations. Hierarchical organisations struggle to survive. The growing trend for downsizing and merging of organisations means that they can no longer maintain the 'command and control' approach and employees are given more responsibility and expected to take decisions. However, simply burdening employees with extra responsibility without empowering them does not deliver results. Drawing on her own research in organisations, Dr Huq investigates the concept of empowerment in a new way that combines themes from the disciplines of management and social work, the latter being a domain where empowerment is an important construct. This helps to bridge the gaps in knowledge in the management domain and draws attention to the positive and negative psychological implications for employees of the practice of empowerment that are often ignored by leaders and managers. Ultimately, the author offers a 'practice model' to help people in management and non-management understand the new roles and behaviours that they need to adopt if empowerment is to become a reality. This book is a resource for any business or other

organisation genuinely interested in employee empowerment and for those with a responsibility for teaching about it.

The Myth of Empowerment Associate Professor of Social Work Dana Becker,Dana Becker,2005-02 Her power; today, her power is said to reside in her ability to`relate" to others or to take better care of herself so that she can take care of others. Dana Becker argues that ideas like empowerment perpetuate the myth that many of the problems women have are medical rather than societal; personal rather than political. From mesmerism to psychotherapy to the Oprah Winfrey Show, women have gleaned ideas about who they are as psychological beings. Becker questions what women have had to.

The Politics of Empowerment Robert Weissberg,1999-03-30 On today's menu of remedies for our social and economic ills, empowerment has become immensely popular. The scholarly literature abounds with it: computerized searches yield thousands of citations in myriad disciplines. The education profession seems intoxicated by it; it infuses the entire political spectrum—from Marxists to feminists, from Black Power advocates to conservatives. As Weissberg points out, all assume, typically with more hope than proof, that if only people seized control of their lives, betterment would surely ensue. Allegedly, empowerment will cure everything from personal disorders to declining city centers. Weissberg conducts an FDA-like inquiry across numerous academic disciplines to assess the worthiness of this cure. He balances a close reading of the underlying theoretical foundations with empirically demonstrated effectiveness. Entire chapters are devoted to empowerment as a cure for personal problems ranging from health to homelessness, education, community development, and the problems afflicting African Americans. Despite all the promises, however, evidence of accomplishment is not forthcoming. Indeed, as Weissberg demonstrates, much of the evidence is twisted to disguise failure. Worse, much of this helpfulness is merely admonitions for greater dependency and misdirection away from cures of proven utility. Given that almost all this advice emanates from academics, the discrepancy between promise and result raises some troubling issues about today's academy. Clearly, professors do not suffer from ill-conceived remediation though their careers may flourish from publications about uplifting. Bound to be controversial, ^IThe Politics of Empowerment^R is a tonic for social scientists, policy makers, and citizens concerned with America's myriad sociopolitical problems.

Empowerment in Practice Ruth Alsop,Mette Frost Bertelsen,Jeremy Holland,2006 This publication examines the empowerment approach to development, that is, empowering the poor in developing countries to improve their individual circumstances. Poverty reduction is at the heart of the empowerment issue, and the development of suitable and effective frameworks are required in order to push forward the development prospects of the poor, particularly through improved infrastructures within society, but more importantly by designing policies and intervention approaches which can deliver improvements to individual lives. This publication therefore seeks to help both policy makers and practitioners in establishing an empowerment framework to achieve the goal of reducing poverty. The book contains five cases studies from Brazil, Ethiopia, Honduras, Indonesia and Nepal, detailing efforts to apply the empowerment framework, each working in a different sector.
