Radical Kate Pickert, 2019-10-01 In this powerful and unflinching page-turner (New York Times), a healthcare journalist examines the science, history, and culture of breast cancer. As a health-care journalist, Kate Pickert knew the emotional highs and lows of medical treatment well -- but always from a distance, through the stories of her subjects. That is, until she was unexpectedly diagnosed with an aggressive type of breast cancer at the age of 35. As she underwent more than a year of treatment, Pickert realized that the popular understanding of breast care in America bears little resemblance to the experiences of today's patients and the rapidly changing science designed to save their lives. After using her journalistic skills to navigate her own care, Pickert embarked on a quest to understand the cultural, scientific and historical forces shaping the lives of breast-cancer patients in the modern age. Breast cancer is one of history's most prolific killers. Despite billions spent on research and treatments, it remains one of the deadliest diseases facing women today. From the forests of the Pacific Northwest to an operating suite in Los Angeles to the epicenter of pink-ribbon advocacy in Dallas, Pickert reports on the turning points and people responsible for the progress that has been made against breast cancer and documents the challenges of defeating a disease that strikes one in eight American women and has helped shape the country's medical culture. Drawing on interviews with doctors, economists, researchers, advocates and patients, as well as on journal entries and recordings collected over the author's treatment, *Radical* puts the story of breast cancer into context, and shows how modern treatments represent a long overdue shift in the way doctors approach cancer -- and disease -- itself.

Malignant S. Lochlann Jain, 2013-10-15 Nearly half of all Americans will be diagnosed with an invasive cancer—an all-too ordinary aspect of daily life. Through a powerful combination of cultural analysis and memoir, this stunningly original book explores why cancer remains so confounding, despite the billions of dollars spent in the search for a cure. Amidst furious debates over its causes and treatments, scientists generate reams of data—information that ultimately obscures as much as it clarifies. Award-winning anthropologist S. Lochlann Jain deftly unscrambles the high stakes of the resulting confusion. Expertly reading across a range of material that includes history, oncology, law, economics, and literature, Jain explains how a national culture that simultaneously aims to deny, profit from, and cure cancer entraps us in a state of paradox—one that makes the world of cancer virtually impossible to navigate for doctors, patients, caretakers, and policy makers alike. This chronicle, burning with urgency and substance leavened with brio and wit, offers a lucid guide to understanding and navigating the quicksand of uncertainty at the heart of cancer. *Malignant* vitally shifts the terms of an epic battle we have been losing for decades: the war on cancer.

Good Cops David A. Harris, 2005-03-14 Police departments across the country have begun to embrace a new approach to law enforcement based on accountability to citizens, better leadership, and collaboration with the communities they serve. Standing in marked contrast to “Ashcroft policing,” these new strategies are exactly what police need both to make the streets of our cities and towns safer, and to prevent terrorism. David Harris, law professor and nationally known expert on police profiling, has spent the last five years visiting police forces across the country, collecting examples of smart, progressive law enforcement. Drawing on successful strategies currently in use in Detroit, Boston, San

Diego, and other cities and towns all over the country, all of which have reduced crime without infringing on civil rights, Harris here unveils the concept of “preventive policing,” a term he has coined to meld these strategies into a new vision for good cops. From preventive policing’s founding principles to its real-world applications, Harris shows that the solutions to reducing crime, fighting terror, and preserving civil liberties are within reach—if only the Department of Justice will listen.

Personalized Medicine in the Making Chiara Beneduce, Marta Bertolaso, 2022-03-07 This book offers a multidisciplinary look at the much-debated concept of “personalized medicine”. By combining a humanistic and a scientific approach, the book builds up a multidimensional way to understand the limits and potentialities of a personalized approach in medicine and healthcare. The book reflects on personalized medicine and complex diseases, the relationship between personalized medicine and the new biotechnologies, personalized medicine and personalized nutrition, and on some ethical, political, economic, and social implications of personalized medicine. This volume is of interest to researchers from several disciplines including philosophy, bio-medicine, and the social sciences. The Other Side of Prospect: A Story of Violence, Injustice, and the American City Nicholas Dawidoff, 2022-10-18 A landmark work of intimate reporting on inequality, race, class, and violence, told through a murder and intersecting lives in an iconic American neighborhood. One New Haven summer evening in 2006, a retired grandfather was shot point-blank by a young stranger. A hasty police investigation culminated in innocent sixteen-year-old Bobby being sentenced to prison for thirty-eight years. New Haven native and acclaimed author Nicholas Dawidoff returned home and spent eight years reporting the deeper story of this injustice, and what it reveals about the enduring legacies of social and economic disparity. In *The Other Side of Prospect*, he has produced an immersive portrait of a seminal community in an old American city now beset by division and gun violence. Tracing the histories of three people whose lives meet in tragedy—victim Pete Fields, likely murderer Major, and Bobby—Dawidoff indelibly describes optimistic families coming north from South Carolina as part of the Great Migration, for the promise of opportunity and upward mobility, and the harrowing costs of deindustrialization and neglect. Foremost are the unique challenges confronted by children like Major and Bobby coming of age in their “forgotten” neighborhood, steps from Yale University. After years in prison, with the help of a true-believing lawyer, Bobby is finally set free. His subsequent struggles with the memories of prison, and his heartbreaking efforts to reconnect with family and community, exemplify the challenges the formerly incarcerated face upon reentry into society and, writes Reginald Dwayne Betts, make this “the best book about the crisis of incarceration in America.” *The Other Side of Prospect* is a reportorial tour de force, at once a sweeping account of how the injustices of racism and inequality reverberate through the generations, and a beautifully written portrait of American city life, told through a group of unforgettable people and their intertwined experiences.
