The European Rescue of the Nation-state Alan S. Milward,2000 Newly revised and updated, this second edition is the classic economic and political account of the origins of the European Community book offers a challenging interpretation of the history of the western European state and European integration.

Europe's Promise Steven Hill,2010-01-19 A quiet revolution has been occurring in post-World War II Europe. A world power has emerged across the Atlantic that is recrafting the rules for how a modern society should provide economic security, environmental sustainability, and global stability. In Europe's Promise, Steven Hill explains Europe's bold new vision. For a decade Hill traveled widely to understand this uniquely European way of life. He shatters myths and shows how Europe's leadership manifests in five major areas: economic strength, with Europe now the world's wealthiest trading bloc, nearly as large as the U.S. and China combined; the best health care and other workfare supports for families and individuals; widespread use of renewable energy technologies and conservation; the world's most advanced democracies; and regional networks of trade, foreign aid, and investment that link one-third of the world to the European Union. Europe's Promise masterfully conveys how Europe has taken the lead in this make-or-break century challenged by a worldwide economic crisis and global warming.

Early European History Hutton Webster,1917 The first twelve chapters of the present work are based upon the author's Ancient history, published four years ago. Suggestions for further study: pages xxiv-xxxv.

The Unsettling of Europe Peter Gatrell,2019-08-27 An acclaimed historian examines postwar migration's fundamental role in shaping modern Europe Migration is perhaps the most pressing issue of our time, and it has completely decentered European politics in recent years. But as we consider the current refugee crisis, acclaimed historian Peter Gatrell reminds us that the history of Europe has always been one of people on the move. The end of World War II left Europe in a state of confusion with many Europeans virtually stateless. Later, as former colonial states gained national independence, colonists and their supporters migrated to often-unwelcoming metropolises. The collapse of communism in 1989 marked another fundamental turning point. Gatrell places migration at the center of post-war European history, and the aspirations of migrants themselves at the center of the story of migration. This is an urgent history that will reshape our understanding of modern Europe.

The European Book in the Twelfth Century Erik Kwakkel,Rodney Thomson,2018-07-26 The 'long twelfth century' (1075-1225) was an era of seminal importance in the development of the book in medieval Europe and marked a high point in its construction and decoration. This comprehensive study takes the cultural changes that occurred during the 'twelfth-century Renaissance' as its point of departure to provide an overview of manuscript culture encompassing the whole of Western Europe. Written by senior scholars, chapters are divided into three sections: the technical aspects of making books; the processes and practices of reading and keeping books; and the transmission of texts in the disciplines that saw significant change in the period, including medicine, law, philosophy, liturgy, and theology. Richly illustrated, the volume provides the first in-depth account of book production as a European phenomenon.

The Uniting of Europe Stanley Henig,2006-10-19 The Uniting of Europe: From Discord to Concord by Stanley Henig provides an introduction to the history of European integration. The author places European unification within a wider political and economic context. He shows how institutional developments have been conditioned by wider international considerations.Including a succinct but comprehensive account of the structure, functions and working of the major European institutions, this book considers:* the impact of the Cold War and the superpowers on Europe* Britain's decision to join the Community* the conse.

Modern and Contemporary European History Jacob Salwyn Schapiro,1918

The European Union: A Citizen's Guide Chris Bickerton,2016-05-12 The essential Pelican introduction to the European Union - its history, its politics, and its role today For most of us today, 'Europe' refers to the European Union. At the centre of a seemingly never-ending crisis, the EU remains a black box, closed to public understanding. Is it a state? An empire? Is Europe ruled by Germany or by European bureaucrats? Does a single European economy exist after all these years of economic integration? And should the EU have been awarded the Nobel peace prize in 2012? Critics tell us the EU undermines democracy. Are they right? In this provocative volume, political scientist Chris Bickerton provides an answer to all these key questions and more at a time when understanding what the EU is and what it does is more important than ever before.

Readings in Modern European History: Europe since the Congress of Vienna James Harvey Robinson,Charles Austin Beard,1909

Euro-Visions Mariana Liz,2016-09-22 European cinema not only occupies a dominant place in film history, it is also a field that has been raising more interest with the expanding work on the transnational. Euro-Visions asks what idea of Europe emerges, is represented and constructed by contemporary European film. Adopting a broad and wide-ranging approach, Euro-Visions mixes political sources, historical documents and filmic texts and offers an integration of policy and economic contexts with textual analysis. Mariana Liz examines costume dramas, biopics and war films, mainstream co-productions and tales of 'Fortress Europe' by renowned auteurs, showing how films from different European nations depict and contribute to the formation of the idea of Europe. Case studies include Girl with a Pearl Earring, La Vie en Rose, Black Book, Good Bye Lenin!, Match Point and The Silence of Lorna.

The European Anarchy Goldsworthy Lowes Dickinson,1916

Faces of Degeneration Daniel Pick,1989 Exploring the historical contexts in France, Italy, and England within which the idea was developed, this text traces the political issues to which the concept of degeneration gave rise during the period from the revolutions of 1848 to the First World War and beyond.

The Brussels Effect Anu Bradford,2020-01-27 For many observers, the European Union is mired in a deep crisis. Between sluggish growth; political turmoil following a decade of austerity politics; Brexit; and the rise of Asian influence, the EU is seen as a declining power on the world stage. Columbia Law professor Anu Bradford argues the opposite in her important new book The Brussels Effect: the EU remains an influential superpower that shapes the world in its image. By promulgating regulations that shape the international business environment, elevating standards worldwide, and leading to a notable Europeanization of many important aspects of global commerce, the EU has managed to shape policy in areas such as data privacy, consumer health and safety,

environmental protection, antitrust, and online hate speech. And in contrast to how superpowers wield their global influence, the Brussels Effect - a phrase first coined by Bradford in 2012- absolves the EU from playing a direct role in imposing standards, as market forces alone are often sufficient as multinational companies voluntarily extend the EU rule to govern their global operations. The Brussels Effect shows how the EU has acquired such power, why multinational companies use EU standards as global standards, and why the EU's role as the world's regulator is likely to outlive its gradual economic decline, extending the EU's influence long into the future.

Vienna's Dreams of Europe Katherine Arens,2015-10-22 Vienna's Dreams of Europe puts forward a convincing counter-narrative to the prevailing story of Austria's place in Europe since the Enlightenment. For a millennium, Austrian writers have used images of Europe and its hegemonic culture as their political and cultural reference points. Yet in discussions of Europe's nation-states, Austria appears only as an afterthought, no matter that its precursor states-the Holy Roman Empire, the Austrian Empire, and Austria Hungary-represented a globalized European cultural space outside the dominant paradigm of nationalist colonialism. Austrian writers today confront reunited Europe in full acknowledgment of Austro-Hungary's multicultural heritage, which mixes various nationalities, ethnicities, and cultural forms, including ancestors from the Balkans and beyond. Challenging standard accounts of 18th- through 20th-century European imperial identity construction, Vienna's Dreams of Europe introduces a group of Austrian public intellectuals and authors who have since the 18th century construed their own public as European. Working in different terms than today's theorist-critics of the hegemonic West, Katherine Arens posits a political identity resisting two hundred years of European nationalism.

Cooperation Among Democracies Thomas Risse,Thomas Risse-Kappen,1995 In exploring the special nature of alliances among democracies, the author argues that the West European and Canadian allies exerted greater influence on American foreign policy during the Cold War than most analysts assume. This book's findings evaluate the post-Cold War's transatlantic security community and its survival.

The Politics of EU Accession Lucie Tunkrova,Pavel Šaradín,2010-05-04 The question of Turkish membership in the European Union is highly controversial and subject to many misperceptions and misunderstandings on both sides. This book examines the politics of EU accession which have evolved during the expansion of the EU, from more procedural conditions to provisions of substantive democracy. With a particular focus on the challenges Turkey faces to join the EU, the authors examine the experiences of the newly-democratised and acceded Czech Republic, Hungary, Poland and Slovakia to provide insight and to identify the best possible solutions. Combining the Turkish and Central European perspectives in one volume, and using a social constructivist approach, the authors address issues including Euroscepticism, EU absorption capacity, women's rights, democratisation, Turkish Kamalism, the desecuritisation of Turkish politics and the problem of Northern Cyprus. This volume establishes the challenges the EU, its member states and the candidate countries need to face and successfully address in order to contribute to both their democratization and the European integration process. This book will be of interest to students and scholars of European politics, Turkish politics and international politics.
