Inferno! Tom Gormley, 2022-10-10 The December 30, 2021, Marshall Fire outside of Boulder will be remembered as the most destructive inferno in Colorado history and one of the top fifteen worst fires in the western U.S. In a little over four hours, the fire, fueled by high velocity Chinook winds, burns 6,026 acres, consumes 1,084 structures, and damages many additional. Over 37,500 residents evacuate. Most flee without receiving any warning, leaving with little more than the shirts on their backs, escaping a fire burning minutes behind. Miraculously, only two persons are killed and eight injured during the fire. Though everyone’s story is unique, common experiences abound. Scenes during the fire are surreal with one house engulfed in flames while its neighbor sits untouched with Christmas lights twinkling. The fury of the wind decides what burns and what stands

untouched. "INFERNO!" is the true story of the Marshall fire and the many miracles that occur during and after. Interviews, local history and pictures convey the turmoil, tragedy and drama of this nightmare.

Digital Governance Michael E. Milakovich,2021-09-28 The application of digital information and communication technologies (ICTs) to reform governmental structures and public service is widely and perhaps naively viewed as the 21st century savior, the enlightened way to reinvigorate democracy, reduce costs, and improve the quality of public services. This book examines the transition from e-government to digital governance in light of the financial exigencies and political controversies facing many governments. The chapters concentrate on strategies for public sector organizational transformation and policies for improved and measurable government performance in the current contentious political environment. This fully updated second edition of Digital Governance provides strategies for public officials to apply advanced technologies, manage remote workforces, measure performance, and improve service delivery in current crisis-driven administrative and political environments. The full

implementation of advanced digital governance requires fundamental changes in the relationship between citizens and their governments, using ICTs as catalysts for political as well as administrative communication. This entails attitudinal and behavioral changes, secure networks, and less dependence on formal bureaucratic structures (covered in Part I of this book); transformation of administrative, educational, and security systems to manage public services in a more citizen-centric way (covered in Part II); the integration of advanced digital technologies with remote broadband wireless internet services (Part III); and the creation of new forms of global interactive citizenship and self-governance (covered in Part IV). Author Michael E. Milakovich offers recommendations for further improvement and civic actions to stimulate important instruments of governance and public administration. This book is required reading for political science, public administration, and public policy courses, as well as federal, state, and local government officials.
