FBO Management C. Daniel Prather,2023-07-18 This industry-leading textbook covers all aspects relating to the operation, marketing, and management of fixed-base operators (FBOs). Author Dr. C. Daniel Prather, an experienced aviation industry professional educator, presents key considerations for FBO managers and prepares university-level students for this competitive business field. This text begins by covering the history of general aviation and the scope of the current industry and then examines all elements of FBO operations, including line service, aircraft maintenance, flight operations, aircraft sales, aircraft charter, customer service, and more. A focus on marketing an FBO explores the role of marketing, sales and promotion, marketing research, and transportation needs assessment. As a management resource, this book examines methods of acquiring a business aircraft, management functions and organization, risk management, financial planning, and human resources as well as presents current and future challenges confronting FBOs. Each chapter contains resources to aid readers' learning, including definitions of key terms, review questions, and real-world scenarios to help students apply their learning to challenges encountered by FBOs. Entrepreneurs establishing an FBO will find practical discussions of FBO services to consider, safe line service practices, proper legal structures, marketing plans, risk management, and more.

Airport Operator Options for Delivery of FBO Services Lois S. Kramer,John P. Daniel, Mike Moore (Writer on transportation),Michael G. Moroney,Gary Shafer,2018 TRB's Airport Cooperative Research Program (ACRP) Synthesis 86: Airport Operator Options for Delivery of FBO Services explores the local considerations that go into deciding how fixed base operator (FBO) airports provide fueling, flight continuation services, maintenance, and concierge services. This synthesis also explores the tools that airports use to evaluate which options work best for airports. Broadly speaking, an airport sponsor can deliver FBO services with traditional third-party leases or by engaging a contract manager, or the airport can self-operate the FBO. Decisions about which model is appropriate hinge on an evaluation of an airport's unique local economic conditions, the details about the area's general aviation market, and the level of interest private FBOs express about operating at a particular airport.-- Publisher.

Characteristics of the FBO Industry 2018-2019 Lois S. Kramer,2020 The fixed-base operator (FBO) industry provides aeronautical services to a wide spectrum of aircraft operators at airports. The term FBO is defined by the FAA as a business granted the right by the airport sponsor to operate on an airport and provide aeronautical services . . . The most basic FBO offers its customers self-service fueling, as well as a set of core services such as use of hangars, ground services, and, sometimes, aircraft maintenance. The TRB Airport Cooperative Research Program's ACRP Synthesis 108: Characteristics of the FBO Industry 2018-2019 profiles the FBO industry as of December 2018. This analysis of data provides a quantitative snapshot of the FBO industry intended to serve as a reliable baseline of information for tracking FBO trends in the future.

Assessment of CBOs And FBOs Roles in Preventing and Controlling HIV/Aids Bekuretsion Hailesilassie

Abreha,2015-09-01 The purpose of this research was to assess the roles played by CBOs and FBOs in prevention and controlling HIV/AIDS epidemic in Dilla town. In this research CBOs & FBOs are considered as the major community & faith based organizations that can ensure the mobilization of every section of the community in anti HIV/AIDS activities. In order to assess the roles played by the different CBOs & FBOs, interview & focus group discussion were made with the leaders of the organizations. The study set out objectives and used qualitative methods and selected 15 samples using random sampling technique. The data sources are interview of NGOs leadres, key informants of church leaders, Iddir leaders. The activities of governmental and non-governmental organizations were assessed with regard to their activities in involving in HIV/AIDS intervention activities. It was found that increased mortality rate among majority of target group resulting in increased expenditure on burial and related activities progressively depleted the financial resources of the organizations. Community based HIV/AIDS intervention that is undertaken in involving CBOs & FBOs in anti HIV/AIDS activities is in its infancy. Few efforts are being made to involve in anti HIV/AIDS activities by certain NGOs and GOs. Very few NGOs are currently working in the areas of HIV/AIDS interventions. The existing attempts are recently adopted in which very few took part. The existing activities of involved CBOs & FBOs are mainly reliant on the technical and financial assistance obtained from NGOs and GOs. The activities of NGO range from capacity building for local community based organizations like Iddirs, to provision of care and support for AIDS patients and AIDS orphans. The role of partner NGOs are considerable in taking part in HIV/AIDS interventions, as well as enhancing their role in these activities. Partner NGOs implement projects, which obviously are limited in resources, time and area. The sustainability of many of these activities is limited. The activities of GOs include formation of Iddirs council and facilitate capacity building activities for the community in anti HIV/AIDS activities. There is large amount of financial resources availed at the national level, which is meant to enhance the financial capacity of CBOs in their anti HIV/AIDS activities. However, CBOs & FBOs rarely prepared project proposals to use the funds. Limited technical capacity is the major factor that hinders the success of such attempts.

Landscape of the FBO Industry in 2022 ,2023 In 2020, ACRP Synthesis 108: Characteristics of the FBO Industry

2018–2019 described the characteristics of the fixed-base operator (FBO) industry using data collected in 2018 and 2019. The objective of this synthesis was to follow up ACRP Synthesis 108 by examining selected recent and current trends in the aviation industry and their impacts at FBOs. ACRP Synthesis 129: Landscape of the FBO Industry in 2022, from TRB's Airport Cooperative Research Program, investigates how general aviation fared during the COVID-19 pandemic and how FBOs, as the principal service agents for the industry, met pandemic challenges and addressed changes that predated COVID-19.

The Role of Faith-Based Organizations in HIV Prevention and Care in Central America Kathryn Pitkin Derose, David E. Kanouse, David P. Kennedy, Kavita Patel, Alice Taylor, 2010-05-28 Describes the involvement of churches and other faith-based organizations (FBOs) in addressing the HIV/AIDS epidemic in Belize, Guatemala, and Honduras. The authors describe the range of FBO activities and discuss the advantages and challenges to such involvement and possible ways that FBOs can enhance their efforts, both independently and in collaboration with other organizations, such as government ministries of health.
