The fear can be subtle or paralyzing, either way it makes for a great story. This is a collection of those stories. Irrational Fears is a anthology of works from a talented and diverse group of international writers. FTB Press is proud to share their voice with a shared community of readers. Among others, the stories include strange fears, of clowns, ballerinas, vomit and a creepy hand floating in a toilet. The cast of writers includes Essel Pratt, Wayne Via, Lance Hyden, Katherine Hannula Hill, Paul Rhodes, Matthew Lett, Tracey Chapman, DJ Tyrer, Alex Harasymiw, David Bergheim, John Timm, Paul Griley, Robin Becker, Thomas Elson, Casey Douglass, Erin O'Loughlin, Val Muller, Anne Wilson and Carol L. Ftb Presents Paul Rhodes,Essel Pratt,Lance Hyden,D. J. Tyrer,Phil Richardson,Maggie Veness,Catherine MacKenzie,James Pyne,Sandi Sonnenfeld,Na'amah Segal,Christopher Moylan,Bryn Fortey,Jessica Bowden,Rob Nicholson,Mike Sherer,Jill Boyles,Frank Roger,2016-12-04 A renegade is person who lives by their own set of rules. Someone who is not afraid to defy what they, or others may consider normal. With this anthology, we looked for stories that challenged the writers creativity and took risks with the subject matter and/or style. A story that defines the writer as a Renegade of Prose. The Renegades of Prose is a collection of stories from 18 international authors, including Maggie Vaness, Jessica Bowden, Catherine A. MacKenzie, DJ Tyrer, Essell Pratt, Lance Hyden, Paul Rhodes, Phil Richardson, Sandi Sonnenfeld, Na'amah Segal, Stephen McQuiggan, Bryn Fortey, Rob Nicholson, Frank Roger, Chris Moylan, Jill Boyles, Mike Sherer, and James Pyne. Each of these writers dared themselves to create a story that allowed them to become a Renegade of Prose. The Renegades have penned stories about a jealous roommate, an exterminator hired to tackle a unique pest, a rapidly spreading skin condition, a corporate bigwig who has been kidnapped, a scribing monk who made too many errors and a memorable night of Trick or Treating. This is a diverse collection of stories full of twists and turns, some may be disturbing and others thought provoking, but the one thing they have in common is they came from the mind of a Renegade.

Beginning Postsecondary Students Longitudinal Study Second Follow-up (BPS:90/94) Daniel J. Pratt,Kurt J. Veith,Marisa Mitchell,Geoffrey D. Borman,Larry G. Bobbitt,1996 This document provides a summary and evaluation of the methodological procedures and results of the full-scale implementation of the Beginning Postsecondary Student Longitudinal Study Second Follow-up, 1990-94 (BPS:90/94). The study was conducted for the National Center for Education Statistics by Research Triangle Institute with the assistance of Abt Associations and Management Planning Research Associates. BPS:90/94 involved locating and computer-assisted telephone interviewing of a sample of individuals identified initially in the 1990 National Postsecondary Student Aid Study. An introductory chapter provides a brief overview of the background, purposes, and scheduled projects of the BPS:90/94 full-scale study. Chapter 2 describes the design and method of the study, including sample design, respondent locating, data collection, and design of the operating control system. Chapter 3 presents the results of the locating and data collection, and Chapter 4 evaluates the quality of the data collected. The final three chapters present issues related to the construction of the study data file, sample weighting, and estimation techniques. Six appendixes describe the survey review panel membership and present student prenotification materials, the interview instruments, data collection materials, supplemental analytic results, and the variables used for design effects tables. (Contains 13 figures and 55 tables.) (SLD)

Hydrocarbons in Contractional Belts G. P. Goffey,2010 Onshore fold-thrust belts are commonly perceived as 'difficult' places to explore for hydrocarbons and are therefore often avoided. However, these belts host large oil and gas fields and so these barriers to effective exploration mean that substantial unexploited resources may remain. Over time, evaluation techniques have improved. It is possible in certain circumstances to achieve good 3D seismic data. Structural restoration techniques have moved into the 3D domain and increasingly sophisticated palaeo-thermal indicators allow better modelling of burial and uplift evolution of source

and reservoirs. Awareness of the influence of pre-thrust structure and stratigraphy and of hybrid thick and thin-skinned deformation styles is augmenting the simplistic geometric models employed in earlier exploration. But progress is a slow, expensive and iterative process. Industry and academia need to collaborate.
