Graph and Model Transformation Hartmut Ehrig, Claudia Ermel, Ulrike Golas, Frank Hermann, 2015-12-21 This book is a comprehensive explanation of graph and model transformation. It contains a detailed introduction, including basic results and applications of the algebraic theory of graph transformations, and references to the historical context. Then in the main part the book contains detailed chapters on M-adhesive categories, M-adhesive transformation systems, and multi-amalgamated transformations, and model transformation based on triple graph grammars. In the final part of the book the authors examine application of the techniques in various domains, including chapters on case studies and tool support. The book will be of interest to researchers and practitioners in the areas of theoretical computer science, software engineering, concurrent and distributed systems, and visual modelling.

City Logistics 1 Eiichi Taniguchi, Russell G. Thompson, 2018-05-24 This volume of three books presents recent advances in modelling, planning and evaluating city logistics for sustainable and liveable cities based on the application of ICT (Information and Communication Technology) and ITS (Intelligent Transport Systems). It highlights modelling the behaviour of stakeholders who are involved in city logistics as well as planning and managing policy measures of city logistics including cooperative freight transport systems in public-private partnerships. Case studies of implementing and evaluating city logistics measures in terms of economic, social and environmental benefits from major cities around the world are also given.

Defense Acquisitions Paul Francis, 2009-12 The Missile Defense Agency (MDA) has spent about \$56 billion and will spend about \$50 billion more through 2013 to develop a Ballistic Missile Defense System (BMDS). This report assesses the annual progress MDA made in developing the BMDS as well as improvements in accountability and transparency in agency operations, and management processes. To accomplish this, Francis reviewed contractor cost, schedule, and performance; tests completed; and the assets fielded during 2008. He also reviewed pertinent sections of the acquisition policy, and the activities of the new Missile Defense Exec. Board. Includes the effect the cancellation of a Ground-based Midcourse Defense flight test had on BMDS development. Includes recommend. Ill.

Modelling Freight Transport Lóránt Tavasszy, Gerard De Jong, 2013-10-11 Freight Transport Modelling is a unique new reference book that provides insight into the state-of-the-art of freight modelling. Focusing on models used to support public transport policy analysis, Freight Transport Modelling systematically introduces the latest freight transport modelling approaches and describes the main methods and techniques used to arrive at operational models. As freight transport has grown exponentially in recent decades, policymakers now need to include freight flows in quantitative evaluations of transport systems. Whereas early freight modelling practice was inspired by passenger transport models, by now it has developed its separate stream of methods and techniques inspired by disciplines such as economic geography and supply chain management. Besides summarizing the latest achievements in fundamental research, this book describes the state of practice and advises practitioners on how to cope with typical challenges such as limitations in data availability. Uniquely focused book exploring the key issues and logistics of freight transport modelling Highlights the latest approaches and describes the main methods and techniques used to arrive at operational models Summarizes fundamental research into freight transport modeling, as well as current practices and advice for practitioners facing day-to-day challenges
