EURL-PROFICIENCY TEST-FV-22. Pesticide Residues in Onion Homogenate Final Report December 2020 Amadeo Rodríguez Fernández-Alba, Octavio Malato Rodríguez, Carmen Ferrer Amate, 2021-12-15 According to Article 28 of Regulation 396/2005/EC (23rd February 2005) of the European Parliament and of the Council, concerning maximum residue levels for pesticides in or on food and feed of plant and animal origin, all laboratories analysing samples for the official control of pesticide residues shall participate in the European Union Proficiency Tests (EUPTs) for pesticide residues organised by the European Union. These proficiency tests are carried out on an annual basis in order to continuously improve the quality, accuracy and comparability of the residue data reported by EU Member States to the European Union, as well as by other Member States, within the framework of the EU multi-annual coordinated control programme and national monitoring programmes. Regulation (EU) 2017/625 lays down the general tasks, duties and requirements for European Union Reference Laboratories (EURLs) for Food, Feed and Animal Health. Among these tasks is the provision for independently organised comparative tests. European Proficiency Test FV-22 has been organised by the EURL in Fruits and Vegetables at the University of Almería, Spain. Participation in European Proficiency Test FV-22 was mandatory for all National Reference Laboratories (NRLs), as well as all other EU official laboratories, involved in the determination of pesticide residues in fruits and vegetables for the EU multi-annual coordinated control programme or for their own national monitoring programmes. Additionally, laboratories from China, Colombia, Kenya, Peru, Serbia, Singapore, Thailand, Turkey and Uruguay participated in this test. DG-SANTE will have full access to all data from the EUPTs including the lab-code/lab-name key. The NRLs will also have that information for the OfLs within their network. This report may be presented to the European Union Standing Committee on Plants, Animals, Food and Feed (PAFF).

Sir Ernest Satow's Private Letters to W.G. Aston and F.V. Dickens Ernest Mason Satow, 2008 The distinguished British scholar-diplomat Ernest Mason Satow (1843-1929) was one of the most prominent and pre-eminent Japanologists in the Victorian era when the subject was newly created as Japan began to open its doors to foreigners from the mid-1850s. He shared this honour with Basil Hall Chamberlain (1850-1935) and the two addressees of the letters reproduced here by permission of the U.K. National Archives: co-worker William George Aston (1841-1911) and Frederick Victor Dickens (1838-1915). This book is part of a series in which Ian Ruxton is making some of the extensive Satow Papers publicly available for the first time. It includes an introduction by Professor Peter Kornicki of the East Asia Institute at the University of Cambridge, eight black & white illustrations, 166 annotations, two appendices, a select bibliography and a full index for ease of reference. Digital Libraries Applications Edward A. Fox, Jonathan P. Leidig, 2014-03-01 Digital libraries

(DLs) have evolved since their launch in 1991 into an important type of information system, with widespread application. This volume advances that trend further by describing new research and development in the DL field that builds upon the 5S (Societies, Scenarios, Spaces, Structures, Streams) framework, which is discussed in three other DL volumes in this series. While the 5S framework may be used to describe many types of information systems, and is likely to have even broader utility and appeal, we focus here on digital libraries. Drawing upon six (Akbar, Kozevitch, Leidig, Li, Murthy, Park) completed and two (Chen, Fouh) in-process dissertations, as well as the efforts of collaborating researchers, and scores of related publications, presentations, tutorials, and reports, this book demonstrates the applicability of 5S in five digital library application areas, that also have importance in the context of the WWW, Web 2.0, and innovative information systems. By integrating surveys of the state-of-the-art, new research, connections with formalization, case studies, and exercises/projects, this book can serve as a textbook for those interested in computing, information, and/or library science. Chapter 1 focuses on images, explaining how they connect with information retrieval, in the context of CBIR systems. Chapter 2 gives two case studies of DLs used in education, which is one of the most common applications of digital libraries. Chapter 3 covers social networks, which are at the heart of work on Web 2.0, explaining the construction and use of deduced graphs, that can enhance retrieval and recommendation. Chapter 4 demonstrates the value of DLs in eScience, focusing, in particular, on cyber-infrastructure for simulation. Chapter 5 surveys geospatial information in DLs, with a case study on geocoding. Given this rich content, we trust that any interested in digital libraries, or in related systems, will find this volume to be motivating, intellectually satisfying, and useful. We hope it will help move digital libraries forward into a science as well as a practice. We hope it will help build community that will address the needs of the next generation of DLs. Molecular Diversity and PCR-detection of Toxigenic Fusarium Species and Ochratoxigenic Fungi G. Mulè, John A. Bailey, B.M. Cooke, A. Logrieco, 2012-09-19 Toxigenic Fusarium species and ochratoxigenic fungi are responsible for various plant diseases which have important consequential effects on both human and animal health worldwide. The development of rapid, robust and sensitive detection methods based on new molecular technologies is urgently needed in order to identify fungal contamination in the field and quantify toxin accumulation in food and animal feed. Most of the contributions in this special issue are from results obtained through the EU 5th Framework project (QLKI-CT-1998-01380) DETOX-FUNGI: early detection of toxigenic Fusarium species and ochratoxigenic fungi in plant products, which has strongly stimulated interaction and co-operation between many European scientists. Valuable contributions from other scientists have guaranteed a complete overview of this stimulating and interesting topic. This is the third special issue published in the European Journal of Plant Pathology concerning mycotoxigenic fungi under the aegis of COST Action 835 'Agriculturally Important Toxigenic Fungi'. The first two dealt with 'Mycotoxins in Plant Disease' (Vol. 108(7) 2002) and 'Epidemiology of Mycotoxin Producing Fungi' (Vol. 109(7) 2003). The present issue contains contributions which cover aspects of molecular diversity, phylogeny and PCR-detection of toxigenic Fusarium species and various ochratoxigenic fungi. We hope these will prove helpful to researchers involved in similar work and will stimulate the future studies required for the early detection of these fungi, which is so essential for overcoming the health risks associated with

mycotoxin-contaminated food products.
