FY2015 Administrative and Capital Expenses and Output Cost Estimates

International Monetary Fund, 2015-05-08 The administrative expenditure outturn for FY2015 reflects continued budget discipline, as new demands and initiatives were accommodated through reprioritization and better use of existing resources within an unchanged envelope. The overall budget utilization rate of 98 percent was achieved through more efficient personnel management practices and effective reallocation of resources from underutilized areas to areas of emerging pressure. In terms of outputs, the Fund continued its focus on addressing global policy challenges and reducing vulnerabilities. Resources allocated to multilateral surveillance, oversight of the global systems and capacity development increased while bilateral surveillance and lending declined moderately, in line with easing of crisis-related work. Spending by country reflects a continued shift towards a more risk-based approach, consistent with the established priorities. Capital expenditures mainly reflected the major renovation of the HQ1 building and improvements in information technology infrastructure and security to better support the staff's work and protect information assets.

Stone,Alaska Fisheries Science Center (U.S.),2015 Our research focuses on commercially and ecologically important Alaskan species most likely to be affected by OA, especially larval and juvenile stages. Commercially important calcareous species (crab) are our first priority because of their economic value and because these species are likely to suffer direct effects of reduced CaCO₃ availability. Our second priority is commercially important fish species; this research will screen for early life history effects and effects mediated by prey. Third priority is coldwater corals whose ecological importance includes sheltering marine organisms (e.g., rockfish), providing focal areas for foraging, and increasing the biodiversity of seafloor habitats--Overview.

Morocco: 2014 Article IV Consultation-Staff Report; Press Release; and Statement by the Executive Director for Morocco International Monetary Fund. Middle East and Central Asia Dept.,2015-02-23 This 2014 Article IV

Consultation highlights that Morocco has made important strides in maintaining macroeconomic stability in a difficult environment, but challenges remain to reduce fiscal and external vulnerabilities, strengthen growth, create jobs, and tackle poverty. Growth slowed in 2014 as a result of a contraction in agricultural activity following an exceptional 2013 crop and weak demand from Europe. However, growth is expected to rebound in 2015 to about 4.4 percent and remain robust in the medium term as external demand and domestic confidence strengthen. Executive Directors have commended the authorities for their strong policy actions, which have reduced economic vulnerabilities.

Department of Homeland Security Appropriations for 2012 United States. Congress. House. Committee on Appropriations. Subcommittee on Homeland Security, 2011

Country Partnership Strategy for India for the Period 2013-2017 World Bank, India is uniquely placed to help reduce global poverty and boost shared prosperity. While the country has achieved encouraging results in recent years in tackling these dual challenges, it remains home to one-third of the world's poor, as well as the largest number of people who have recently escaped poverty but are still vulnerable to falling back. India is now in the midst of an important transition, casting off its long-held status as a developing nation to emerge as a new leader in the international economic arena. Strong support for the country at this crucial juncture can help bend the arc of

history by accelerating the decline in poverty both in India and the world. India's ongoing transformation calls for a new phase in its long-standing partnership with World Bank Group (WBG). The new Country Partnership Strategy (FY2013-17) between India and the WBG responds by setting out a program of support- from the International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), and Multilateral Investment Guarantee Agency (MIGA} that seeks to develop transformational and innovative solutions to tackle the country's most pressing development challenges, especially in the poorest, least developed, and most isolated of its states. A more pronounced focus on India's low-income states (Bihar, Chhattisgarh, Jharkhand, Madhya Pradesh, Odisha, Rajasthan and Uttar Pradesh) and on urbanization are hallmarks of this new phase of partnership, and represents a key strategic shift in the WBG's support to India's development. The strategy seeks to help India lay the foundation for achieving a long-term vision for 2030- a vision of the nation as a global economic powerhouse where more and more people share the benefits of growth and where no more than 5.5 percent of the population lives in poverty and 41.3 percent of the population is no longer vulnerable to falling back. Key Elements of the World Bank Group Strategy To help achieve the vision for India in 2030 and contribute to its ongoing transformation, the WBG strategy focuses on three broad areas of engagement: integration, rural-urban transformation and inclusion. Improving domestic- as well as regional

and global- integration is key to high, sustained growth, and accelerated poverty reduction. As India continues to transform from a largely rural, agrarian economy into an increasingly urbanized one, more emphasis will be needed on creating strong linkages between the urban and rural parts of the country. WBG will support efforts to help India and its people reap the benefits of urbanization while also improving agricultural productivity. A third area of support is to work in partnership to help foster the inclusion of all social and economic groups - regardless of age, gender, caste, or place of residence - thus ensuring that the benefits of faster economic growth touch the lives of all of India's people. All three areas of engagement will share a focus on improving governance, promoting environmental sustainability, and bolstering gender equality. World Bank Group Support Given the deep and complex challenges confronting a rapidly changing country, the strategy makes the case for continued high levels of support for India. Aware that WBG finances will always be modest compared to the task at hand, the strategy aims to leverage resources in creative ways that take into account the different strengths of India's states and regions, the entrepreneurial spirit of its people, the deep experience of civil society, and the convergence of better governance and social responsibility. To make a meaningful contribution to the assault on poverty, the volume of support from the WBG should be in the order of about \$5 billion per year over the next five years. For the WBG's endeavors to be effective, actions will be

required at the national level, at lower levels of government, as well as through partnerships with the private sector, civil society and development partners. The strategy is closely aligned with India's own vision for development outlined in the 12th Five-Year Plan (FY2013- 17), which calls for faster, sustainable, and more inclusive growth. Lessons have been incorporated from the Group's long-term engagement in the country, and take into account learning from the previous strategy (FYi009-12) as well as inputs from experts across a broad spectrum of economic, social, and government sectors.

Financial Services and General Government Appropriations for 2015 United States. Congress. House. Committee on Appropriations. Subcommittee on Financial Services and General Government, 2014

2018 Review of the Fund's Capacity Development Strategy International Monetary Fund, 2018-11-20 Capacity development (CD) is one of the Fund's three core activities and has grown in importance in recent years. It supports member countries' efforts to build the institutions and capacity necessary to formulate and implement sound economic policies, thereby complementing the Fund's surveillance and lending mandates. Member countries, partners, and external commentators give the Fund high marks for the quality of its CD. At the same time, efforts need to continue to strengthen Fund CD to serve members' current and evolving needs. The 2018 CD Strategy Review examines progress under the Fund's 2013 CD Strategy and proposes a CD strategy for the

next five years. It notes substantial progress in addressing the 2013 recommendations, which included strengthening the CD governance structure, enhancing the prioritization processes, clarifying the funding model, strengthening monitoring and evaluation, promoting greater integration of TA and training, exploiting new technologies for delivery, and leveraging CD as outreach. However, background work for this review also pointed to the need to strengthen the CD framework further. The review builds upon the existing CD strategy, focusing on two mutually reinforcing objectives. First, the impact of Fund CD needs to be increased by further strengthening integration with the Fund's policy advice and lending operations, while continuing to make progress in framing CD through comprehensive strategies tailored to each member's needs, capacity, and conditions, focusing on implementation and outcomes. Stronger coordination between CD and the Fund's other core functions will better connect CD with countries' risks and vulnerabilities and ensure surveillance and lending integrate lessons from CD more effectively. Second, the efficiency of CD needs to be increased by improving CD processes and systems. This will enhance transparency and strengthen the basis for strategic decision making. Five specific areas of recommendations support the strategy. Likewise, they mitigate institutional risks stemming from the Fund's CD activities. They include clearer roles and responsibilities for key internal and external stakeholders in the CD process; continued strengthening of prioritization and monitoring; better

tailoring and modernization of CD delivery with a focus on implementation of TA recommendations; greater internal consultation and sharing of CD information; and further progress in external coordination, communication, and dissemination of information (Annex I).

Democratic Republic of the Congo International Monetary Fund. African Dept.,2015-10-13 This 2015 Article IV Consultation highlights that the Democratic Republic of the Congo's macroeconomic performance remained strong through the first half of 2015 despite a difficult external and domestic environment. Real GDP growth in 2014 is estimated at 9.2 percent, driven by copper production and the service sector. The medium-term outlook is favorable but subject to downside risks. Real GDP growth is projected to remain strong at 9.2 percent in 2015—among the highest rates in the world—and average 8.4 percent in 2016–17 before stabilizing at about 6 percent in 2018–20.

Bangladesh International Monetary Fund. Asia and Pacific Dept,2015-11-11 This paper discusses Bangladesh's Fifth and Sixth Reviews Under the Extended

Credit Facility Arrangement. The current ECF arrangement, approved in April 2012, is drawing to a close. Over its three years, macroeconomic stability has been buttressed: growth is strong, inflation has eased, the public debt-to-GDP ratio has remained stable, and foreign reserves remain adequate. Progress on revenue mobilization, however, has been weak. Political uncertainty remains a key risk to the outlook. All performance criteria for the combined reviews have been met, all prior actions have been completed, and macroeconomic stability has been maintained. The IMF staff recommends completion of the combined reviews.

Results and Performance of the World Bank Group 2015 IEG, 2016-10-18 The Independent Evaluation Group's (IEG) Results and Performance of the World Bank Group (RAP) is a comprehensive assessment of World Bank Group

performance, drawing on recent IEG evaluations. The report also examines how effectively the World Bank Group addressed current and emerging development challenges. This year's RAP focuses on gender integration in World Bank Group operations, building on previous examinations of World Bank Group approaches to risk management (RAP 2013) and the Millennium Development Goals (RAP 2014). 'No country, community, or economy can achieve its potential or meet the challenges of the 21st century without the full and equal participation of women and men, girls and boys.' This statement from the World Bank Group website's topic page on gender states the essential importance of gender for development. In line with that view, the World Bank Group made considerable progress in addressing gender issues during the past 15 years. Gender has been a prominent corporate objective since the first World Bank Group strategy, introduced in 2001. This year, a new World Bank Group gender strategy has been launched—the first joint World Bank†“International Finance Corporation (IFC) strategy to focus on gender. It is an important step toward sharpening the corporate focus on gender and improving the approach to gender mainstreaming. This report describes how mechanisms for integrating gender in projects and country strategies are working, and to what extent they provide meaningful information about progress and results on gender. The analysis aims to inform World Bank Group efforts to strengthen the approach to documenting, assessing, and evaluating results as part of the new strategy rollout. The report also reviews how effectively the World Bank Group's

portfolio and country programs deliver results, and its system for monitoring the implementation of IEG's recommendations.

SBIR/STTR at the Department of Energy National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Capitalizing on Science, Technology, and Innovation: An Assessment of the Small Business Innovation Research Program—Phase II, 2017-01-20 The Small Business Innovation Research (SBIR) program is one of the largest examples of U.S. public-private partnerships, and was established in 1982 to encourage small businesses to develop new processes and products and to provide quality research in support of the U.S. government's many missions. The Small Business Technology Transfer (STTR) Program was created in 1992 by the Small Business Research and Development Enhancement Act to expand joint venture opportunities for small businesses and nonprofit research institutions by requiring small business recipients to collaborate formally with a research institution. The U.S. Congress tasked the National Research Council with undertaking a comprehensive study of how the SBIR and STTR programs have stimulated technological innovation and used small businesses to meet federal research and development needs, and with recommending further improvements to the

programs. In the first round of this study, an ad hoc committee prepared a series of reports from 2004 to 2009 on the SBIR and STTR programs at the five agencies responsible for 96 percent of the programs' operations-including the Department of Energy (DoE). Building on the outcomes from the first round, this second round presents the committee's second review of the DoE SBIR program's operations. Public-private partnerships like SBIR and STTR are particularly important since today's knowledge economy is driven in large part by the nation's capacity to innovate. One of the defining features of the U.S. economy is a high level of entrepreneurial activity. Entrepreneurs in the United States see opportunities and are willing and able to assume risk to bring new welfare-enhancing, wealth-generating technologies to the market. Yet, although discoveries in areas such as genomics, bioinformatics, and nanotechnology present new opportunities, converting these discoveries into innovations for the market involves substantial challenges. The American capacity for innovation can be strengthened by addressing the challenges faced by entrepreneurs.
