The Lean Farm Ben Hartman, 2015 A practical, systems-based approach for a more sustainable farming operation To many people today, using the words factory and farm in the same sentence is nothing short of sacrilege. In many cases, though, the same sound business practices apply whether you are producing cars or carrots. Author Ben Hartman and other young farmers are increasingly finding that incorporating the best new ideas from business into their farming can drastically cut their wastes and increase their profits, making their farms more environmentally and economically sustainable. By explaining the lean system for identifying and eliminating waste and introducing efficiency in every aspect of the farm operation, The Lean Farm makes the case that small-scale farming can be an attractive career option for young people who are interested in growing food for their community. Working smarter, not harder, also prevents the kind of burnout that start-up farmers often encounter in the face of long, hard, backbreaking labor. Lean principles grew out of the Japanese automotive industry, but they are now being followed on progressive farms around the world. Using examples from his own family's one-acre community-supported farm in Indiana, Hartman clearly instructs other small farmers in how to incorporate lean practices in each step of their production chain, from starting a farm and harvesting crops to training employees and selling goods. While the intended audience for this book is small-scale farmers who are part of the growing local food movement, Hartman's prescriptions for high-value, low-cost production apply to farms and businesses of almost any size or scale that hope to harness the power of lean in their production processes.

This book will give pleasure--and information--to both. Hundreds of illustrations, rendered with perception, wit, and accuracy offer a heartwarming look at life on a farm in Holland. Full color.

The Farm Book , 1997

Farming While Black Leah Penniman, 2018 Farming While Black is the first comprehensive how to guide for aspiring African-heritage growers to reclaim their dignity as agriculturists and for all farmers to understand the distinct, technical contributions of African-heritage people to sustainable agriculture. At Soul Fire Farm, author Leah Penniman co-created the Black and Latino Farmers Immersion (BLFI) program as a container for new farmers to share growing skills in a culturally relevant and supportive environment led by people of color. Farming While Black organizes and expands upon the curriculum of the BLFI to provide readers with a concise guide to all aspects of small-scale farming, from business planning to preserving the harvest. Throughout the chapters Penniman uplifts the wisdom of the African diasporic farmers and activists whose work informs the techniques described--from whole farm planning, soil fertility, seed selection, and agroecology, to using whole foods in culturally appropriate recipes, sharing stories of ancestors, and tools for healing from the trauma associated with slavery and economic exploitation on the land. Woven throughout the book is the story of Soul Fire Farm, a national leader in the food justice movement. --

Bet the Farm Beth Hoffman, 2021-10-05 Eloquent and detailed...It's hard to have hope, but the organized observations and plans of Hoffman and people like her give me some. Read her book -- and

listen. -- Jane Smiley, *The Washington Post* In her late 40s, Beth Hoffman decided to upend her comfortable life as a professor and journalist to move to her husband's family ranch in Iowa--all for the dream of becoming a farmer. There was just one problem: money. Half of America's two million farms made less than \$300 in 2019, and many struggle just to stay afloat. Bet the Farm chronicles this struggle through Beth's eyes. She must contend with her father-in-law, who is reluctant to hand over control of the land. Growing oats is good for the environment but ends up being very bad for the wallet. And finding somewhere, in the midst of COVID-19, to slaughter grass finished beef is a nightmare. If Beth can't make it, how can farmers who confront racism, lack access to land, or don't have other jobs to fall back on hack it? Bet the Farm is a first-hand account of the perils of farming today and a personal exploration of more just and sustainable ways of producing food.

The Organic Medicinal Herb Farmer Jeff Carpenter, Melanie Carpenter, 2015-05-06 A new approach to growing local medicine, including information on geo-authenticity, wildcrafting, and developing a good business plan Both a business guide and a farming manual, *The Organic Medicinal Herb Farmer* will teach readers how to successfully grow and market organic medicinal Western herbs. Whether you're trying to farm medicinal plants,

culinary herbs, or at-risk native herbs exclusively or simply add herbal crops to what you're already growing, successful small-scale herb farmers Jeff and Melanie Carpenter will guide you through the entire process—from cultivation to creating value-added products. Using their Zack Woods Herb Farm in Vermont as a backdrop, the Carpenters cover all the basic practical information farmers need to know to get an organic herb farm up and running, including: • Size and scale considerations; • Layout and design of the farm and facilities; • Growing and cultivation information, including types of tools; • Field and bed prep; • Plant propagation; • Weed control, and pests and diseases; • Harvesting, as well as wild harvesting and the concept of geo-authentic botanicals; • Postharvest processing; and, • Value-added products and marketing. The authors also provide fifty detailed plant profiles, going deeper into the herbs every farmer should consider growing. In an easy-to-understand, practical, and comprehensive manner, readers will learn how to focus on quality over quantity, and keep costs down by innovating with existing equipment, rather than expensive technology. Market farmers who have never before considered growing medicinal herbs will learn why it's more important to produce these herbs domestically. The Organic Medicinal Herb Farmer makes a convincing case that producing organic medicinal herbs can be a viable, profitable, farming enterprise. The Carpenters also make the case for incorporating medicinal herbs into existing operations, as it can help increase revenue in the form of value-added products, not to mention improve the ecological health of farmland by encouraging biodiversity as a path toward greater soil health.

Farm Fresh Broadband Christopher Ali, 2021-09-21 An analysis of the failure of U.S. broadband

policy to solve the rural-urban digital divide, with a proposal for a new national rural broadband plan. As much of daily life migrates online, broadband-high-speed internet connectivity-has become a necessity. The widespread lack of broadband in rural America has created a stark urban-rural digital divide. In *Farm Fresh Broadband*, Christopher Ali analyzes the promise and the failure of national rural broadband policy in the United States and proposes a new national broadband plan. He examines how broadband policies are enacted and implemented, explores business models for broadband providers, surveys the technologies of rural broadband, and offers case studies of broadband use in the rural Midwest. Ali argues that rural broadband policy is both broken and incomplete: broken because it lacks coordinated federal leadership and incomplete because it fails to recognize the important roles of communities, cooperatives, and local providers in broadband access. For example, existing policies favor large telecommunication companies, crowding out smaller, nimbler providers. Lack of competition drives prices up-rural broadband can cost 37 percent more than urban broadband. The federal government subsidizes rural broadband by approximately \$6 billion. Where does the money go? Ali proposes democratizing policy architecture for rural broadband, modeling it after the wiring of rural America for electricity and telephony. Subsidies should be equalized, not just going to big companies. The result would be a multistakeholder system, guided by thoughtful public policy and funded by public and private support.
