United States. Congress. Senate. Commerce

Fish Processing Technology George M. Hall, 1997-07-31 The first edition of this unique book combined an outlining and updating of the traditional areas of fish processing technology with detailed descriptions of important new areas of work. This fully revised and updated edition continues to provide coverage of modern aspects of traditional processes, and highly practical descriptions of important new areas. All the chapters which have been kept from the first edition have been brought up-to-date, and there are four new chapters on: methods of identifying fish species; modified atmosphere packaging of fish; aspects of quality and HACCP in fish processing and temperature modeling in fish transportation. Written as an overview of the field for industrialists in developed countries wishing to improve or diversify their operation and for those teaching this aspect of food science and technology, the book is also of proven value to workers in developing countries which are expanding their fish processing industries to earn important foreign currency.

Fisheries of the United States 2007 , 2008-10 NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT--OVERSTOCK SALE -- Significantly reduced list prices while supplies last Contains a preliminary report for 2007 on commercial and recreational fisheries of the United States with catches in both the United States and foreign Exclusive Economic Zones (EEZ). Provides timely answers to frequently asked questions. Fisherman, ecologists, natural resources specialists, oceanographers, biologists including fisheries and marine biologists, and aquatic conservation professionals may be interested in this volume. Students pursuing coursework in oceanic environmental science, aquatic ecology and fish habitats or conservation genetics may also find this research helpful for their assignments. Related products: Updated and current print volume-- Fisheries of the United States, 2014 can be found here:

Certain Fish United States International Trade Commission,1980

Sustainable Fish Production and Processing Charis M. Galanakis,2021-09-23 Sustainable Fish Production and Processing is a unique resource that bridges the gap between academia and industry by analyzing new, state-of-the-art fish production, processing and waste management. The book explores general valorization methods, focusing on the extraction of high added-value compounds and their reutilization in different fields of the food and nutraceuticals industry. Sections take a comprehensive approach to understanding the most recent advances in the field, while also analyzing the potentiality and sustainability of already commercialized processes and products. This resource could be utilized as a handbook for anyone dealing with sustainability issues within the fish industry.Emphasis of fish production is given to food security issues, large marine ecosystems, aquaculture genomics, epigenetics and breeding, proteomics for quality and safety in fishery products, post-harvest practices in small scale fisheries, and lifecycle impact of industrial aquaculture systems. Emphasis of fish processing and by-products is given to industrial thawing of

fish blocks, sources and functional properties of fish protein hydrolysates, recovery technologies and applications, potential biomedical applications, ready-to-eat products, fish waste for bacterial protease production, fish waste for feeding as well as lipid extraction from fish processing for biofuels. Covers recent advances in the field of fish production and processing over the last decade, following sustainability principles Discusses the advantages and disadvantages of relevant processes from various perspectives to improve sustainability Offers practical success stories and solutions to ensure the sustainable management of fish processing by-products

Certain Fish and Certain Shellfish from Canada Abigail Eltzroth, United States International Trade Commission, 1979

Safety and Quality Issues in Fish Processing H. Allan Bremner, 2002-08-13 Edited by a leading authority on quality issues, and with a distinguished international team of contributors, this major new book summarizes important new research on improving quality in fish processing.

Fish and Wildlife Protection in the Planning and Construction of the Trans-Alaska Oil Pipeline Thomas A. Morehouse, Robert A. Childers, Linda E. Leask, 1978 Focuses on fish and wildlife protection issues in the course of planning, establishing, and conducting monitoring activities. Also explores the rationale behind the decision making process and offers recommendations for improved environmental management in future cases.

Practical Notions on Fish Health and Production Maria Manuela Castilho Monteiro de Oliveira, Joana Isabel Espírito Santo Robalo, Fernando Manuel D`Almeida Bernardo, 2016-06-30 Maintaining ideal fish health and production, both of farmed and wild fish populations, requires continuous infrastructural and process upgrades to avoid significant losses as well as to facilitate seafood safety. Aquaculture is multidisciplinary in nature, combining knowledge from biology, veterinary medicine and food technology. Practical Notions on Fish Health and Production brings an integrated approach concerning practical aspects of ichthyology, fish health and aquaculture systems. The textbook will give readers a better understanding of issues related to the management of fish health and production, seafood processing, security, quality and safety. The book is organized in three sections which cover 1) general aspects of fish biology and development, 2) fish diseases and veterinary medicine, and 3) aquaculture and marine food supply chain management. Practical Notions on Fish Health and Production is an essential text for students, food industry professionals and novice fish farmers undertaking courses or training programs in veterinary medicine, aquaculture, and marine food processing systems.

Multilingual Dictionary of Fish and Fish Products OECD: Organisation for Economic Co-operation and Development, 2009-09-24 The Multilingual Dictionary of Fish and Fish Products is a world standard guide to the names of fish and fish products traded internationally. This fifth edition

comprises 1187 items, with descriptions in English and French and the equivalents for the main headings in 18 other languages: Danish, Dutch, Finnish, German, Greek, Icelandic, Italian, Japanese, Korean, Norwegian, Polish, Portuguese, Russian, Serbian, Croatian, Spanish, Swedish and Turkish. Indexes are provided for each language, including an index of scientific names for species of fish, shellfish, etc. This is an essential reference for all those working in the arena of fisheries, aquaculture, seafood processing and the world trade in aquatic products. The information included is of great commercial use and importance, and copies of this expanded and enhanced new edition should be available in all seafood companies, libraries of research establishments, government departments and universities where aquaculture, fisheries, food science and technology, fish biology and aquatic sciences are studied and taught, throughout the world.
