Adventures in Bookbinding Jeannine Stein, 2011-06-01 Each project in this book combines bookbinding with a specific craft such as quilting, jewelry making, or polymer clay, and offer levels of expertise: basic, novice, and expert. Illustrated step-by-step instructions and photographs demonstrate how to construct the cover pages, and a unique binding technique, easy enough for a beginner to master. Each project also features two other versions with the same binding geared to those with more or less experience. The novice version is for those who have no knowledge of the craft and want shortcuts, but love the look. For the quilter's book, for example, vintage quilt pieces become the covers so all that's needing in the binding. Or if you're interested in wool felting use an old sweater. This offers great opportunities for upcycling. The expert version is for those who have a great deal of knowledge and proficiency of a certain craft - the master art quilter, for example. For this version, an expert guest artist has created the cover and the author has created the binding. This offers yet another creative opportunity - the collaborative project. Since crafters often get involved with round-robins and other shared endeavors, this will show them yet another way to combine their skills. No other craft book offers the possibilities and challenges that Adventures in Bookbinding does. Readers will return to it again and again to find inspiration and ideas.

Design Principles and Analysis of Thin Concrete Shells, Domes and Folders
Iakov Iskhakov, Yuri Ribakov, 2015-11-16 One of the main goals of a good and effective structural design is to decrease, as far as possible, the self-weight of structures, because they must carry the service load. This is especially important for reinforced concrete (RC) structures, as the self-weight of the material is substantial. For RC structures it is furthermore important that the whole structure or most of the structural elements are under compression with small eccentricities. Continuous spatial concrete structures satisfy the above-mentioned requirements. It is shown in this book that a span of a spatial structure is practically independent of its thickness and is a function of its geometry. It is also important to define which structure can be called a spatial one. Such a definition is given in the book and based on this definition, five types of spatial concrete structures were selected: translation shells with positive Gaussian curvature, long convex cylindrical shells, hyperbolic paraboloid shells, domes, and long folders. To demonstrate the complex research, results of experimental, analytical, and numerical evaluation of a real RC dome are presented and discussed. The book is suitable for structural engineers, students, researchers and faculty members at universities.

Groundhog Gets a Say Pamela C. Swallow, 2007-12-27 There's so much more to being a groundhog than just putting on a show once a year, and Groundhog has decided it's time to tell the world the Hog truth. With the help of a few of his fans, Groundhog is ready to tell everything about himself, from how loud he can whistle (loud), to how fast he can run (not fast), to how many things he uses his teeth for (a lot). Groundhog may be full of himself, but chances are good that, by the end of this book, you'll agree he's pretty wonderful! From the illustrator of the Junie B. Jones books and the author of the Melvil & Dewey books comes a funny, fact-filled look at what happens when one very proud groundhog speaks out.

The Black Folder Catherine Yronwode, 2013-04-28 • Conjure Spells for Love, Money, Protection, and Luck; • Cursing and Reversing Tricks with Dolls and Mirror Spells; • The Secrets of Kitchen Witchery and Grocery Store Magic; • Candle and Oil Lamp Magic in the Hoodoo Tradition; • How to Make Your Own Mojo Hands, Doll-Babies, and Packet Amulets; • Divination and Seership with Bones, Tea Leaves, and Candle Wax. From 2002 through 2013, the Lucky Mojo Curio Company offered an assortment of informational shop flyers to all in-

store and mail-order customers, featuring basic information about African American hoodoo drawn from catherine yronwode's book Hoodoo in Theory and Practice. Meanwhile, from 2008 through 2013, the Missionary Independent Spiritual Church annual Hoodoo Workshops, attendees who came to receive hands-on training in the practice of conjure and other forms of world folk-magic received hand-out flyers describing the spells, recipes, and methods of practice being taught. All of these three-hole-punched information sheets -- the Lucky Mojo Shop Flyers and the Hoodoo Workshop Hand-Outs -- were then collected together into a black school-report cover -- which we called The Black Folder. As the years went on, the content of The Black Folder grew and grew and grew, until there were so many pages that they could no longer easily fit into a single report cover ... and so we put together the complete set of all of the past Missionary Independent Spiritual Church Workshop flyers, plus a complete set of all of the Lucky Mojo shop flyers into a 136 page professionally printed BOOK. The name of the book is The Black Folder -- but don't let the name (or the cover) fool you -- it's a regular 8 1/2 x 11 trade paperback book, like nothing else available anywhere. Contributors include an all-star line-up of well-known conjure doctors from around the world: ConjureMan Ali, Deacon Millett, Dr. E., Lara Rivera, Prof. Charles Porterfield, Dr. James Dotson, Khi Armand, Sister Robin Petersen, Sindy Todo, Susan Diamond, Marin Graves, Miss Elvyra Curcuruto-Love, Ms. Robin York, Dr. Johannes Gardback, Michele Jackson, Valentina Burton, Tanisia Mooney, and catherine yronwode.
