Seeing with Free Eyes Marlene K. Sokolon, 2021-08-01
Responding to Plato's challenge to defend the political thought of poetic sources, Marlene K. Sokolon explores Euripides's understanding of justice in nine of his surviving tragedies. Drawing on Greek mythological stories, Euripides examines several competing ideas of justice, from the ancient ethic of helping friends and harming enemies to justice as merit and relativist views of might makes right. Reflecting Dionysus, the paradoxical god of Greek theater,

Euripides reveals the human experience of understanding justice to be limited, multifaceted, and contradictory. His approach underscores the value of understanding justice not only as a rational idea or theory, but also as an integral part of the continuous and unfinished dialogue of political community. As the first book devoted to Euripidean justice, *Seeing with Free Eyes* adds to the growing interest in how citizens in democracies use storytelling genres to think about important political questions, such as What is justice?

Advanced Free Space Optics (FSO) Arun K. Majumdar, 2014-09-10 This title provides a comprehensive, unified tutorial covering the most recent advances in the emerging technology of free-space optics (FSO), a field in which interest and attention continue to grow along with the number of new challenges. This book is intended as an all-inclusive source to serve the needs of those who require information about the fundamentals of FSO, as well as up-to-date advanced knowledge of the state-of-the-art in the technologies available today. This text is intended for graduate students, and will also be useful for research scientists and engineers with an interest in the field. FSO communication is a practical solution for creating a three dimensional global broadband communications grid, offering bandwidths far beyond what is possible in the Radio Frequency (RF) range. However, the attributes of atmospheric turbulence and scattering impose perennial limitations on availability and reliability of FSO links. From a systems point-of-view, this groundbreaking book provides a thorough understanding of channel behavior, which can be used to design and evaluate optimum transmission techniques that operate under realistic atmospheric conditions. Topics addressed include: • FSO Physical and Statistical Models: Single/Multiple Inputs/Outputs • Understanding FSO: Theory and Systems Analysis • Modulation and Coding for Free-Space Optical Channels •

Atmospheric Mitigation and Compensation for FSO Links • Non-line-of-sight (NLOS) Ultraviolet and Indoor FSO Communications • FSO Platforms: UAV and Mobile • Retromodulators for Free Space Data links • Hybrid Optical RF Communications • Free-space and Atmospheric Quantum Communications • Other related topics: Chaos-based and Terahertz (THz) FSO Communications

Eye Color Morgan Worthy, 1999 Morgan Worthy, a research psychologist, presents a comprehensive picture of how eye color is related to the behavior of humans and animals. In humans, he used archival records of athletic performance to show the theoretical pattern which has light-eyed athletes performing at their best on self-paced tasks and dark-eyed athletes, on average, performing at their best on reactive tasks. This same general pattern is shown to hold true in animal behaviors such as hunting tactics of predators and escape tactics of prey. Whereas dark-eyed predators tend to rely on immediate, quick, reactions to catch prey, light-eyed predators tend to rely more on their ability to lie-in-wait or stalk prey. Various other behaviors such as perception and social interaction are discussed in the same theoretical framework.

The Mind's Eye Jeremy Frommer, Rick Schwartz, 2014-06-10 Omni was a jewel among popular science magazines of its era (1978-1998). Science Digest, Science News, Scientific America, and Discover may have all been selling well to armchair scientists, but Omni masterfully blended cutting edge science news and science fiction, flashy graphic design, a touch of sex, and the images of a generation of artists completely free and unburdened by the disciplines of the masters. Created by the legendary Bob Guccione, better known for founding Penthouse than perhaps any of the other facets of his inspired career in business, art, and literature, Guccione handpicked the artists and illustrators that contributed to the Omni legacy-they in turn created works ignited by passion and intellect, two of Guccione's principal ideals. *The Mind's Eye: The Art of Omni* is the very first publication to celebrate in stunning detail the exceptional science fiction imagery of this era in an oversized format. *The Mind's Eye* contains 185 images from contributing Omni artists including John Berkey, Chris Moore, H.R. Giger, Rafal Olbinski, Ralle, Tsuneo Sanda, Hajime Sorayama, Robert McCall, and Colin Hay among many more, along with quotes from artists, contributors, writers, and critics. Omni lived in a time well before the digital revolution. The images you see on these pages have taken years to

track down and brought the editors in touch with many esteemed artists, amazing photographers and dusty storage lockers. Their quest is far from over; you'll notice an almost decade-long gap in the material, the contents of which were either lost or destroyed. Efforts to search throughout the universe for any images will continue and will be shared with the world at the all-things-Omni website, omnireboot.com. Stay tuned... Collected in book form for the first time ever, the striking art from this extraordinary magazine will delight fans who remember seeing the work years ago and newcomers interested in the unique aesthetic of this genre's biggest artists. Omni was a magazine about the future. From 1978 to 1998 Omni blew minds by regularly featuring extensive Q&As with some of the top scientists of the 20th century-E.O. Wilson, Francis Crick, Jonas Salk-tales of the paranormal, and some of the most important science fiction to ever see magazine publication: William Gibson's genre-defining stories 'Burning Chrome' and 'Johnny Mnemonic,' Orson Scott Card's 'Unaccompanied Sonata,' novellas by Harlan Ellison and George R. R. Martin, 'Thanksgiving,' a postapocalyptic tale by Joyce Carol Oates-even William S. Burroughs graced its pages. -Vice magazine, Motherboard Omni is not a science magazine. It is a magazine about the future... Omni was sui generis. Although there were plenty of science magazines over the years... Omni was the first magazine to slant all its pieces toward the future. It was fun to read and gorgeous to look at. -Ben Bova, six-time Hugo award winner
