**The B T H and North British Type 1 Bo-Bo Diesel-Electric Locomotives - British Railways Classes 15 and 16** Anthony P. Sayer,2021-12-30 The British Railways 'Pilot Scheme' orders of 1955 included ten BTH and ten NBL Type 1 locomotives, these being introduced during 1957-61 for use in East London, and on the Great Eastern and London, Tilbury & Southend lines. The BTH fleet subsequently expanded to forty-four, as a consequence of their light axle-loading and the availability of spare manufacturing capacity which BR chose to exploit in their quest to eliminate steam traction. Further construction of these two classes ceased after the fifty-four units, with preference being given to the highly reliable English Electric product which by mid-1962 had proliferated to 128 examples. The NBL fleet survived until 1968, being withdrawn after ten years of indifferent performance. The BTH locomotives followed by 1971, although four lingered on as carriage pre-heating units. Dramatic reductions in goods traffic during the 1960s/70s particularly impacted local trip and transfer freight duties, the 'bread and butter' work for the Type 1s, and it was inevitable that the less successful classes were

retired from traffic first. This book looks at the short history of these two classes, making extensive use of archive sources, combined with the primary observations of numerous enthusiasts. Previously unpublished information, covering the introduction, appearance design and performance issues of the locomotives, form a central focus, and, allocations, works histories, storage and disposals, liveries and detail differences are covered in the same level of detail as previous volumes in the ‘Locomotive Portfolio’ series.

Reading this book is the only way to have a specific strategy. This book offers you a chance to trade GFY Stock at predicted prices. Eight methods for buying and selling GFY Stock at predicted low/high prices are introduced. These prices are very close to the lowest and highest prices of the stock in a day. All methods are explained in a very easy-to-understand way by using many examples, formulas, figures, and tables. The BIG DATA of the 3942 consecutive trading days (from November 18, 2004 to October 28, 2020) are utilized. The methods do not require any background on mathematics from readers.

Furthermore, they are easy to use. Each takes you no more than 30 seconds for calculation to obtain a specific predicted price. The methods are not transient. They cannot be beaten by Mr. Market in several years, even until the stock doubles its current age. They are traits of Mr. Market. The reason is that the author uses the law of large numbers in the probability theory to construct them. In other words, you can use the methods in a long time without worrying about their change. The efficiency of the methods can be checked easily. Just compare the predicted prices with the actual price of the stock while referring to the probabilities of success which are shown clearly in the book (click the LOOK INSIDE button to read more information before

Depending on the number of investors who are interested in this book, the performance of the methods from the publication date will be added to the book after one year, and will be stated here in the description of the book too. The methods will help them to maximize profits for their decision. Day traders who buy and sell the stock many times in a day. The Clayton Type 1: Bo-Bo Diesel-Electric Locomotives—British Railways Class 17 Anthony P. Sayer, 2021-05-30 This informative, illustrated guide to the British Railways locomotive series covers its full production lifespan, from 1962–1965. In the early 1960s, the Bo-Bo diesel-electric locomotive known as The Clayton was conceived as the new standard for British Railways, superseding other Type 1 classes. While the early classes suffered from poor driver visibility, the Claytons were highly successful and popular with operating crews. However, the largely untested high-speed, flat Paxman engines proved to be highly problematic. As a result, the Claytons were eventually withdrawn from BR service by December 1971. Anthony Sayer draws on considerable amounts of archive material to tell the full story of these ‘Standard Type 1’ locomotives and the issues

surrounding their rise and fall. Further sources provide insights into the effort and money expended on the Claytons in a desperate attempt to improve their reliability. Supported by over 280 photographs and diagrams, dramatic new insights into this troubled class have been assembled for both historians and modelers alike.
