Case, Semantic Roles, and Grammatical Relations Petra Campe,1994-01-01 This is the first of a series of 6 books dealing with case phenomena in different languages, both Indo- and non-Indo-European, resulting from work by a team of 20 specialists at the University of Leuven. It is the first time such a large-scale investigation into case has been undertaken, and a remarkable feature of the project is the use of computer corpora of authentic material. This bibliography presents the many dimensions involved in research into case and case-related phenomena. This includes not only morphological case markers, but also the crossconstituent (semantic and grammatical) relations expressed by morphological case or by its various counterparts; morpho-syntactic processes such as transitivity and passivization; and pragmatic and textual considerations. In addition, the bibliography reflects the implications of case research for other disciplines, such as foreign language teaching and artificial intelligence. More than 6000 publications are listed. An extensive Subject Index provides easy access to all the topics and major concepts covered. A Language Index and a Guide to Languages/Language Families conclude the book. The other volumes in the series include *The Dative* (2 vols), *The Genitive*, *The Nominative and Accusative*, and *Non-nuclear Cases*.
