Madam Prime Minister Gro Harlem Brundtland, 2005-06-15 One of the world's leading woman politicians tells her inspiring story At forty-one, Gro Harlem Brundtland, physician and mother of four, was appointed prime minister of Norway-the youngest person and the first woman ever to hold that office. In this refreshingly forthright memoir, Brundtland traces her unusual and meteoric career. She grew up with strong role models-her parents were active in the Norwegian resistance and involved in postwar politics. She became known as a pro-choice crusader in the seventies and entered politics as the minister of the environment. She appointed eight women to her second eighteen-member cabinet, to this day a world record, and was the leading figure in the process that led to the Earth Summit in Rio in 1992. As director-general of the World Health Organization since 1997, Brundtland is the first woman elected to run a major UN institution. Along the way, she met a host of international politicians, including Margaret Thatcher-who did not share Brundtland's view on feminism-Mikhail Gorbachev, Nelson Mandela, Ronald Reagan, and Hillary Clinton. Brundtland writes candidly and with humor about raising children in the political limelight and about dealing with political opposition and stereotypes about women. Hers is a fascinating story of one person's ability to make a difference-globally.

The Gamma Ray Sky with Compton GRO and SIGMA M. Signore,P. Salati,G. Vedrenne,2012-12-06 This volume consists of invited lectures and seminars

presented at the NATO Advanced Study Institute The Gamma Ray Sky with COMPTON GRO and SIGMA , which was held at the Centre de Physique Theorique of Les Houches (France) in January / February 1994. The school has been planned by a Scientific Organizing Committee. It was organized with the aim of providing students and young researchers with an up-to-date account of the high-energy phenomena in the vicinity of compact objects and the diffuse gamma-ray backgrounds after the early results from the gamma-ray telescope SIGMA and the four instruments onboard COMPTON GRO (Gamma Ray Observatory) : BATSE (Burst and Transient Source Experiment), COMPTEL (Compton Telescope), EGRET (Energetic Gamma Ray Experiment Telescope) and OSSE (Oriented Scintillation Spectrometer Experiment) . It was attended by more than sixty researchers from many countries. The lectures and seminars represent a complete coverage of our present knowledge and understanding of: Gamma-ray backgrounds, Gamma-ray Bursts, Active Galactic Nuclei, Galactic Compact Objects, Gamma-ray Spectroscopy, Instrumentation and observation techniques, etc ... Most of these lectures are reproduced in this volume. Unfortunately, a few lecturers have chosen not to submit their manuscript.
