*Founders at Work* Jessica Livingston, 2008-11-01 Now available in paperback—with a new preface and interview with Jessica Livingston about Y Combinator! *Founders at Work: Stories of Startups' Early Days* is a collection of interviews with founders of famous technology companies about what happened in the very earliest days. These people are celebrities now. What was it like when they were just a couple friends with an idea? Founders like Steve Wozniak (Apple), Caterina Fake (Flickr), Mitch Kapor (Lotus), Max Levchin (PayPal), and Sabeer Bhatia (Hotmail) tell you

in their own words about their surprising and often very funny discoveries as they learned how to build a company. Where did they get the ideas that made them rich? How did they convince investors to back them? What went wrong, and how did they recover? Nearly all technical people have thought of one day starting or working for a startup. For them, this book is the closest you can come to being a fly on the wall at a successful startup, to learn how it's done. But ultimately these interviews are required reading for anyone who wants to understand business, because startups are business reduced to its essence. The reason their founders become rich is that startups do what businesses do—create value—more intensively than almost any other part of the economy. How? What are the secrets that make successful startups so insanely productive? Read this book, and let the founders themselves tell you.

**The Anatomy of Buzz** Emanuel Rosen, 2002-05-14 A groundbreaking guide to creating the word-of-mouth magic that cuts through the skepticism and information overload of today's consumers, and drives sales-and profits-to new heights. What turns a sleeper into a box-office bonanza or catapults a just-released book to the top of bestseller lists? How do people decide which car to buy, which fashions fit the image they seek, and even which movie to see? Despite the daily assault of advertising and other traditional marketing strategies, statistics show that consumers are overwhelmingly persuaded by word of mouth-the recommendations of friends and the buzz that develops in the marketplace. As Newsweek recently proclaimed, Buzz greases the great conveyor belt of culture and commerce, moving everything from movies to fashions of the body and mind faster and faster. In *The Anatomy of Buzz*, former marketing VP Emanuel Rosen pinpoints the products and services that benefit the most from buzz-a universe that embraces everything from high-tech equipment to books, various consumer and entertainment products to legal and other support services-and offers specific strategies for creating and sustaining effective word-of-mouth campaigns. Drawing from interviews with more than 150 executives, marketing leaders, and researchers who have successfully built buzz for major brands, Rosen describes the ins and outs of attracting the attention of influential first users and big-mouth movers and shakers. He also discusses proven techniques for stimulating customer-to-customer selling-including how companies can spread the word to new territories by taking advantage of customer hubs and networks on the Internet and elsewhere. Recent surveys show that 58 percent of young people rely to some extent

on others when selecting a car, 53 percent of moviegoers follow the recommendations of friends, and 65 percent of the people who bought a Palm organizer were inspired by the enthusiasm of others. With *The Anatomy of Buzz*, business leaders have what they need to start the buzz and reignite excitement about a product or service stalled in a holding pattern, or launch a new product into the stratosphere.

**Inside the SPAM Cartel** Spammer-X Spammer-X, 2004-11-13 Authored by a former spammer, *Inside the SPAM Cartel* is a methodical, technically explicit expose of the inner workings of the SPAM economy. Readers will be shocked by the sophistication and sheer size of this underworld. From the author: You may hate spam and think all spammers are evil, but listen to my story and see why I do this and more importantly, HOW. For most people, the term SPAM conjures up the image of hundreds of annoying, and at times offensive, e-mails flooding their inbox every week. But for a few, SPAM is a way of life that delivers an adrenaline rush fueled by cash, danger, retribution, porn and the avoidance of local, federal, and international law enforcement agencies. *Inside the SPAM Cartel* offer readers a never-before seen view inside this dark sub-economy. You'll meet the characters that control the flow of money as well as the hackers and programmers committed to keeping the enterprise up and running. You may disagree with their objectives, but you can't help but to marvel at their

ingenuity and resourcefulness in defeating spam filters, avoiding being identified, and staying one step ahead of the law. Spam makes up now 64% of all email sent and it is said to be the most annoying part of being online. You'll meet the characters that control the flow of money as well as the hackers and programmers committed to keeping the enterprise up and running. Authored by a former spammer, this is a methodical, technically explicit expose of the innerworkings of the SPAM economy.

*Viral Marketing - A crucial new dimension in 21st century marketing?* Michael Bryce,2004-12-13 Diploma Thesis from the year 2004 in the subject Communications -

Public Relations, Advertising, Marketing, Social Media, grade: 1,0 (A), University of Applied Sciences Mittweida, 49 entries in the bibliography, language: English, abstract: "Markets today are changing fast. Price-sensitive customers, new competitors, new distribution channels, new communication channels, the Internet, wireless commerce, globalization, deregulation, privatization... the list goes on. And it is not only markets that are changing, but the technologies that support them: e-commerce, e-mail, mobile phones, fax machines, sales and marketing automation, cable TV, videoconferencing. It is imperative that companies think through the revolutionary impact of these new technologies." The above quotation illustrates two essential considerations for marketers operating in the 21st century. Firstly, it emphasises that in today's marketing world the way companies communicate with their customers as well as how customers interact with each other have changed significantly. Secondly, it points to a key implication of these changes – the necessity for companies to find innovative ways of embracing these new technologies and of dealing with the changes in a manner that supports their corporate objectives. These revolutionary changes are due first and foremost to the advent of the Internet. Following the initial stages of its development, in which it generated exuberant excitement and exaggerated expectations among companies and consumers alike, it has evolved into an important distribution and communication channel for a large number of companies. Great significance now attaches to the Internet as an integral part of many companies' promotional activities. At the same time consumers have become savvier in the use of the Internet; they appreciate that having more information at their fingertips puts them in a significantly better purchasing position: "Buyers today can

compare prices and product attributes in a matter of seconds. They are only a click away from comparing competitors' prices and can even name the price they want to pay for a hotel room, airline ticket or a mortgage and see whether any willing suppliers respond. Furthermore they can enter a chat room about an area of common interest and exchange information and opinions."
