Hub-and-Spoke Cartels Luke Garrod,Joseph E. Harrington, Jr.,Matthew Olczak,2021-11-16 The first comprehensive economic and legal analysis of hub-and-spoke cartels, with detailed case studies. A cartel forms when competitors conspire to limit competition through coordinated actions. Most cartels are composed exclusively of firms that would otherwise be in competition, but in a hub-and-spoke cartel, those competitors ("spokes") conspire with the assistance of an upstream supplier or a downstream buyer ("hub"). This book provides the first comprehensive economic and legal analysis of hub-and-spoke cartels, explaining their formation and how they operate to create and sustain a collusive environment. Sixteen detailed case studies, including cases brought against toy manufacturer Hasbro and the Apple ebook case, illustrate the economic framework and legal strategies discussed. The authors identify three types of hub-and-spoke cartels: when an upstream firm facilitates downstream firms to coordinate on higher prices; when a downstream intermediary facilitates upstream suppliers to coordinate on higher prices; and when a downstream firm facilitates upstream suppliers to exclude a downstream rival. They devote a chapter to each type, discussing the formation, coordination, enforcement, efficacy, and prosecution of these cartels, and consider general lessons that can be drawn from the case studies. Finally, they present strategies for prosecuting hub-and-spoke collusion. The book is written to be accessible to both economists and lawyers, and is intended for both scholars and practitioners.

The Hub's Metropolis James C. O'Connell,2013-03-22 The evolution of the Boston metropolitan area, from country villages and streetcar suburbs to exurban sprawl and "smart growth." Boston's metropolitan landscape has been two hundred years in the making. From its proto-suburban village centers of 1800 to its far-flung, automobile-centric exurbs of today, Boston has been a national pacesetter for suburbanization. In The Hub's Metropolis, James O'Connell charts the evolution of Boston's suburban development. The city of Boston is compact and consolidated--famously, "the Hub." Greater Boston, however, stretches over 1,736 square miles and ranks as the world's sixth largest metropolitan area. Boston suburbs began to develop after 1820, when wealthy city dwellers built country estates that were just a short carriage ride away from their homes in the city. Then,

as transportation became more efficient and affordable, the map of the suburbs expanded. The Metropolitan Park Commission's park-and-parkway system, developed in the 1890s, created a template for suburbanization that represents the country's first example of regional planning. O'Connell identifies nine layers of Boston's suburban development, each of which has left its imprint on the landscape: traditional villages; country retreats; railroad suburbs; streetcar suburbs (the first electric streetcar boulevard, Beacon Street in Brookline, was designed by Frederic Law Olmsted); parkway suburbs, which emphasized public greenspace but also encouraged commuting by automobile; mill towns, with housing for workers; upscale and middle-class suburbs accessible by outer-belt highways like Route 128; exurban, McMansion-dotted sprawl; and smart growth. Still a pacesetter, Greater Boston has pioneered antisprawl initiatives that encourage compact, mixed-use development in existing neighborhoods near railroad and transit stations. O'Connell reminds us that these nine layers of suburban infrastructure are still woven into the fabric of the metropolis. Each chapter suggests sites to visit, from Waltham country estates to Cambridge triple-deckers.

Hub Cities in the Knowledge Economy Sven Conventz,Ben Derudder,Alain Thierstein,Frank Witlox,2016-05-13 The overarching research topic addressed in this book is the complex and multifaceted interaction between infrastructural accessibility/connectivity of city-regions on the one hand and knowledge generation in these city-regions on the other hand. To this end, the book brings together chapters analysing how infrastructural accessibility is related to changing patterns of business location of knowledge-intensive industries in city-regions. The chapters in this book specifically dwell on recent manifestations of and developments in the accessibility/knowledge-nexus, with a particular metageographical focus on how this materializes in major city-regions. In the different chapters, this shifting relation is broached from different perspectives (seaports, airports, brainports), at different scales (ranging from global-scale analyses to case studies), and by adopting a variety of methodologies (straddling the wide variety of methodological approaches currently adopted in human geography research). Researchers contributing to this edited volume come from different scholarly backgrounds (sociology, human geography, regional planning), which allows for a varied treatise of this research topic.

The Complete Okko Hub,2017-12-27 It is the Time of Mists in the Pajan Empire, an era of warring clans struggling for ultimate power. While most warriors shed blood on the battlefield for one clan or another, Okko the Ronin travels elsewhere on a more personal mission, hunting demons across the land. In his company are Noburo, an enigmatic giant who hides his face behind a red mask; Noshin, a whimsical monk and lover of saké with the power to commune with the spirits of nature; and the young fisherman Tikku, learning his way in the world. From master storyteller Hub, The Complete Okko contains all five volumes of his ambitious fantasy series that explores one ronin's journey of redemption across a world that is as beautiful as it is violent. In addition, this completed collection includes over 120 pages of previously unreleased Okko story material.

Running a Food Hub: Volume Two, a Business Operations Guide James Matson,Jeremiah Thayer,Jessica Shaw,2015-09-17 This report is part of a multi-volume technical report series entitled, Running a Food Hub, with this guide serving as a companion piece to other United States Department of Agriculture (USDA) reports by providing in-depth guidance on starting and running a food hub enterprise. In order to compile the most current information on best management and operations practices, the authors used published information on food hubs, surveyed numerous operating food hubs, and pulled from their existing experience and knowledge of working directly with food hubs across the country as an agricultural business consulting firm. The report's main focus is on the operational issues faced by food hubs, including choosing an organizational structure, choosing

a location, deciding on infrastructure and equipment, logistics and transportation, human resources, and risks. As such, the guide explores the different decision points associated with the organizational steps for starting and implementing a food hub. For some sections, sidebars provide “decision points,” which food hub managers will need to address to make key operational decisions. This illustrated guide may assist the operational staff at small businesses or third-party organizations that may provide aggregation, marketing, and distribution services from local and regional producers to assist with wholesale, retail, and institution demand at government institutions, colleges/universities, restaurants, grocery store chains, etc. Undergraduate students pursuing coursework for a bachelor of science degree in food science, or agricultural economics may be interested in this guide. Additionally, this reference work will be helpful to small businesses within the food trade discipline.

International Education Hubs Jane Knight,2013-09-11 Education hubs are the newest development in the international higher education landscape. Countries, zones and cities are trying to position themselves as reputed centres for higher education and research. But given higher education’s current preoccupation with competitiveness, branding, and economic benefits are education hubs merely a fad, a branding exercise, or are they an important innovation worthy of serious investment and attention? This book tries to answer the question through a systematic and comparative analysis of the rationales, actors, policies, plans and accomplishments for six serious country level education hubs - United Arab Emirates, Qatar, Malaysia, Hong Kong, Singapore and Botswana . The in-depth case studies shows that one size does not fit all. A variety of factors drive countries to prepare and position themselves as an education hub. They include income generation, soft power, modernization of domestic tertiary education sector, economic competitiveness, need for trained work force, and most importantly a desire to move towards a knowledge or service based economy. In response to these different motivations, three different types of education hubs are being developed: the student hub, talent hub, and knowledge/innovation hub. Scholars, policy makers, professionals, students and senior decision makers from education, economics, geography, public policy, trade, migration will find that this book challenges some assumptions about crossborder education and provides new insights and information.

Crimes of the Hub Christopher L. Bennett,2019-07-06 The hapless heroes of Hub Space return with new jobs, new allies, and new adventures at the heart of the galaxy, in a novel expanded and revised from stories originally appearing in Analog. Just when cynical space pilot Nashira Wing has finally started to enjoy helping David LaMacchia with his clueless quest to crack the secrets of the Hub Network, he’s hijacked by a crew of kittenish thieves and trapped in the treasure vault of a far older civilization. What he finds there gives Nashira a shot at the score of a lifetime—but changes David’s life in ways that threaten their friendship. To keep the devious masters of the Hub from getting their tentacles on Nashira’s prize, she and David must mend frayed relationships and navigate new ones, all while facing adventures in larceny, sex, bureaucracy, hyperspatial geometry, and radical body modification. Can they come through it all with their hearts, their identities, and their dignity intact?

Hub Robert Collins,2021-05-19 The races and domains have created the town of Hub as a place for them to negotiate with each other. Hub sits on the border of the Elven Holding and the human Kingdom of Flint Plains. Duncan, a scribe from the human Kingdom of Salt Bay, comes to Hub to get permission to visit the Holding. His purpose is to learn more about the lands across the sea west of Salt Bay. This simple mission will have consequences for the wider world. It marks the dawn of efforts by most domains to help each other. But building peace is not on everyone's mind.The Goblin Empire seeks to use the calm to undermine the other domains. Yet connections are being made and found between humans, elves, and dwarves. History is still being written. Who knows where the tale will go?
