Brussels and Europe Roel de Groof, 2009 Fifty years after the conclusion of the Treaties of Rome (25 March 1957) and the foundation of the European Economic Community, Brussels has become a political world city and international capital with global influence. The acta of the interuniversity and international colloquium, held in Brussels on 18 and 19 December 2006, present a general outline of the research results and 26 contributions, based on original research and divided into three parts. The first part focuses on Brussels' position in the 'world city network'. How has Brussels grown into the European and international 'capital' we know today? What exactly is its legal status as the European

'Capital'? Of course, other aspects such as the relationship between the Brussels-Capital Region and the Europe of Regions and the role of Brussels as the place for lobbying the European Union are also examined. The second part focuses on the interaction between the European institutions and Brussels. What are the socioeconomic, demographic, political and linguistic effects of their presence? Finally, a number of pressure points and areas of tension are analysed. How is Brussels 'imagined' or represented as the capital of Europe? And what is the impact of the European presence on urban planning and security policy? -- Back cover.

Économie de l'immobilier Fouad Sabry,2023-12-20 Qu'est-ce que l'économie immobilière L'application des principes économiques aux marchés immobiliers est précisément ce que l'on entend par le terme « économie immobilière ». Un certain nombre de tentatives sont faites pour définir, expliquer et prévoir les modèles d'offre et de demande, ainsi que les prix. Contrairement à la recherche sur les tendances immobilières, qui se concentre sur

les changements commerciaux et structurels qui influencent le secteur, la discipline étroitement liée de l'économie domestique a une portée plus limitée, axée sur les marchés immobiliers résidentiels. Ces deux approches font appel à l'analyse d'équilibre partiel, à l'économie urbaine, à l'économie spatiale, à des recherches fondamentales et approfondies, à des enquêtes et à des analyses financières. Gestion de l'immobilier public Association des Directeurs Immobiliers, 2017-11-08 L'immobilier est l'un des éléments indispensables au développement de l'action publique et a une importance certaine au regard de la surface qu'il occupe et de sa valeur. En effet, l'État et ses opérateurs occupent environ 100 millions de mètres carrés. S'agissant des collectivités territoriales, leur patrimoine non financier est valorisé à plus de 1 000 milliards d'euros. Cet ouvrage présente et analyse les règles de gestion de l'immobilier public détenu à titre de propriétaire, de locataire, ou

mis à disposition gratuitement. Les différents types de biens pouvant être gérés par l'État, comme par ses opérateurs ou les collectivités territoriales, sont tour à tour analysés, l'ouvrage offrant ainsi une vision globale de l'immobilier public. Cette approche permet de connaître les enjeux et l'intérêt d'une optimisation des actifs, mais aussi de déterminer la méthode de gestion à adopter en fonction de chaque situation.

100 questions les plus fréquentes en droit immobilier Frédéric Ledain, 2007 L'objectif de l'ouvrage, accessible à tous, est de fournir au lecteur une base juridique simple et d'attirer son attention sur les écueils pouvant surgir à l'occasion d'une vente immobilière.--Editeur.

Guide de l'acheteur immobilier Pierre Jamar, 2014-09-03
Comment bien acheter son bien immobilier en Belgique ? Acheter un immeuble, une maison ou un logement, tout le monde connaît la procédure. Il suffit d'un coup de coeur, d'avoir de l'argent et de faire le pas. C'est tellement courant qu'un guide paraît superflu ! Et pourtant, ce n'est pas aussi simple qu'il n'y paraît. D'abord, que faut-il acheter et est-ce bien le moment ? La complexité des lois et des réglementations font que ce projet vous baignera dans un milieu technique et juridique assez méconnu. L'auteur aborde,

dans ce guide, toutes les formes de l'acquisition, des plus conventionnelles aux plus originales, les aspects techniques et légaux ainsi que les différents acteurs intervenants à vos côtés pour vous guider vers votre nouveau statut de futur propriétaire. Comblant les désirs de celui qui veut devenir propriétaire, c'est un peu le but sans prétention de ce guide, raconté de manière vivante et moderne pour vous aider dans vos choix et explorer toutes les pistes en évitant les embûches. Un complément indispensable au savoir des acteurs de l'immobilier ... pour une réflexion professionnelle !

Manuel des indices des prix de l'immobilier résidentiel

Statistical Office of the European Communities, International Labour Office, International Monetary Fund, Organization for Economic Co-operation and Development, United Nations, World Bank, 2014-09-24

L'achat d'un logement est généralement l'opération financière la plus importante à laquelle un citoyen procédera au cours de sa vie. Le logement représente la plus grande proportion des dépenses des ménages, mais également leur bien le plus cher. Les indices des prix de l'immobilier résidentiel mesurent le taux de variation de ces prix au fil du temps. Ces statistiques sont essentielles non seulement pour les ménages du monde entier, mais également

pour les décideurs de la politique économique et monétaire. Parmi leurs utilisations professionnelles, ils servent par exemple à surveiller les déséquilibres macroéconomiques et l'exposition aux risques du secteur financier. Ce manuel, premier du genre, présente des orientations complètes pour l'établissement des indices des prix de l'immobilier résidentiel et explique en détail les méthodes et bonnes pratiques utilisées pour leur calcul. Il examine également les fondements économiques et statistiques sous-jacents, et définit les principes qui orientent les choix méthodologiques et pratiques pour l'établissement des indices. Le manuel est destiné principalement aux statisticiens officiels chargés de produire des indices des prix de l'immobilier résidentiel, ainsi qu'à toute partie intéressée par l'établissement de tels indices, en leur fournissant un cadre méthodologique et pratique harmonisé. Le manuel des indices des prix de l'immobilier résidentiel a été rédigé par d'éminents spécialistes universitaires de la théorie des indices et par des experts de l'établissement de tels indices. Sa préparation a été coordonnée par l'Office statistique de l'Union européenne (Eurostat), avec la collaboration de la Banque mondiale, de la Commission économique des Nations Unies pour l'Europe, du Fonds monétaire international (FMI), de l'Organisation

de coopération et de développement économiques (OCDE) et de l'Organisation internationale du travail (OIT).

Tradition in motion, 2019-09-12 In een wereld die constant verandert en versnelt kunnen ondernemingen en organisaties niet achterblijven. Dat is ook zo voor het notariaat. De notaris moet de relatie met zijn cliënten, maar ook met zijn medewerkers, herbekijken zodat een notariële loopbaan aantrekkelijk blijft. Dit werk bevat de bijdragen aan het Notarieel Congres 2019, met focus op HR en algemeen menselijke aspecten (soft skills...) en de implementatie van nieuwe technologieën (blockchain, smart contracts, AI, ...) in het notariaat

Transforming Cities Through Temporary Urbanism Lauren Andres, Amy Y. Zhang, 2020-12-18 This book advances the reflexion into how temporary urbanism is shaping cities across the world. Temporary urbanism has become a core concept in urban development, and its application is increasingly crossing the borders of both the North and the Global South. There is a need to reflect upon the diverse ways of understanding and implementing the temporary in the production of space internationally and discuss what this means, for both research and practice. Divided into two sections, the book compiles and reflects upon the various

attempts to reframe and reconceptualise temporary urbanism. The first section focuses on reframing and reconceptualising temporary urbanisms. It develops the argument that temporary urbanism allows a reinterrogation of the role of temporalities and non-permanence into the place-making process and hence in the production and reproduction of cities, including the adaptability of existing spaces and production of new spaces. While drawing upon different theoretical and conceptual framings (permeability, assemblage, rhythms, waiting, ...), authors bring insights from various case studies: the Dublin Biennial (Ireland), temporary uses in Geneva (Switzerland), temporary urban settlements in sub-Saharan Africa, refugees' camp in Beirut (Lebanon) and political protests in Skopje (Republic of Macedonia). The second section looks at unwrapping the complexity and diversity of temporary urbanisms. It aims at securing a better understanding of the complexity and diversity of temporary urbanism, including a dialogue between various experiences both in the Global North and in the Global South. It looks at the implications of temporary urbanism in the delivery of planning and considers how and by whom cities are governed and transformed. Again, a range of examples are mobilised by contributors spanning from temporary

uses and projects in London (UK), Santiago (Chile), Paris (France), Vancouver (Canada), Barcelona (Spain), Budapest (Hungary), Beijing (China), Sao Paulo (Brazil) and Milwaukee (USA). This book will be of interests to all researchers, practitioners, and students who want to gain a more thorough understanding of the topic of temporary urbanism, compare its diversity and similarities across different contexts, and reflect on the wider implications of temporary urbanisms for urban transformations.
