Angular Statistics A V Dattatreya Rao,S V S Girija,2019-12-20 Directional data arise in the form of circular / semicircular / axial, symmetric / asymmetric, uni / bimodal data, in practical situations of varied fields. For the purpose of modeling such kind of data sets, the data scientists found that existing models as inadequate. As there is paucity of angular models, and to fill the gap, this book is designed at constructing new angular models with the existing techniques and to develop new tools of constructing angular models with an application to control charts in angular models. This book is planned to cover the following topics in nine chapters Wrapped, stereographic and offset circular models Construction of angular models using Rising Sun function, positive definite sequences, discretization and through differential approach Extemporaneous Semicircular / arc and asymmetric l – axial models Choice of angular models as an inferential aspect and construction of control charts for angular data as an application are presented. This graduate level book will be useful for data scientists, researchers and research students of Statistics and allied fields.

Way Beyond Compare John C. Winn,2008-12-09 An answered prayer for Beatles fans and collectors, the first volume of a unique work that exhaustively chronicles all known and available Beatles recordings! Have you ever watched a Beatles film clip and wondered: • Where was that filmed? • Is any more of that footage available? Have you ever heard a Beatles interview and asked: • When was that taped? • Where's the best place to find the complete recording? *Way Beyond Compare* has the answers to these and thousands of similar questions. It's the key to unlocking the secrets behind every known Beatles recording in circulation through 1965, telling you where to find them, what makes them unique, and how they fit within the context of the Beatles' amazing musical and cultural journey. Author John C. Winn has spent twenty years (twice as long as the Beatles were together!) sifting through, scrutinizing, organizing, and analyzing hundreds of hours of audio and video recordings—and putting them into a digestible chronological framework for *Way Beyond Compare* and its companion volume, *That Magic Feeling: The Beatles' Recorded Legacy, Volume Two, 1966–1970*. “It takes a rare and special kind of mind to sift through it all, to research and enquire, catalogue and chronicle, assess and contrast, identify and label, and to fit all the myriad pieces into the vast jigsaw puzzle that is the Beatles' career. John C. Winn is that person, and he's done it with a rare skill and intelligence.” –Mark Lewisohn

World Malaria Report 2014 World Health Organization,2015-07-07 The World malaria report 2014 summarizes information received from 97 malaria endemic countries and other sources and updates the analyses presented in 2013. It assesses global and regional malaria trends highlights progress made towards global targets and describes opportunities and challenges in controlling and eliminating the disease. Most of the data presented in this report are for 2013.

Geographies of Health and Development Assoc Prof Isaac Luginaah,Assoc Prof Rachel Bezner Kerr,2015-03-28 This book begins by exploring some of the circumstances surrounding the distinctive health inequities currently facing many developing countries, including malaria, maternal mortality and HIV/AIDS. This is followed by a discussion of how matters of physical access and human resource issues and, perhaps most importantly, the challenges of financing, together shape the access and utilization of health care. Examining how the environment interacts to influence the health of the people that live there, the next section includes discussion around challenges of food (in)security, and the importance of clean and uncontaminated water for health. Finally, the book explores the influence of globalization on health, specifically within the urban environment, against the backdrop of global health policy.

When One Door Closes Peter Sissons,2012-02-09 A Liverpool boy from the same cohort as John Lennon, Paul McCartney and George Harrison, Peter Sissons was destined for great things. Then he was caught on the wrong side of rebel lines during the Nigerian Civil War and shot through both legs his blossoming career as a war reporter came abruptly to an end. But another door was about to open, and Sissons went on to guide a generation through every momentous event of the last forty-five years. Surprisingly funny, dramatic and often poignant, *When One Door Closes* is the bestselling story of Britain's most distinguished newsreader and reveals what he really thinks about the state of the British media, global affairs, Climategate and the workings of the BBC.

World malaria report 2022 World Health Organization,2022-12-08 Each year, WHO's World malaria report offers in-depth information on the latest trends in malaria control and elimination at global, regional and country levels. The report highlights progress towards global targets and describes opportunities and challenges for curbing and eliminating the disease. This year's report includes three new sections on: (1) global and regional initiatives launched in 2021 and 2022; (2) global malaria surveillance and country-level case studies on surveillance systems assessments; and (3) research and development. The report also includes an expanded section on threats to malaria control, with a focus on the declining effectiveness of insecticide-treated mosquito nets.

Rockingham Castle and the Watsons Charles Wise,1891 Edward Watson of Lyddington, Rutland County, a member of an ancient family, was a justice of the peace and a surveyor general. He and his wife, Emma Smith, are said to have been the parents of fifteen children; seven are listed in his will. When he died in 1530, he held

leases on a half a dozen parsonages and several lordships, lands, and tenements and was lord of some fourteen manors. The Watsons of Rockingham Castle were his descendants.

Fundamentals of Signal Processing for Sound and Vibration Engineers Kihong Shin,Joseph Hammond,2008-04-15 Fundamentals of Signal Processing for Sound and Vibration Engineers is based on Joe Hammond’s many years of teaching experience at the Institute of Sound and Vibration Research, University of Southampton. Whilst the applications presented emphasise sound and vibration, the book focusses on the basic essentials of signal processing that ensures its appeal as a reference text to students and practitioners in all areas of mechanical, automotive, aerospace and civil engineering. Offers an excellent introduction to signal processing for students and professionals in the sound and vibration engineering field. Split into two parts, covering deterministic signals then random signals, and offering a clear explanation of their theory and application together with appropriate MATLAB examples. Provides an excellent study tool for those new to the field of signal processing. Integrates topics within continuous, discrete, deterministic and random signals to facilitate better understanding of the topic as a whole. Illustrated with MATLAB examples, some using ‘real’ measured data, as well as fifty MATLAB codes on an accompanying website.

MMS Daniel Ralph,Paul Graham,2003-11-21 MMS has evolved from the huge popularity of the SMS text service for GSM networks. It is a departure from the transport mechanism used for SMS (which is based on the GSM signalling channels) to the use of IP to transport messages within the MMS network. To this end MMS has similarities with Internet email and standard IETF protocols. As with any new technology it is difficult to accurately predict the position within the next 5 years, although based on previous experience with WAP and SMS it would be fair to say that these protocols will increase in usage over the next 5 years and become legacy for a further 5 years following which, users will migrate onto the next wave of messaging. Significant revenue growth and data usage is expected to be driven by consumer usage of MMS. But MMS technology offers more than just a broadening of message content. With MMS, it is not only possible to send your multimedia messages from one phone to another, but also from phone to email, and vice versa. This feature dramatically increases the possibilities of mobile communication, both for private and corporate use. Multimedia messaging will reshape the landscape of mobile communication, making it more personal, more versatile, and more expressive than ever before. MMS: Is the first book to address how MMS (and the use of IP to transport messages) will affect existing infrastructure and business models Covers the fundamental changes to mail and billing systems Includes future recommendations, such as interoperability and evolution Presents an overview of the MMS technology components Drawing on the authors hands-on experience in the implementation of MMS technology (developing, billing and delivering services) at BT, this innovative book will appeal to engineering managers, network operators, market analysts, business decision makers, content providers and operator organizations.

More Bad News (Routledge Revivals) Peter Beharrell,Howard Davis,John Eldridge,John Hewitt,Jean Hart,Gregg Philo,Paul Walton,Brian Winston,2009-10-15 First published in 1980, More Bad News is the Second Volume in the research findings of the Glasgow University Media Group. It develops the analytic findings and methods of the first volume Bad News through a series of Case Studies of Television News Coverage, and argues that much of what passes as balanced and factual news reporting is produced from a highly partial viewpoint. Focusing on the British economy in crisis, and its thematic linkage with the Social Contract during the first four months of 1975, the book deals with three main levels of activity: the story, the language and the visuals. As the book unpacks each level of routine news coverage a picture emerges which has the surface appearance of neutrality and balance but is in fact highly partial and restricted
