Semantics in Acquisition Veerle van Geenhoven,2006-07-15 This volume contains writings focusing on semantic phenomena and their interpretation in the analysis of the language of a learner. The variety of phenomena that are addressed is substantial: temporal aspect and tense, specificity, quantification, scope, finiteness, focus structure, and focus particles. These phenomena are investigated in many languages. The volume creates a theoretical as well as an empirical bridge between semantic research on the one hand and psycholinguistic acquisition studies on the other.

Handbook of Generative Approaches to Language Acquisition Jill de Villiers,Tom Roeper,2011-08-27 Modern linguistic theory has been based on the promise of explaining how language acquisition can occur so rapidly with such subtlety, and with both surprising uniformity and diversity across languages. This handbook provides a summary and assessment of how far that promise has been fulfilled, exploring core concepts in acquisition theory, including notions of the initial state, parameters, triggering theory, the role of competition and frequency, and many others, across a variety of syntactic topics that have formed the central domains of investigation and debate. These topics are treated from the unique perspective of central actors in each domain who have helped shape the research agenda. The authors have presented a summary of the data, the theories under discussion, and their own best assessments of where each domain stands. Providing as well the agenda for future work in the field showing both particular needs and general directions that should be pursued in the coming decades.

From NP to DP: The expression of possession in noun phrases Martine Coene,Yves d'. Hulst,2003-01-01 This is the first of a two-volume selection of refereed and revised papers, originally presented at the international conference From NP to DP at the University of Antwerp. The papers address issues in the syntax and semantics of the noun phrase, in particular the so-called DP-hypothesis which takes noun phrases to be headed by a functional head D(eterminer). The major concerns can be grouped around 3 subthemes: the internal syntax of noun phrases, the syntax and semantics of bare nouns and indefinites and the expression of measurement in noun phrases. The wealth of data coming from over 40 different languages combined with a thorough introduction to the current issues in the field of NPs/DPs and some alternative syntactic and semantic analyses, provide a comprehensive reference work from both a descriptive and a theoretical point of view. The second volume is concerned exclusively with the expression of possession in noun phrases.

The Syntax of Topic, Focus, and Contrast Ad Neeleman,Reiko Vermeulen,2013-01-01 This book addresses how core notions of information structure (topic, focus and contrast) are expressed in syntax. The authors propose that the syntactic effects of information structure come about as a result of mapping rules that are flexible enough to allow topics and foci to be expressed in a variety of positions, but strict enough to capture certain cross-linguistic generalisations about their distribution. In particular, the papers argue that only contrastive topics and contrastive foci undergo movement and that this is because such movement has the function of marking the scope of contrast. Several predications are derived from this proposal: such as that a focus cannot move across a topic - whether the latter is in situ or not. Syntactic and semantic evidence in support of this proposal is presented from a wide range of languages (including Dutch, English, Japanese, Korean and Russian) and theoretical consequences explored. The first chapter not only outlines its theoretical aims, but also provides an introduction to information structure. As a consequence, the book is accessible to advanced students as well as professional linguists.
