Inside the Plaza Ward Morehouse, 2001 (Applause Books). From Scott and Zelda Fitzgerald cavorting in the Pulitzer Fountain to Ivana Trump patrolling the halls to inspect the rooms, this is the Plaza Hotel as no one has ever seen it, or been permitted to see it. The Plaza is the place where the Beatles headquartered when they invaded America. It's where George M. Cohan held court during the golden era of Broadway. It's where Marilyn busted a strap on cue, where Cary Grant started out from when he traveled North By Northwest, and where Macauley Culkin stayed after staying Home Alone. From the railroad tracks in the basement to the vast luxury suites overlooking Central Park, this is the full story behind the gilded doors, the inside scoop direct from the people who have cavorted there and worked there.

Digital Music Wars Patrick Burkart,Tom McCourt,2006 With the rising popularity of online music, the nature of the music industry is rapidly changing. Rather than buying albums, tapes, or CDs, music shoppers can purchase just one song at a time. It's akin to putting a coin into a diner jukebox--except the jukebox is out in cyberspace. But has increasing copyright protection gone too far in keeping the music from the masses? The authors show how the online music industry will establish the model for digital distribution, cultural access, and consumer privacy. Digital Music Wars explores the far-reaching implications of downloading music in an in-depth and insightful way.

Hard News Seth Mnookin,2005-08-09 On May 11, 2003, The New York Times devoted four pages of its Sunday paper to the deceptions of Jayson Blair, a mediocre former Times reporter who had made up stories, faked datelines, and plagiarized on a massive scale. The fallout from the Blair scandal rocked the Times to its core and revealed fault lines in a fractious newsroom that was already close to open revolt. Staffers were furious-about the

perception that management had given Blair more leeway because he was black, about the special treatment of favored correspondents, and most of all about the shoddy reporting that was infecting the most revered newspaper in the world. Within a month, Howell Raines, the imperious executive editor who had taken office less than a week before the terrorist attacks of September 11, 2001-and helped lead the paper to a record six Pulitzer Prizes for its coverage of the attacks-had been forced out of his job. Having gained unprecedented access to the reporters who conducted the Times's internal investigation, top newsroom executives, and dozens of Times editors, former Newsweek senior writer Seth Mnookin lets us read all about it-the story behind the biggest journalistic scam of our era and the profound implications of the scandal for the rapidly changing world of American journalism. It's a true tale that reads like Greek drama, with the most revered of American institutions attempting to overcome the crippling effects of a leader's blinding narcissism and a low-level reporter's sociopathic deceptions. *Hard News* will shape how we understand and judge the media for years to come.

The New York Times Almanac 2002 John Wright, 2006-05-23
The New York Times Almanac 2002 is the almanac of record. Drawing on the resources of the world's premier news organization, it provides readers with a wealth of data about the United States and the world in a readable and more easily accessible form than other fact finders. Un-rivaled in scope and unsurpassed in comprehensiveness. The New York Times Almanac pays careful attention to significant issues, topics, and developments of the day and sets them in historical context. It gives the stories-and the stories behind the stories. The New York Times Almanac is the first choice for students, journalists, and researchers-for anyone who needs timely, accurate information about the United States and other nations around the globe. The

New York Times Almanac 2002 includes: The first results of the 2000 Census; Comprehensive coverage of all the states and every nation in the world; World Series results and the most comprehensive sports section of any almanac; Notable obituaries from the worlds of politics. entertainment. and science; More information about the Internet. the worldwide AIDS epidemic. and world population than any other almanac; The most complete coverage of environmental issues. the economy, and the workings of the federal government; All major Academy Award winners since 1928 and the names of all Nobel Laureates and why they won and much, much more.

Backstory Ken Auletta, 2004-12-28 It is said that journalism is a vital public service as well as a business, but more and more it is also said that big media consolidation; noisy, instant opinions on cable and the Internet; and political “bias” are making a mockery of such high-minded ideals. In *Backstory*, Ken Auletta explores why one of America’s most important industries is also among its most troubled. He travels from the proud New York Times, the last outpost of old-school family ownership, whose own personnel problems make headline news, into the depths of New York City’s brutal tabloid wars and out across the country to journalism’s new wave, chains like the Chicago Tribune’s, where “synergy” is ever more a mantra. He probes the moral ambiguity of “media personalities”—journalists who become celebrities themselves, padding their incomes by schmoozing with Imus and rounding the lucrative corporate lecture circuit. He reckons with the legacy of journalism’s past and the different prospects for its future, from fallen stars of new media such as Inside.com to the rising star of cable news, Roger Ailes’s Fox News. The product of more than ten years covering the news media for The New Yorker, *Backstory* is Journalism 101 by the course’s master teacher.

The Internet Jane Dorner, 2000 Looks at the internet from a writer's point of view and discusses how to: email; join writers' circles and reading groups; locate agents, editors etc, find

bibliographical references; exploit electronic writing as a new art form; evaluate new publishing opportunities; resource creative writing courses.

Second Class No Longer Phillip L. Beukema, 2023-10-19 No one could have predicted thirty years ago that online learning would become such a key facet of our educational landscape in nearly every corner of the world. Online teaching and learning have evolved rapidly and far more widely than imaginable, accompanied by huge impacts on business, society, and our entire educational enterprise. Drawing on his extensive experience in online teaching at both the graduate and undergraduate level as well as his 25 years in higher ed administration, the author paints a global picture of the evolution of online education. He describes how one country after another has witnessed the astonishing growth of online degrees and “microcredentials” of all kinds. Along the way, he dispels the myths and misperceptions that have grown up around online learning. With incisive analysis built on solid data, the author demonstrates that online programs are no longer regarded as second class but in fact are fully in the mainstream of higher education. Not only that but he predicts that, by 2030, they will become the gold standard by which the more traditional degrees will be judged.

Transnational Cinema Elizabeth Ezra, Terry Rowden, 2006 Topics include: from national to transnational cinema; global cinema in the digital age; motion pictures: film, migration and diaspora; tourists and terrorists.

Reorienting Chinese Stars in Global Polyphonic Networks Dorothy Wai Sim Lau, 2021-03-08 This monograph offers a cutting edge perspective on the study of Chinese film stars by advancing a “linguaphonic” model, moving away from a conceptualization of transnational Chinese stardom reliant on the centrality of either

action or body. It encompasses a selection of individual personalities from the most iconic Bruce Lee, Michelle Yeoh, and Maggie Cheung to the not-yet-full-fledged Takeshi Kaneshiro, Jay Chou, and Tang Wei to the newest Fan Bingbing, Liu Yifei, Wen Ming-Na, and Sammi Cheng who are exemplary to the star-making practices in the designated sites of articulations. This volume notably pivots on specific phonic modalities – spoken forms of tongues, manners of enunciation, styles of vocalization -- as means to mine ethnic and ideological underpinnings of Chinese stardom. By indicating a methodological shift from the visual-based to aural-based vectors, it asserts the phonic as a legitimate bearing that can generate novel vigor in the reimagination of Chineseness. By exhausting the critical affordability of the phonic, this book unravels the polemics of visibility and aurality, body and voice, as well as onscreen personae and offscreen existence, remapping the contours of the ethnic fame-making in the global mediascape.
