Is International Law International? Anthea Roberts, 2017

This book takes the reader on a sweeping tour of the international legal field to reveal some of the patterns of difference, dominance, and disruption that belie international law's claim to universality. Pulling back the curtain on the divisible college of international lawyers, Anthea Roberts shows how international lawyers in different states, regions, and geopolitical groupings are often subject to distinct incoming influences and outgoing spheres of influence in ways that reflect and reinforce differences in how they understand and approach international law. These divisions manifest themselves in contemporary controversies, such as debates about Crimea and the South China Sea. Not all approaches to international law are created equal, however. Using case studies and visual representations, the author demonstrates how actors and materials from some states and groups have come to dominate certain transnational flows and forums in ways that make them disproportionately influential in constructing the international. This point holds true for Western actors, materials, and approaches in general, and for Anglo-American (and sometimes French) ones in particular. However, these patterns are set for disruption. As the world moves past an era of Western dominance and toward greater multipolarity, it is imperative for international lawyers to understand the perspectives and approaches of those coming from diverse backgrounds. By taking readers on a comparative tour of different international law academies and textbooks, the author encourages them to see the world through the eyes of others -- an essential skill in this fast changing world of shifting power dynamics and rising nationalism.

Three Cups of Tea Greg Mortenson,David Oliver

Relin,2006-03-02 The astonishing, uplifting story of a real-life Indiana Jones and his humanitarian campaign to use education to combat terrorism in the Taliban's backyard Anyone who despairs of the individual's power to change lives has to read the story of Greg Mortenson, a homeless mountaineer who, following a 1993 climb of Pakistan's treacherous K2, was inspired by a chance encounter with impoverished mountain villagers and promised to build them a school. Over the next decade he built fifty-five schools—especially for girls—that offer a balanced education in one of the most isolated and dangerous regions on earth. As it chronicles Mortenson's quest, which has brought him into conflict with both enraged Islamists and uncomprehending Americans, Three Cups of Tea combines adventure with a celebration of the humanitarian spirit.

International Love Jonathan M. Goff Jr.,2018-01-13 This is a book about Jonathans experience with foreign relations and finding that right soul mate, someone to live with, to bond with for the rest of your life. This is a book about situations that happened to Jonathan that needs to be shared with others so that you or your friends and family can take his experiences and learn from it. Its a book about going to eastern countries at this point in time, what to watch out for, good and bad. Its also about the American males that look for love, and sometimes you find it and sometimes when youre not looking for love, love will find you. This is also a book that is going to help keep your eyes wide open for something that may or may not happen to you in your quest for a new relationship with a person abroad. Its also a book that may help a friend or a brother or a sister or even a mother or a father who is looking for a partner. This is a book that will give you new light having a relationship across the ocean or in distant lands. This is a book that could save you and helps you with traveling abroad, what to

watch out for and how to prepare for things that may cross your path and how to deal with it. May GOD be with you every step of the way.

International Peacekeeping Paul Francis Diehl,1993 Since the end of the Cold War, U.S. officials have been more willing to remind allies that the United States will not play the role of international policeman. Given U.S. reluctance, the job of peacekeeping will fall increasingly to international organizations and regional alliances. In *International Peacekeeping* Paul Diehl examines the recent record of United Nations peacekeeping forces and develops criteria for assessing their operations. His analysis provides useful guidance for the management of new hostilities in areas such as Central and Eastern Europe, where the dissolution of the Soviet Union has spawned bitter civil wars and dangerous border disputes. Diehl identifies three sets of factors that affect traditional international peacekeeping operations. He begins by discussing the practical concerns of peacekeeping efforts, such as force composition, organization, and deployment. He then examines issues related to the political and military context in which the forces are deployed, including the nature of the conflict and the involvement of third parties. Finally, he considers the authorization by the relevant international body - usually the United Nations - as it relates to the mission's mandate, policies, and financing. He concludes by analyzing the viability of new roles for U.N. peacekeeping troops, such as humanitarian assistance, and by exploring structural alternatives to U.N. peacekeeping operations.

The Privileges and Immunities of International Organizations in Domestic Courts August Reinisch,2013-09-12 International organizations are increasingly operating across borders and engaging in legal transactions in virtually all jurisdictions. This makes, familiarity with the applicable law and practice imperative

for both international organizations and those who engage in legal relations with them. Furthermore, the issue of whether, how, and to what extent domestic courts take into account decisions of foreign and international courts and tribunals in their own decision-making has become increasingly important in recent years. This book provides a comprehensive empirical study of this transnational judicial dialogue, focusing on the law and practice of domestic jurisdictions concerning the legal personality, privileges, and immunities of international organizations. It presents a selection of detailed country-by-country studies, examining the manner of judicial dialogue across domestic jurisdictions, and between national and international courts. The approach taken in this book intersects with three highly topical areas of international legal scholarship: the rapidly evolving law of international institutions; the burgeoning research into the role of domestic courts in the international legal system; and the recent rise of empirically-oriented legal scholarship. Utilizing OUP's International Law in Domestic Courts database, the book presents analysis of little-known cases which have real international significance, illustrating the impact and extent of transnational judicial dialogue in the international legal system. The book provides important perspectives on the evolution and status of the law of immunity of international organizations, and contributes to the understanding of relationships between national courts, and between national and international courts.

Institutional Supports for the International Rule of Law Charles Sampford, Ramesh Thakur, 2014-08-27 The rule of law is widely seen as the cornerstone of any effective polity and increasingly a vital component of the international political system. If the international rule of law were to be strengthened, it would greatly contribute to trade, security, human rights and global cooperation in a range of fields. Yet, in many areas the rule of law seems almost absent in international affairs. This book explores the institutions that support the effectiveness of the rule of law

domestically. It focuses on the extent to which similar institutions already exist at international level and analyses the possibility of their further development. The authors speculate on how the international rule of law might be advanced in the future, thereby suggesting potential strategies for strengthening the international rule of law. Adopting an interdisciplinary approach and combining the fields of international relations, politics and law, this book covers a range of institutions including: UN Security Council International Court of Justice Human rights machinery Regional human rights International Criminal Court World Trade Organization International Tribunal for the Law of the Sea UN Department of Peacekeeping Operations. It will be of strong interest to students and scholars of international relations, international organisations, global governance, international law, migration law, international peace and security law, applied ethics, political economy, political science and sociology.

Social Issues, Globalisation and International Institutions

Virginia A. Leary, Daniel Warner, 2005-11-29 This original study examines the extent to which international labour issues have become an issue of concern within the European Union, the ILO, the OECD (Organization for Economic Cooperation and Development), and the WTO (World Trade Organization).

Desiring TESOL and International Education Raqib

Chowdhury, Phan Le Ha, 2014-01-22 This book addresses how Western universities have constructed themselves as global providers of education, and are driven to be globally competitive. It examines how the term 'international' has been exploited by the market in the form of government educational policies and agencies, host institutions, academia and the mass media. The book explores matters relating to the role of the English language in international education in general and the field of TESOL in particular. It demonstrates how English and TESOL have exercised their symbolic power, coupled with the desire for international education, to create convenient identities for international TESOL

students. It also discusses the complexity surrounding and informing these students' painful yet sophisticated appropriation of and resistance to the convenient labels they are subjected to.

The Diversification and Fragmentation of International Criminal Law Larissa van den Herik, Carsten Stahn, 2012-10-23 This volume deals with the tension between unity and diversification which has gained a central place in the debate under the label of 'fragmentation'. It explores the meaning, articulation and risks of this phenomenon in a specific area: International Criminal Justice. It brings together established and fresh voices who analyse different sites and contestations of this concept, as well as its context and specific manifestations in the interpretation and application of International Criminal Law. The volume thereby connects discourse on 'fragmentation' with broader inquiry on the merits and discontents of legal pluralism in 'Public International Law'.

Routledge Handbook of International Statebuilding David Chandler, Timothy D. Sisk, 2013-09-02 This new Handbook offers a combination of theoretical, thematic and empirical analyses of the statebuilding regime, written by leading international scholars. Over the past decade, international statebuilding has become one of the most important and least understood areas of international policy-making. Today, there are around one billion people living in some 50-60 conflict-affected, 'fragile' states, vulnerable to political violence and civil war. The international community grapples with the core challenges and dilemmas of using outside force, aid, and persuasion to build states in the wake of conflict and to prevent such countries from lapsing into devastating violence. The Routledge Handbook of International Statebuilding is a comprehensive resource for this emerging area in International Relations. The volume is designed to guide the reader through the background and development of international statebuilding as a policy area, as well as exploring in depth significant issues such as security, development, democracy and human rights. Divided into

three main parts, this Handbook provides a single-source overview of the key topics in international statebuilding: Part One: Concepts and Approaches Part Two: Security, Development and Democracy Part Three: Policy Implementation This Handbook will be essential reading for students of statebuilding, humanitarian intervention, peacebuilding, development, war and conflict studies and IR/Security Studies in general.

International Bioenergy Trade Martin Junginger, Chun Sheng Goh, André Faaij, 2013-10-16 The trade of global bioenergy commodities, such as ethanol, biodiesel and wood pellets has been growing exponentially in the past decade, and have by 2013 reached true “commodity” volumes, i.e. tens of millions of tonnes traded each year, and billions (both in US\$/€) of annual turnover. IEA Bioenergy Task 40 was founded in 2004 and is now in its 4th triennium. For the past 9 years, task 40 has monitored the developments in international bioenergy trade, including the organization of about 20 workshops on trade-related topics, and the publication of over 100 studies, country reports, newsletters, etc. The amount of material produced over the years and insights gained in how biomass markets and international trade of biomass and biofuels has developed is impressive. Besides that the group has produced overviews and insights, also a large amount of practical experience has been brought together in what works and what doesn’t. Last but not least, based on all this, there are clear(er) views on how to proceed to build working sustainable international biomass markets in the future. This book compiles those lessons and insights into an easily accessible book publication.

The Irish Yearbook of International Law, Volumes 4-5, 2009-10 Fiona de Londras, Siobhán Mullally, 2012-05-28 The Irish Yearbook of International Law is intended to stimulate further research into Ireland's practice in international affairs and foreign policy, filling a gap in existing legal scholarship and assisting in the dissemination of Irish thinking and practice on matters of

international law. On an annual basis, the Yearbook presents peer-reviewed academic articles and book reviews on general issues of international law. Designated correspondents provide reports on international law developments in Ireland, Irish practice in international fora and the European Union, and the practice of joint North-South implementation bodies in Ireland. In addition, the Yearbook reproduces documents that reflect Irish practice on contemporary issues of international law. Publication of the Irish Yearbook of International Law makes Irish practice and *opinio juris* more readily available to Governments, academics and international bodies when determining the content of international law. In providing a forum for the documentation and analysis of North-South relations the Yearbook also make an important contribution to post-conflict and transitional justice studies internationally. As a matter of editorial policy, the Yearbook seeks to promote a multilateral approach to international affairs, reflecting and reinforcing Ireland's long-standing commitment to multilateralism as a core element of foreign policy.

International Entrepreneurship in Small and Medium Size Enterprises Hamid Etemad, 2004-01-01 The drivers of globalization are removing the barriers that segregated the competitive space of the small and large firms in the past. It is becoming increasingly difficult for independent small firms to thrive in their traditional markets unless they are globally competitive. Managing an enterprise's commercial, industrial and political relations well, regardless of size and location, is the essence of the entrepreneurial challenge in this competitive arena. Small and medium size enterprises (SMEs) often face very different issues than large multinational enterprises do when confronting internationalization. This volume provides an in-depth discussion of these challenges. The contributors to this volume explore the emerging patterns of SME growth and international expansion in response to the evolving competitive environment, dynamics of competitive behavior, entrepreneurial processes and formulation

of strategy. They examine the basis and requirements of growth and expansion from three perspectives: the rapidly-changing environment in which business is conducted, entrepreneurial characteristics, and the evolving strategic and competitive response to this changing business environment. Business leaders, scholars and students interested in international business and entrepreneurship will welcome this volume.

Deference in International Courts and Tribunals Lukasz Gruszczynski, Wouter G. Werner, 2014 International courts use two key methodologies to determine the degree of deference granted to states in their implementation of international obligations: the standard of review and margin of appreciation. This book investigates how these doctrines are applied in international courts, analysing where their approaches converge and diverge.

Global Identity in Multicultural and International Educational Contexts Nigel Bagnall, 2015-03-27 The increased movement of people globally has changed the face of national and international schooling. Higher levels of mobility have resulted from both the willing movement of students and their families with a desire to create a better life, and the forced movement of refugee families travelling away from war, famine and other extreme circumstances. This book explores the idea that the complex connections created by the forces of globalisation have led to a diminishing difference between what were once described as international schools and national schools. By examining a selection of responses from students attending international schools in Brazil, the United Kingdom, France, Germany, the Philippines and Switzerland, the book discusses key issues surrounding identity and cosmopolitan senses of belonging. Chapters draw from current literature and recent qualitative research to highlight the concerns that students face within the international school community, including social, psychological, and academic difficulties. The interviews provide a rich and unique body of knowledge, demonstrating how perceptions of identity and

belonging are changing, especially with affiliation to a national or a global identity. The notion that international students have become global citizens through their affiliation to a global rather than a national identity exhibits a changing and potentially irreversible trend. Global Identity in Multicultural and International Educational Contexts will be of key interest to researchers, academics and policy makers involved with international schooling and globalised education.

China and International Human Rights Na

Jiang, 2013-12-12 This book is designed to introduce law students, legal actors and human rights activists, particularly participants in human rights dialogues with China, to the process and reality of a newly confident China's participation in the international human rights system, albeit with inherent challenges. From an international and comparative perspective, one of the key findings of the author's research is that progress towards human rights depends more on judges than on legislators. Chinese legislators have enacted a series of reforms in order to better protect human rights. Unfortunately, these reforms have not led to greater adherence to China's international human rights obligations in practice. The reforms failed because they have generally been misunderstood by Chinese judges, who often have a limited understanding of international human rights norms. Specifically, this book will examine how judicial misunderstandings have blocked reforms in one specific area, the use of severe punishments, based on international human rights theory and case studies and data analyses. This examination has several purposes. The first is to suggest that China ratify the ICCPR as the next step for its substantive progress in human rights and as a good preparation for its re-applying to be a member of the UN Human Right Council in the future. The second is to explain how judges could be better educated in international human rights norms so as to greatly reduce the use of severe punishments and better comply with China's human rights obligations. The third is to

demonstrate how the international community could better engage with China in a manner that is more conducive to human rights improvements. The author's ultimate goal is to enhance dialogue on human rights in China between judges and the Chinese government, between Chinese judges and their foreign counterparts and between China's government and the international community. Another significant aim of this book is to clarify the controversial question of what obligations China should undertake before its ratification of the ICCPR and to re-examine trends in its developing human rights policy after standing down from the Council in late 2012. The tortuous progress of China's criminal law and criminal justice reforms has confirmed that Chinese judges need further instruction on how to apply severe punishments in a manner consistent with international standards. Judges should be encouraged to exercise more discretion when sentencing so that penalties reflect the intent of relevant domestic laws as well as the international human rights standards enumerated in the ICCPR. In order to better educate and train judges, this book contains introductory chapters that examine the severe punishments currently available to Chinese judges from an international human rights perspective. To illustrate how Chinese justice currently falls short of international norms, this paper also examines several cases that are considered to be indicative of China's progress towards greater respect for human rights and the rule of law. These cases demonstrate that China still has a long way to go to achieve its goals, at least before abolishing the death penalty, forced labor and torture.
