Jetpack Dreams Mac Montandon, 2008-10-28 Jetpack Dreams chronicles the colorful pop history and science of that most amazing and mysterious of machines, the jetpack. While exploring our collective fascination with flight, the tale takes readers from the first flimsy, shoulder-mounted wings to Bill Suitor's 1984 Olympic flight in front of billions of viewers around the world; from a gruesome jetpack-driven murder in Houston in the mid-1990s to the secret laboratories and government facilities of today. Journalist Mac Montandon also explores Hollywood's fascination with the subject, from the 1949 serial King of the Rocket Men to Lost in Space, The Jetsons and The Rocketeer to the cultural jetpack phenomenon represented by Buck Rogers, James Bond, and Boba Fett. He travels the world to meet jetpack enthusiasts who are readying their own personal flying machines for takeoff. Ultimately, it's the search for an answer to two simple questions: Where is the jetpack that was promised to him, and to all of us, years ago? And if it's out there, can he catch a ride?

18-Tom Swift and His Thermo-Ion Jetpack (HB) Victor Appleton II,2016-09-16 The 18th book of the series. Like many people, Tom Swift-and his father, Damon-have dreamed of the days when the personal jet backpacks we've heard about since the 1940s become reality. When a movie director from Hollywood comes to Tom to create the real thing-he demands reality in his science fiction films with special effects-it intrigues the young inventor enough to see what he might create. It's a lot harder than it first appears! He must convince the director that his plans to have a 1940's period piece with leather jackets and bullet-nosed SCUBA tank-shaped rockets has to be updated to match what he believes might be deliverable as a real device. The suit is hijacked by the stuntman and ends up shooting him into space making necessary a search and rescue mission. In the end, it is up to Bud Barclay to save the day and fly the suit for the film. But, a sudden attack might be sending him on a collision course with death. Can Tom rescue his best friend and save the movie?

Where's My Jetpack? Daniel H. Wilson,2018-03-27 It's the twenty-first century and let's be honest-things are a little disappointing. Despite every World's Fair prediction, every futuristic ride at Disneyland, and the advertisements on the last page of every comic book, we are not living the future we were promised. By now, life was supposed to be a fully automated, atomic-powered, germ-free Utopia, a place where a grown man could wear a velvet spandex unitard and not be laughed at. Where are the ray guns, the flying cars, and the hoverboards that we expected? What happened to our promised moon colonies? Our servant robots? In *Where's My Jetpack?*, roboticist Daniel H. Wilson takes a hilarious look at the future we always imagined for ourselves. He exposes technology, spotlights existing prototypes, and reveals drawing-board plans. You will learn which technologies are already available, who made them, and where to find them. If the technology is not public, you will learn how to build, buy, or steal it. And if doesn't yet exist, you will learn what stands in the way of making it real. With thirty entries spanning everything from teleportation to self-contained skyscraper cities, and superbly illustrated by Richard Horne (*101 Things to Do Before You Die*), *Where's My Jetpack?* is an endlessly entertaining, one-of-a-kind look at the world that we always wanted. Daniel H. Wilson, Ph.D, has a degree in Robotics from Carnegie-Mellon. He is the author of *How to Survive a Robot Uprising*. He lives in Portland, Oregon.

The Great American Jet Pack Steve Lehto, 2013-05-01 Tracing the remarkable history of a certain kind of flying machine—from the rocket belt to the jet belt to the flying platform and all the way to Yves Rossy's 21st-century free flights using a jet-powered wing—this historical account delves into the technology that made these devices possible and the reasons why they never became commercial successes on a mass scale. These individual lift devices, as they were blandly labeled by the government men who financed much of

their development, answered man's desire to simply step outside and take flight. No runways, no wings, no pilot's license were required. But the history of the jet pack did not follow its expected trajectory and the devices that were thought to become as commonplace as cars have instead become one of the most overpromised technologies of all time. This fascinating account profiles the inventors and pilots, the hucksters and cheats, and the businessmen and soldiers who were involved with the machines, and it tells a great American story of a technology whose promise may yet, one day, come to fruition.

What Would It Take to Make a Jet Pack? Anita Nahta Amin, 2020 In science fiction, jet packs let people zoom through the air at high speeds. How could one of these amazing wearable flying machines work? Scientists have some ideas, which include using rockets and small jet engines. Discover the science and technology behind what it would take to make a real-life jet pack!--

Kotlin and Android Development featuring Jetpack Michael Fazio, 2021-06-15 Start building native Android apps the modern way in Kotlin with Jetpack's expansive set of tools, libraries, and best practices. Learn how to create efficient, resilient views with Fragments and share data between the views with ViewModels. Use Room to persist valuable data quickly, and avoid NullPointerExceptions and Java's verbose expressions with Kotlin. You can even handle asynchronous web service calls elegantly with Kotlin coroutines. Achieve all of this and much more while building two full-featured apps, following detailed, step-by-step instructions. With Kotlin and Jetpack, Android development is now smoother and more enjoyable than ever before. Dive right in by developing two complete Android apps. With the first app, Penny Drop, you create a full game complete with random die rolls, customizable rules, and AI opponents. Build lightweight Fragment views with data binding, quickly and safely update data with ViewModel classes, and handle all app navigation in a single location. Use Kotlin with Android-specific Kotlin extensions to efficiently write null-safe code without all the normal boilerplate required for pre-Jetpack + Kotlin apps. Persist and retrieve data as full objects with the Room library, then display that data with ViewModels and list records in a RecyclerView. Next, you create the official app for the Android Baseball League. It's a fake league but a real app, where you use what you learn in Penny Drop and build up from there. Navigate all over the app via a Navigation Drawer, including specific locations via Android App Links. Handle asynchronous and web service calls with Kotlin Coroutines, display that data smoothly with the Paging library, and send notifications to a user's phone from your app. Come build Android apps the modern way with Kotlin and Jetpack! What You Need: You'll need the Android SDK, a text editor, and either a real Android device or emulator for testing. While not strictly required, it's assumed you're using Android Studio, which comes with the Android SDK and simplifies creating an emulator. Also, a few examples require JDK 1.8 or later, though all of these pieces can be completed in other ways when using JDK 1.6.

Tom Swift and His Thermo-Ion Jetpack Victor Appleton II, Thomas Hudson, 2016-08-19 In novel 18 of this series, Tom Swift gets the call to put his inventive brains to work for Hollywood. A producer for one of the studios wants to resurrect the old movie series that featured a hero using a flying rocket pack. But, when Tom convinces him that roaring flames and something looking like a pair of fire extinguishers isn't going to work, he agrees to set his serial in the near future. That just leaves Tom with the task of creating a wearable, flyable backpack that can fly for a half hour at a time, be absolutely safe for the stunt man to pilot, and look really incredible. Forces are at work to steal such a technology from both Tom and another company in California that tried making something like it a year earlier. And, it turns out to be an old enemy of the Swifts behind it all. Now, with pressure put on him by the US Government and constant nagging requests to get the backpack delivered to the movie set, Tom must satisfy many people, keep the plans and actual

device safe, and still get his and Bud's wife out to Hollywood to meet some stars.
