*Unit of Action Key Performance Parameter (KPP) Analysis*, 2003 The Unit of Action Maneuver Battle Laboratory (UAMBL) in conjunction with Computer Science Corporation and other TRADOC agencies and schools conducted an analysis on selected key performance parameters of the Future Combat System (FCS) in order to investigate threshold level of these parameters for the Operational Requirements Document (ORD). The UAMBL in conjunction with contractor and other TRADOC personnel conducted the analysis in the Maneuver Warfare Test Bed (MWTB) during the period 27 January - March 2003. The objectives of the analysis was to determine the impact of situational awareness (SA) on battle outcome; to determine the situational awareness threshold necessary for mission accomplishment; to determine the impact of network dependability on battle outcome; and to determine the impact of reduced operational availability on battle outcome.

**Masters of Terror** Richard Tanter, Desmond Ball, Gerry Van Klinken, 2006-06-16 The terror campaign by pro-Indonesian armed groups before, during, and after East Timor's independence referendum in 1999 was a blatant challenge to the international community as many of the acts of murder, political intimidation, destruction, and mass deportation took place before the eyes of the world. Yet still the ultimate responsibility has been denied and obscured. Masters of Terror provides an authoritative analysis and documentation of the brutal operations carried out by the Indonesian army and its East Timorese allies. The authors carefully assemble detailed accounts of the actions of the major Indonesian officers and East Timorese militia commanders accused of gross human rights violations. This indispensable work explores a horrific frontal attack on democracy and calls for the establishment of an international tribunal for crimes against humanity in East Timor.

Scattering of Electromagnetic Waves Leung Tsang, Jin Au Kong, Kung-Hau Ding, 2004-04-07 A timely and authoritative guide to the state of the art of wave scattering Scattering of Electromagnetic Waves offers in three volumes a complete and up-to-date treatment of wave scattering by random discrete scatterers and rough surfaces. Written by leading scientists who have made important contributions to wave scattering over three decades, this new work explains the principles, methods, and applications of this rapidly expanding, interdisciplinary field. It covers both introductory and advanced material and provides students and researchers in remote sensing as well as imaging, optics, and electromagnetic theory with a one-stop reference to a wealth of current research results. Plus, Scattering of Electromagnetic Waves contains detailed discussions of both analytical and numerical methods, including cutting-edge techniques for the recovery of earth/land parametric information. The three volumes are entitled respectively Theories and Applications, Numerical Simulation, and Advanced Topics. In the first volume, Theories and Applications, Leung Tsang (University of Washington) Jin Au Kong (MIT), and Kung-Hau Ding (Air Force Research Lab) cover: \* Basic theory of electromagnetic scattering \* Fundamentals of random scattering \* Characteristics of discrete scatterers and rough surfaces \* Scattering and emission by layered media \* Single scattering and applications \* Radiative transfer theory and solution techniques \* One-dimensional random rough surface scattering

**Making Peace, Making Riots** Anwesha Roy, 2018-05-31 The decade of the 1940s was a turbulent one for Bengal. War, famine, riots and partition - Bengal witnessed it all, and the unique experience of each of these factors created a space for diverse social and political forces to thrive and impact the lives of people of the province. The book embarks on a study of the last seven years of colonial rule in Bengal, analysing the interplay of multiple socioeconomic and political factors that shaped community identities into communal ones. The focus is on three major communal riots that the province witnessed - the Dacca Riots (1941), the Great Calcutta Killings (August 1946) and the Noakhali Riots (October 1946). This book moves beyond the binary understanding of communalism as Hindu versus Muslim and looks at the caste politics in the province, and offers a complete understanding of the 1940s before partition.

**Integrated Systems of Meso-Meteorological and Chemical Transport Models** Alexander Baklanov, Alexander Mahura, Ranjeet Sokhi, 2011-01-03 This book, as the outcome of the COST-728/NetFAM workshop, focuses on the following main topics: 1) on-line coupled meteorology-chemistry modelling with two-way feedbacks, 2) off-line coupled modelling and interfaces, 3) validation and case studies including air quality related episodes, and 4) integration of atmospheric chemical transport (ACT) models with numerical weather prediction (NWP). This book is one of the first attempts to give an overall look on such integrated meso-meteorology and chemistry modelling approach. It reviews the current situation with the on-line and off-line coupling of mesoscale meteorological and ACT models worldwide as well as discusses advantages and shortcomings, best practices, and gives recommendations for on-line and off-line coupling of NWP and ACT models, implementation strategy for different feedback mechanisms, direct and indirect effects of aerosols and advanced interfaces between both types of models. The book is oriented towards numerical weather prediction and air quality modelling communities.

*The Defining Moments in Bengal* Sabyasachi Bhattacharya, 2014-05-27 This work explores some of the constitutive elements in the life and mind of Bengal in the twentieth century. The author addresses some frequently unasked questions about the history of modern Bengal. In what way was twentieth-century Bengal different from 'Renaissance' Bengal of the late-nineteenth century? How was a regional identity consciousness redefined? Did the lineaments of politics in Bengal differ from the

pattern in the rest of India? What social experiences drove the Muslim community's identity perception? How did Bengal cope with such crises as the impact of World War II, the famine of 1943 and the communal clashes that climaxed with the Calcutta riots of 1946? The author has chosen a significant period in the history of the region and draws on a wealth of sources archival and published documents, mainstream dailies, a host of rare Bengali magazines, memoirs and the literature of the time to tell his story. Looking closely at the momentous changes taking place in the region's economy, politics and socio-cultural milieu in the historically transformative years 1920-47, this book highlights myriad issues that cast a shadow on the decades that followed, arguably till our times.

Analysis of Power System Sub/Super-Synchronous Oscillations Caused by Grid-Connected Wind Power Generation Wenjuan Du,Haifeng Wang,2023-11-21 This book provides a systematic introduction to power system sub/super-synchronous oscillations caused by grid-connected wind power generation. The authors look at why oscillations occur and present methods for examining the risk of oscillations. Coverage includes state-space model based analysis and impedance model based analysis, which are the two main methods for examining the power system sub/super-synchronous oscillations. In addition, new methods for examining oscillations in wind farms are proposed. Analysis of Power System Sub/Super-Synchronous Oscillations Caused by Grid-connected Wind Power Generation provides researchers and students with a single-volume introduction to the subject and will be a valuable professional reference for practicing engineers looking for solutions to oscillation problems.

**Technological and Social Dimensions of the Green Revolution** Pratyusha Basu,Bruce Scholten,2014-10-14 Rising concerns about agricultural productivity and food security in rapidly changing economic and environmental contexts have led to renewed interest in agricultural development. But the extent to which new policies and programs will enable socially just and environmentally sustainable futures for rural communities remains a matter of intense debate. This book contributes to such debates by critically examining the intersection of agricultural histories, heterogeneous social contexts and new technological developments in rural communities across the Global South. It shows how experiences of the previous Green Revolution can inform new agricultural programs and enable equitable and participatory development in rural places. Through close engagement with rural communities, this book ensures that rural voices become part of the debate on agricultural development and suggests pathways for building on the gains of the Green Revolution without necessarily repeating its problematic social, technological and environmental aspects. This book was published as a special issue of the International Journal of Agricultural Sustainability.

*Control System Design Guide* George Ellis,2012-06-27 Control Systems Design Guide has helped thousands of engineers to improve machine performance. This fourth edition of the practical guide has been updated with cutting-edge control design scenarios, models and simulations enabling apps from battlebots to solar collectors. This useful reference enhances coverage of practical applications via the inclusion of new control system models, troubleshooting tips, and expanded coverage of complex systems requirements, such as increased speed, precision and remote capabilities, bridging the gap between the complex, math-heavy control theory taught in formal courses, and the efficient implementation required in real industry settings.
