The Budding Tree Aiko Kitahara,2008 In the latter half of the Edo period, the warrior caste was finding itself pushed out of the top echelons of Japanese society & repeated famines swept the countryside. Against this backdrop, a small number of women built themselves independent lives. The stories in this book recount the conditions in which these women lived.

The Smile of a Ragpicker Paul Glynn,2014-09-29 Following his acclaimed work, A Song for Nagasaki, in which Fr. Paul Glynn told the powerful story of Dr. Nagai, a Christian convert of remarkable courage and compassion who ministered to victims of the atomic bomb attack on his city, The Smile of a Ragpicker brings us the heroic story of Satoko Kitahara, a young, beautiful woman of wealth who gave up her riches and comfort to be among the ragpickers in the Tokyo slums. Motivated by her newfound faith in Christ, she plunged into the life of the poor, regardless of the consequences. As Satoko helped the poor with their material and spiritual needs, she also helped them to recover their self-respect and dignity. Satoko's story demonstrates how one person's life can affect so many others. Every day Satoko encountered Christ in some new and challenging way, calling the Church back to identification with the poor. Like Dr. Nagai, she expressed her faith through the sensitivity and beauty of her own Japanese culture. Satoko died a young woman, in dire poverty. Yet her death, mourned by many thousands, reflected her triumphant life of deep Christian faith and charity. This is a powerful story of reconciliation and healing, between people of different social, economic and religious backgrounds, inspired by a frail young woman of luminous faith. Exploring Political and Gender Relations Valentina Marinescu,2017-01-06 The present volume offers a contemporary, multicultural approach to the controversial relationship between politics, media and society. The contributors here analyse such links from a variety of different perspectives, and represent perspectives from various countries across Europe, Asia, North America and South America. Despite their geographical diversity, they manage to reach a common language in their studies, offering a re-positioning of the study of media, society and politics. The new perspectives offered by this volume will be of interest to any media studies scholar, because they bring to light new ideas, new methodologies and results that could be further developed. It allows readers to explore these unique insights, and to easily digest the content and acknowledge the impact of media on society and politics.

Swords, Oaths, and Prophetic Visions Elizabeth A. Oyler,2005-12-31 Swords, Oaths, and Prophetic Visions investigates some of the most historically important political and social issues raised by the Genpei War (1180-1185). This epic civil conflict, which ushered in Japan's age of the warriors, is most famously articulated in the monumental narrative Heike monogatari (The Tale of the Heike). Elizabeth Oyler's ambitious work lays out the complex interconnections between the numerous variant texts of the Heike and the historical events they describe. But Oyler's innovative methodology also brings other texts and genres—the Gikeiki, the Soga monogatari, the Azuma kagami, and pieces from the kōwakamai (ballad-dramas) repertoire—into her analysis. Rather than concentrating on individual texts, Oyler focuses on the inter-textual relationships within this larger body of narrative and drama and the collective role of these works in creating and disseminating stories about some of the Genpei War's most contentious events. In so doing, she works toward a new understanding of the underlying cultural problems of which these tales are symptomatic and which they attempt to address.

The Entangled Civilization Michio Kitahara,1995 Why are democracy, equality and freedom currently in such turmoil? Kitahara discusses the confusion and pessimism in Western civilization today. The author presents his theory of civilization and suggests how the enormous problems within Western civilization can be addressed by pursuing the original basis of Western civilization—individualism. The three key values of democracy, equality and freedom are then re-interpreted from the perspective of individualism, and possibilities for dealing with the problems of Western civilization are suggested. Contents: PART I: PROBLEMS OF WESTERN CIVILIZATION; Western Civilization in Confusion; Democracy; Equality; Freedom; Ideology, Bureaucracy, and Technology; Culture and Biology; Culture and the Individual; PART II: A THEORY OF CIVILIZATION; The Self in the Life Space; The Manipulatory Drive; Identification and Variation; The Conditions for Civilization; The Maintenance of Civilization; The Failure of Civilization; PART III: REFLECTIONS ON WESTERN CIVILIZATION; The Contradictions; Individualism and Democracy; Individualism and Equality; Individualism and Freedom; Epilogue.

Reports from the Zen Wars Steve Antinoff,2016-06-01 Four decades ago—aged twenty—the author experienced what he calls a negative satori, a fundamental and irrefutable realization not of enlightenment, but of himself as a predicament only enlightenment could resolve. This, shaped by the hammer blows of a singular American professor, Richard DeMartino, brought him to Zen, and to Japan. Yet over time, of far greater import than his bungling efforts were the wonderful occupants of the Zen world he encountered: Toyoshima-san, the meditation Prometheus whose superhuman efforts astounded and inspired all while he remained impaled on the cliff's edge; the Thief, chief monastery monk who stole the world from whoever he encountered and whose yawns and the brushing of his teeth shot sparks of Absolute Meaning;

Hisamatsu, the great lay Zen Master who at age 16 overheard a doctor tell his mother he'd be dead in six months, only to awaken ten years later and become the most delighted man in Japan; Bunko, the monk kind to others but ferocious with himself, whose daily state of Oneness in meditation left him dissatisfied because despite all exertion he could not crush it to pieces and break beyond it. These are among the sitters for the portraits in *Reports From the Zen Wars*, Steve Antinoff's attempt to bear witness to what for him has been The Greatest Show on Earth, price of admission one lotus position.

Explorations in Maximizing Syntactic Minimization Samuel D. Epstein, Hisatsugu Kitahara, T. Daniel Seely, 2015-04-17 This volume presents a series of papers written by Epstein, Kitahara and Seely, each of which explores fundamental linguistic questions and analytical mechanisms proposed in recent minimalist work, specifically concerning recent analyses by Noam Chomsky. The collection includes eight papers by the collaborators (one with Miki Obata), plus three additional papers, each individually authored by Epstein, Kitahara and Seely, that cover a range of related topics including: the minimalist commitment to explanation via simplification; the Strong Minimalist Thesis; strict adherence to simplest Merge, $\text{Merge}(X, Y) = \{X, Y\}$, subject to 3rd factor constraints; and state-of-the-art concepts and consequences of Chomsky's most recent proposals. For instance, the volume clarifies and explores: the properties of Merge, feature inheritance and Agree; the nature of phases, cyclicity and countercyclicity; the properties of Transfer; the interpretation of features and their values and the role formal features play in the form and function of syntactic operations; and the specific properties of derivations, partially ordered rule application, and the nature of interface representations. At the cutting edge of scholarship in generative syntax, this volume will be an essential resource for syntax researchers seeking to better understand the minimalist program.

Using Genomics, Metagenomics and Other "Omics" to Assess Valuable Microbial Ecosystem Services and Novel Biotechnological Applications Diana Elizabeth Marco, Florence Abram, 2019-05-15 Most ecosystem services and goods human populations use and consume are provided by microbial populations and communities. Indeed, numerous provisioning services (e.g. food and enzymes for industrial processes), regulating services (e.g. water quality, contamination alleviation and biological processes such as plant-microbial symbioses), and supporting services (e.g. nutrient cycling, agricultural production and biodiversity) are mediated by microbes. The fast development of metagenomics and other meta-omics technologies is expanding our understanding of microbial diversity, ecology, evolution and functioning. This enhanced knowledge directly translates into the emergence of new applications in an unlimited variety of areas across all microbial ecosystem services and goods. The varied topics addressed in this Research Topic include the development of innovative industrial processes, the discovery of novel natural products, the advancement of new agricultural methods, the amelioration of negative effects of productive or natural microbiological processes, as well as food security and human health, and archeological conservation. The articles compiled provide an updated, high-quality overview of current work in the field. This body of research makes a valuable contribution to the understanding of microbial ecosystem services, and expands the horizon for finding and developing new and more efficient biotechnological applications.

Colonizing Language Christina Yi, 2018-03-06 With the outbreak of the Sino-Japanese War in 1894, Japan embarked on a policy of territorial expansion that would claim Taiwan and Korea, among others. Assimilation policies led to a significant body of literature written in Japanese by colonial writers by the 1930s. After its unconditional surrender in 1945, Japan abruptly receded to a nation-state, establishing its present-day borders. Following Korea's liberation, Korean was labeled the national language of the Korean people, and Japanese-language texts were purged from the Korean literary canon. At the same time, these texts were also excluded from the Japanese literary canon, which was reconfigured along national, rather than imperial, borders. In *Colonizing Language*, Christina Yi investigates how linguistic nationalism and national identity intersect in the formation of modern literary canons through an examination of Japanese-language cultural production by Korean and Japanese writers from the 1930s through the 1950s, analyzing how key texts were produced, received, and circulated during the rise and fall of the Japanese empire. She considers a range of Japanese-language writings by Korean colonial subjects published in the 1930s and early 1940s and then traces how postwar reconstructions of ethnolinguistic nationality contributed to the creation of new literary canons in Japan and Korea, with a particular focus on writers from the Korean diasporic community in Japan. Drawing upon fiction, essays, film, literary criticism, and more, Yi challenges conventional understandings of national literature by showing how Japanese language ideology shaped colonial histories and the postcolonial present in East Asia.
